Enhancing Education With Intelligent Systems and Data-Driven Instruction Bhatia, Madhulika,Mushtaq, Muhammad Tahir,2024-03-04 In the dynamic environment of education, the traditional methods employed by educators are struggling to keep pace with the evolving needs of students in the 21st century. The challenge lies in fostering an environment that not only engages students but also equips them with the skills essential for the modern world. Teachers find themselves navigating a complex terrain where outdated pedagogical approaches fall short of unlocking the full potential of diverse learning styles and unique talents within their classrooms. Enhancing Education With Intelligent Systems and Data-Driven Instruction is a groundbreaking book that goes beyond the constraints of conventional teaching methods, offering a comprehensive guide that inspires and equips educators with innovative tools and approaches. From integrating innovative technology to cultivating collaborative learning environments, the book provides a roadmap for educators to reimagine their teaching practices. By embracing student-centered approaches, fostering diversity, and utilizing digital tools effectively, this book empowers teachers to transform their classrooms into dynamic hubs of inspiration, motivation, and empowerment.

Mobile Persuasion Design Aaron Marcus,2015-11-03 Mobile Persuasion Design presents ten conceptual design projects (or 'Machines') for new mobile application's (smartphone or tablet with Web portals) that combine theories of persuasion and information design to change people's behaviour. Areas such as the environment, health, learning and happiness are explored, looking at ways of marrying people's wants and needs to make simple, usable and desirable mobile applications. A user-centred design approach has been used, adopting user experience (UX) methods, in-depth case studies and market analysis to see what a modern user needs from their mobile application. By applying concepts like persuasion theory and information architecture, try to find ways to satisfy these needs and positively change their user habits. In 2011, the Green, Health, and Money Machines won design awards in an international competition hosted by the International Institute for Information Design, Vienna.

Intersections in Language Planning and Policy Jean Fornasiero,Sarah M. A. Reed,Rob Amery,Eric Bouvet,Kayoko Enomoto,Hui Ling Xu,2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system, predominantly in Australia, but touching other universities worldwide. Related studies on language planning, methodology or pedagogy have focused on one or more of these same issues, but rarely on their totality. Intersections as a metaphor running discreetly through the essays in this volume, connects them all to a lived reality. The field of languages and cultures, as it is practised and reflected upon in Australian universities, is essentially an interdisciplinary and interconnecting space - one in which linguistic and disciplinary diversities meet and join forces, rather than collide or disperse along different pathways. The international and local studies featured here focus on language planning, new pedagogies and language reclamation and link to meeting points and commonalities. They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field, whether within their institutions, within the tertiary system, or within the framework of government policy.

Handbook of Research on Challenges and Opportunities in Launching a Technology-Driven International University Khosrow-Pour, D.B.A., Mehdi,2019-02-22 The global digital economy continues to demand the need for educated and highly trained professionals, requiring higher learning institutions to provide accessible technology-driven experience to prepare future leaders effectively. However, there are challenges involved in creating a robust curriculum and recruiting top-notch faculty all over the world while also meeting the academic criteria to offer effective academic programs and degrees to students. The Handbook of Research on Challenges and Opportunities in Launching a Technology-Driven International University is a pivotal reference source that provides empirical and theoretical research focused on the effective construction of technology-driven higher learning international universities. While highlighting topics such as accelerated and innovative curriculum, recruitment of international faculty, on-campus development, and distance learning systems, this publication explores the financial and economic impacts of launching a university, and the methods of how to identify the appropriate locale for universities and/or branch campuses that will ideally complement the local interest of business sectors within the selected location. This book is ideally designed for entrepreneurs, practitioners, academicians, administrators, government officials, researchers, and consultants.

Educational Leadership and Administration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2016-10-12 The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective leadership strategies allow for the continued progress of modern educational initiatives. Educational Leadership and Administration: Concepts, Methodologies, Tools, and Applications provides comprehensive research perspectives on the multi-faceted issues of leadership and administration considerations within the education sector. Emphasizing theoretical frameworks, emerging strategic initiatives, and future outlooks, this publication is an ideal reference source for educators, professionals, school administrators, researchers, and practitioners in the field of education.

Discovery Tools: The Next Generation of Library Research John S. Spencer,Christopher Millson-Martula,2016-03-16 Discovery tools are now becoming more common in the academic library landscape, and more products are now available from vendors. While librarians are advocating and promoting their use by students and faculty, they are also evaluating their searching capabilities, their usefulness, and on-going maintenance requirements. This work is geared to librarians considering the implementation of a discovery tool. As a result, it addresses the selection and implementation of such a tool, its relationship to information literacy and catalog maintenance, usability testing, and assessment. Issues such as database and catalog searching and the quality of searching queries are also addressed. A comprehensive review of the literature serves as a valuable resource. Librarians will appreciate the highly practical nature of the volume as it is enriched by a number of varied case studies. This book was published as a special triple issue of College & Undergraduate Libraries.

The New Digital Shoreline Roger McHaney, 2023-07-03 Two seismic forces beyond our control – the advent of Web 2.0 and the inexorable influx of tech-savvy Millennials on campus – are shaping what Roger McHaney calls “The New Digital Shoreline” of higher education. Failure to chart its contours, and adapt, poses a major threat to higher education as we know it. These forces demand that we as educators reconsider the learning theories, pedagogies, and practices on which we have depended, and modify our interactions with students and peers—all without sacrificing good teaching, or lowering standards, to improve student outcomes. Achieving these goals requires understanding how the indigenous population of this new shoreline is different. These students aren’t necessarily smarter or technologically superior, but they do have different expectations. Their approaches to learning are shaped by social networking and other forms of convenient, computer-enabled and mobile communication devices; by instant access to an over-abundance of information; by technologies that have conferred the ability to personalize and customize their world to a degree never seen before; and by time-shifting and time-slicing. As well as understanding students’ assumptions and expectations, we have no option but to familiarize ourselves with the characteristics and applications of Web 2.0—essentially a new mind set about how to use Internet technologies around the concepts of social computing, social media, content sharing, filtering, and user experience. Roger McHaney not only deftly analyzes how Web 2.0 is shaping the attitudes and motivations of today’s students, but guides us through the topography of existing and emerging digital media, environments, applications, platforms and devices – not least the impact of e-readers and tablets on the future of the textbook – and the potential they have for disrupting teacher-student relationships; and, if appropriately used, for engaging students in their learning. This book argues for nothing less than a reinvention of higher education to meet these new realities. Just adding technology to our teaching practices will not suffice. McHaney calls for a complete rethinking of our practice of teaching to meet the needs of this emerging world and envisioning ourselves as connected, co-learners with our students.

Teaching the Humanities Online: A Practical Guide to the Virtual Classroom, 2011

Research on Course Management Systems in Higher Education Angela D. Benson, Andrew Whitworth, 2014-03-01 The e-learning research literature is characterized by studies that investigate the practice of teaching and learning online (pedagogy) and those that investigate the planning and administrative functions associated with e-learning delivery (management). This edited volume directs attention to pedagogy and management as it relates to the primary e-learning delivery mechanism, the course management system (CMS). Specifically, the research presented in this collection deals with a range of themes relevant to the selection, implementation, use and evaluation of course management systems in higher education. The primary audience for this book includes instructors and students in instructional and educational technology programs. The book could easily be used as a text in a distance or online learning course. The secondary audience includes instructors and students in higher education programs and e-learning practitioners and administrators. The book is timely because of the growing presence and influence of course management systems on teaching and learning in higher education.
