Using Network and Mobile Technology to Bridge
Formal and Informal Learning Guglielmo
Trentin,Manuela Repetto,2013-02-08 An ever-
widening gap exists between how students and
schools use communication technology. Using
Network and Mobile Technology to Bridge Formal and
Informal Learning introduces new methods (inspired
by 'pedagogy 2.0') of harnessing the potential of
communication technologies for teaching and
learning. This book considers how attitudes
towards network and mobile technology (NMT) gained
outside the school can be shunted into new
educational paradigms combining formal and
informal learning processes. It begins with an
overview of these paradigms, and their
sustainability. It then considers the pedagogical
dimension of formal/informal integration through
NMT, moving on to teachers' professional
development. Next, the organizational development
of schools in the context of formal and informal
learning is detailed. Finally, the book covers the
role of technologies supporting formal/informal
integration into subject-oriented education.
Includes a framework for the sustainability of new

educational paradigms based on the combination of formal and informal learning processes supported by network and mobile technology (NMT) Provides a series of recommendations on how to use attitudes towards NMT gained outside the school to integrate formal and informal learning Gives a teacher training approach on how to use network and mobile technology-based informal learning to enhance formal learning pathways
