Red Panda Angela R. Glatston,2021-10-28 Red Panda: Biology and Conservation of the First Panda, Second Edition, provides the most up-to-date research, data, and conservation solutions for the red pandas, Ailurus species. Since the publication of the previous edition in 2010, the International Union for Conservation of Nature (IUCN) updated the threat level of red pandas, and they are now considered to be endangered. This latest edition is updated to provide an in-depth look at the scientific and conservation-based issues urgently facing the red panda today. Led by one of the world’s leading authorities and advocates for red panda conservation, this new edition includes data from the Population and Habitat Viability (PHVA) workshops conducted in three of the species’ range states, Nepal, China, and India; these workshops utilized firsthand information on the decrease of red panda populations due to factors including deforestation, illegal pet trade, human population growth, and climate change. This book also includes updated information from the first edition on reproduction, anatomy, veterinary care, zoo management, and fossil history. Discusses the evidence for two species of red panda and how this might impact conservation efforts Reports on status in the wild, looks at conservation issues and considers the future of this unique species Written by long-standing red panda experts as well as those specializing in fields involving cutting-edge red panda research Includes new chapters on topic including the impact of climate change, how bamboo influences distribution, and conservation in Bhutan and Myanmar

Pediatric Retina James D. Reynolds,Scott E. Olitsky,2010-09-14 Pediatric retinal diseases are not simply retinal diseases that occur in children; rather, they are unique disorders that often are not found in adults.

This textbook of the pediatric retina offers in-depth guidance on congenital and acquired diseases of the retina in the pediatric population. It is organized according to disease onset and timing, as well as anatomy. All chapters are written by leading authorities in the field from both the pediatric and the retinal perspective. A multidisciplinary approach to the topic is adopted, and critical information is included on disease classification and diagnosis, pathophysiology, genetics, complications, and prognosis. Pediatric Retina will be a useful source of information for pediatric ophthalmologists, retina specialists, and other eye care providers who care for children.

Women in Kararau Brigitta Hauser-Schäublin,2019 The book offers a glimpse back in time to a Middle Sepik society, the Iatmul, first investigated by the anthropologist Gregory Bateson in the late 1920s while the feminist anthropologist Margaret Mead worked on sex roles among the neighbouring Tchambuli (Chambri) people. The author lived in the Iatmul village of Kararau in 1972/3 where she studied women’s lives, works, and knowledge in detail. She revisited the Sepik in 2015 and 2017. The book, the translation of a 1977 publication in German, is complemented by two chapters dealing with the life of the Iatmul in the 2010s. It presents rich quantitative and qualitative data on subsistence economy, marriage, and women’s knowledge concerning myths and rituals. Besides, life histories and in-depth interviews convey deep insights into women’s experiences and feelings, especially regarding their varied relationships with men in the early 1970s. Since then, Iatmul culture has changed in many respects, especially as far as the economy, religion, knowledge, and the relationship between men and women are concerned. In her afterword, the anthropologist Christiane Falck highlights some of the major topics raised in the book from a 2018 perspective, based on her own fieldwork which she commenced in 2012. Thus, the book provides the reader with detailed information about gendered lives in this riverine village of the 1970s and an understanding of the cultural processes and dynamics that have taken place since.

Script Effects as the Hidden Drive of the Mind, Cognition, and Culture Hye K. Pae,2020-10-14 This open access volume reveals the hidden power of the script we read in and how it shapes and drives our minds, ways of thinking, and cultures. Expanding on the Linguistic Relativity Hypothesis (i.e., the idea that language affects the way we think), this volume proposes the “Script Relativity Hypothesis” (i.e., the idea that the script in which we read affects the way we think) by offering a unique perspective on the effect of script (alphabets, morphosyllabaries, or multi-scripts) on our attention, perception, and problem-solving. Once we become literate, fundamental changes occur in our brain circuitry to accommodate the new demand for resources. The powerful effects of literacy have been demonstrated by research on literate versus illiterate individuals, as well as cross-scriptal transfer, indicating that literate brain networks function differently, depending on the script being read. This book identifies the locus of differences between the Chinese, Japanese, and Koreans, and between the East and the West, as the neural underpinnings of literacy. To support the “Script Relativity Hypothesis”, it reviews a vast corpus of empirical studies, including anthropological accounts of human civilization, social psychology, cognitive psychology, neuropsychology, applied linguistics, second language studies, and cross-cultural communication. It also discusses the impact of reading from screens in the digital age, as well as the impact of bi-script or multi-script use, which is a growing trend around the globe. As a result, our minds, ways of thinking, and cultures are now growing closer together, not farther apart.

Pain Management for Clinicians Carl Edward Noe,2020-05-22 This book focuses on the modern clinical management of acute and chronic pain syndromes. It not only presents information in a clinically illuminating format, but in a manner that is cognizant of the current prescription opioid epidemic. Divided into seven sections, this book covers acute pain, common pain conditions, regional pain problems, interdisciplinary evaluation and treatment, medical treatments and pain in different stages of life. Concluding with the exploration of several special topics, the last section includes an important discussion on the regulatory and legal issues in the use of controlled substances. Chapters are concise and relevant, with an emphasis on treatment based upon evidence from clinical trials and interpretation by practitioners in the field. Expertly written text is further supplemented by high-quality figures, images and tables outlining proven treatments with drug, dose or other information describing details of treatment. Timely, informative, and socially conscious, Pain Management for Clinicians: A Guide to Assessment and Treatment is a valuable reference for clinicians who manage patients with chronic and common pain problems.

Nutrition and Immunity Maryam Mahmoudi,Nima Rezaei,2019-07-30 This volume provides readers with a systematic assessment of current literature on the link between nutrition and immunity. Chapters cover immunonutrition topics such as child development, cancer, aging, allergic asthma, food intolerance, obesity, and chronic critical illness. It also presents a thorough review of microflora of the gut and the essential role it

plays in regulating the balance between immune tolerance and inflammation. Written by experts in the field, Nutrition and Immunity helps readers to further understand the importance of healthy dietary patterns in relation to providing immunity against disorders and offering readily available immunonutritional programming in clinical care. It will be a valuable resource for dietitians, immunologists, endocrinologists and other healthcare professionals.

Control and Restructuring Thomas Grano,2015-03-26 This book investigates the phenomenon of control structures, configurations in which the subject of the embedded clause is missing and is construed as coreferential with the subject of the embedding clause (e.g. John wanted to leave). It draws on data from English, Mandarin Chinese, and Modern Greek to investigate the relationship that control bears both to restructuring - the phenomenon whereby some apparently biclausal structures behave as though they constitute just one clause - and to the meanings of the embedding predicates that participate in these structures. Thomas Grano argues that restructuring is cross-linguistically pervasive and that, by virtue of its co-occurrence with some control predicates but not others, it serves as evidence for a basic division within the class of complement control structures. This division is connected to how the semantics of the control predicate interacts with general principles of clausal architecture and of the syntax-semantics interface. His findings have general implications both for clausal structure and for the relationship between form and meaning in natural language.

Dystonia and Dystonic Syndromes Petr Kanovsky,Kailash P. Bhatia,Raymond L. Rosales,2015-04-13 The current concept of dystonic movement connects the abnormal function of somatosensory pathways and somatosensory analyzers with the dystonic performance of motor action, which is based on the abnormality of sensorimotor integration. This concept is reflected not only in idiopathic dystonia, but also in secondary and symptomatic dystonias. This book will give a comprehensive account of the history of the terms dystonia and dystonic, the physiology of dystonic movement and the genetics and clinical appearance of primary and secondary dystonias. Taking into consideration latest research findings, Dystonia and Dystonic Syndromes offers an in-depth discussion of current treatment options available for dystonia, including pharmacotherapy, surgery and neurorehabilitation. Therefore, it serves as a valuable reference for practitioners in the fields of neurology, neurosurgery, psychiatry and neuroradiology as well as for neuroscientists.

Thermopylae Paul Cartledge,2006-11-02 The true story of a clash of ancient cultures: “Beautifully written and stirring . . . An outstanding retelling of one of the seminal events in world history.” —Booklist In 480 BC, a huge Persian army, led by the inimitable King Xerxes, entered the mountain pass of Thermopylae as it marched on Greece, intending to conquer the land with little difficulty. But the Greeks, led by King Leonidas and a small army of Spartans, took the battle to the Persians at Thermopylae, and halted their advance—almost. It is one of history’s most acclaimed battles, one of civilization’s greatest last stands. And in Thermopylae, renowned classical historian Paul Cartledge looks anew at this history-altering moment and, most impressively, shows how its repercussions have bearing on us even today. The invasion of Europe by Xerxes and his army redefined culture, kingdom, and class. The valiant efforts of a few thousand Greek warriors, facing a huge onrushing Persian army at the narrow pass at Thermopylae, changed the way generations to come would think about combat, courage, and death. “A class in Western Civilization that both instructs and entertains.” —Kirkus Reviews (starred review)

Red Panda Angela R. Glatston,2010-11-25 Red Panda: Biology and Conservation of the First Panda provides a broad-based overview of the biology of the red panda, *Ailurus fulgens*. A carnivore that feeds almost entirely on vegetable material and is colored chestnut red, chocolate brown and cream rather than the expected black and white. This book gathers all the information that is available on the red panda both from the field and captivity as well as from cultural aspects, and attempts to answer that most fundamental of questions, What is a red panda? Scientists have long focused on the red panda’s controversial taxonomy. Is it in fact an Old World procyonid, a very strange bear or simply a panda? All of these hypotheses are addressed in an attempt to classify a unique species and provide an in-depth look at the scientific and conservation-based issues urgently facing the red panda today. Red Panda not only presents an overview of the current state of our knowledge about this intriguing species but it is also intended to bring the red panda out of obscurity and into the spotlight of public attention. Wide-ranging account of the red panda (*Ailurus fulgens*) covers all the information that is available on this species both in and ex situ Discusses the status of the species in the wild, examines how human activities impact on their habitat, and develops projections to translate this in terms of overall panda numbers Reports on status in the wild, looks at conservation issues and considers the future of this unique species Includes contributions from long-standing red panda experts as well as those specializing in fields involving cutting-edge red panda research.

Hazy Bloom and the Tomorrow Power Jennifer Hamburg,2017-02-28 One perfectly ordinary afternoon, a vision flashes through third-grader Hazel “Hazy” Bloom’s mind—of flying peas. The next day in the school cafeteria, a food fight erupts that involves the very same airborne veggie. After one or two more seemingly silly visions come true in unexpected ways, Hazy realizes she has a strange new power to foresee a visual clue about trouble that’s on its way within twenty-four hours. But seeing is not always understanding, and headstrong Hazy quickly discovers that “tomorrow power” sometimes only gives her the ability to make a hilarious mess of things instead of saving the day.

Hazy Bloom and the Pet Project Jennifer Hamburg,2018-02-27 After wacky third grader Hazy Bloom starts seeing visions of things that will happen one day in the future, she hopes her tomorrow power will help her get the pet she's always dreamed of in this hilarious book by Jennifer Hamburg with illustrations by Jenn Harney. It's the annual Third Grade Leadership Challenge, where each third-grade class plans and hosts a fundraiser. Hazel Hazy Bloom, however, has other things on her mind—like proving to her parents she’s responsible enough to get a pet iguana. But when Hazy's tomorrow power—her ability to see visual clues about things that will happen one day in the future—mistakenly causes her to have a brilliant idea for a Pet Day fundraiser, her classmates put her in charge. Hazy's annoyed, until she realizes that if she helps the class win, her parents will finally see that she's responsible enough to get the iguana she's dreaming of. Soon, Hazy’s determined to make sure her team ends up on top—but it’s not so easy when her tomorrow visions keep throwing her plans into disarray!

Swim Swim Sink Jennifer Harney,2020-01-04 Three tiny ducks. One straight line.New happy flock. All feeling fine. Until, that is, the last ducking sinks when she should swim. Let's try that again . . . and again and again. All this sinking is ruining the rhyme! Little ones will love following the antics of these adorable ducklings, and parents will enjoy the way the book goes off the rails halfway through. Everyone will laugh at the tiny ducky's string of failures and cheer when it comes up with the best solution of all.
