**Economic Catch-up and Technological Leapfrogging** Keun Lee, 2016-08-26 This book elaborates upon the dynamic changes to Korean firms and the economy from the perspective of catch-up theory. The central premise of the book is that a latecomer's sustained catch-up is not possible by simply following the path of the forerunners but by creating a new path or 'leapfrogging'. In this sense, the idea of catch-up distinguishes itself from traditional views that focus on the role of the market or the state in development.

The Challenges of Technology and Economic Catch-Up in Emerging Economies Jeong-Dong Lee, Keun Lee, Dirk Meissner, Slavo Radosevic, Nicholas Vonortas, 2021 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Innovation is a pivotal driving force behind economic growth. Technological capability deepens and diversifies industrial activity, which fundamentally enhances growth potential. Consequently, failure to build effective technological capability can lead to slow long-term economic growth. This book synthesizes and interprets existing knowledge on technology upgrading failures in order to better understand the challenges of technology upgrading in emerging economies. The objective is to bring together diverse evidence on three major dimensions of technology upgrading: paths of technology upgrading, structural changes in the nature of technology upgrading, and the issues of technology transfer and technology upgrading. Knowledge on these three dimensions is synthesized at the firm, sector, and macro levels across different countries and world macroregions. Compared to the challenges and uncertainties facing emerging economies, our understanding of technology

upgrading is sparse, unsystematic, and scattered. The recent growth slowdown in many emerging economies, often known as the middle-income trap, has reinforced the importance of understanding the technology upgrading challenges they experience. While our understanding of these issues from the 1980s and 1990s is relatively more systematised, the more recent changes that took place during the globalization and proliferation of global value chains, and the effects of the 2008 financial crisis, have not been explored and compared synthetically. The current effects of COVID-19, geopolitical struggles, and the growing concern around environmental sustainability add significant complexity to an already problematic situation. The time is ripe to take stock of our existing knowledge on processes of technology upgrading in emerging economies and make further inroads in research on this crucial issue.

**Schumpeterian Analysis of Economic Catch-up** Keun Lee, 2013-10-31 A fresh analysis of the secrets of Asian economic success and how other countries can escape the 'middle-income' trap.

**Digital Food TV** Michelle Phillipov, 2022-11-01 This book explores the new theoretical and political questions raised by food TV's digital transformation. Bringing together analyses of food media texts and platform infrastructures—from streaming and catch-up TV to YouTube and Facebook food videos—it shows how new textual conventions, algorithmic practices, and market logics have redrawn the boundaries of food TV and altered the cultural place of food, and food media, in a digital era. With case studies of new and rerun television and emerging online genres, Digital Food TV considers what food television means at the current moment—a time when on-screen digital content is rapidly proliferating and televisual platforms and technologies

are undergoing significant change. This book will appeal to students and scholars of food studies, television studies, and digital media studies.

*Intellectual Property Rights, Development, and Catch Up* Hiroyuki Odagiri, Akira Goto, Atsushi Sunami, Richard R. Nelson, 2010-04-08 For most countries, economic development involves 'catching up' with leading countries. This needs more than physical assets and labour: it requires technological capabilities, educational attainment, entrepreneurship, and development of the necessary institutional infrastructure, including intellectual property rights, particularly patents.

*Dictionary of Media and Communication Studies* James Watson, Anne Hill, 2015-10-22 A comprehensive lexicon of all aspects of the study of interpersonal, group, mass communication and the world of internet communication.

*The Art of Economic Catch-Up* Keun Lee, 2019-05-16 In his previous Schumpeter Prize-winning work, Lee analysed the 'middle-income trap', in which a developing country grows strongly only to plateau at a certain point. Yet certain developing countries, most significantly China, have managed to escape this trap. Building on the conception of the ladder from developing to developed countries being kicked away, this book suggests alternative ways, such as 'leapfrogging', in which latecomers can catch up with their forerunners. Providing policy solutions for development challenges in non-technical terms, Lee frames his theories with insightful and inventive allegories. In doing so, Lee also accounts for the catch-up paradox, in which one cannot conclusively catch-up if they are continually trying to follow the path of those ahead. He argues that eventual catch-up and overtaking require pursuing a path that differs from that taken by forerunners. This highly

original and accessible book will appeal to students, scholars, practitioners, and anyone interested in economic development and innovation.

*Innovation, Catch-up and Sustainable Development* Andreas Pyka, Keun Lee, 2021-11-16 This volume presents selected contributions from the 2018 conference of the International Schumpeter Society (ISS). The selected chapters in this volume reflect the state-of-the-art of Schumpeterian economics dedicated to the three conference topics innovation, catch-up, and sustainability. Innovation is driving catch-up processes and is the condition for a transformation towards higher degrees of sustainability. Therefore, Schumpeterian economics has to play a key role in these most challenging fields of human societies' development in the 21st century. The three topics are well suited to capture the great variety of issues, which have the potential to shape the scientific discussion in economics and related disciplines in the years to come. The presented contributions show the broadness and high standard of Schumpeterian analysis. The ideas of dynamics, heterogeneity, novelty, and innovation as well as transformation are the most attractive fields in economics today and offer the most prolific interdisciplinary connections now and for the years to come when humankind, our global society, has to master the transition towards sustainable economic systems by solving the grand challenges and wicked problems with which we are confronted today. Therefore, the book is a must-read for scholars, researchers, and students, interested in a better understanding of innovation, catch-up, and sustainability, and Schumpeterian economics in general. **Catch-up Industrialization** Akira Suehiro, 2008 Catch-Up Industrialization is an innovative examination of how the political ideology of 'developmentalism' has driven East Asian economic growth. The author considers innovative production and management techniques, the patterns of industrial relations, and the way education shapes the workforce, using this information to assess late 20th century East Asian economic development based on economic liberalization and the rapid diffusion of information technology. The term 'catch-up' links developing and developed countries, and defines the socioeconomic mindset common to high-growth societies of Asia. The author's argument differs from neoclassical approaches emphasizing the workings of the market, statist ones emphasizing policy rather than private initiatives, business studies lacking macroeconomic and global perspectives, work by development economists based on agriculture, and World Bank/IMF studies that lack socio-cultural and historical understanding.

**China's Technological Leapfrogging and Economic Catch-up** Keun Lee,2021-12-14 After the miraculous economic growth known as the Beijing Consensus, China is now facing a slowdown. The attention has moved to the issue of the middle income trap. This book deals with this interesting issue in the context of China. It also discusses China's limitations and future prospects, especially after the rise of a new cold war between China and the US, namely the question of whether China would fall into another trap called the Thucydides trap, or conflict with the existing hegemon as a rising power. In sum, this book plays around three key terms, namely, the Beijing Consensus, the Middle Income Trap, and the Thucydides trap, and applies a Schumpeterian approach to these concepts. It also conducts a comparative analysis that examines China from an economic catch-up perspective. An economic catch-up starts from learning and imitating a forerunner, but finishing the race successfully requires taking a different path along the

road. This act is also known as leapfrogging, which implies a latecomer doing something different from, and often ahead of, a forerunner. Technological leapfrogging may lead to technological catch-up, which means reducing the technological gap, and then finally to economic catch-up in living standards (per capita income) and economic size (GDP: economic power). This linkage from technological leapfrogging and catch-up to economic catch-up corresponds exactly with a similar linkage from the Beijing Consensus to escaping (or not) the middle income and the Thucydides traps. One conclusion from this book is that China's successful rise as a global industrial power has been due to its strategy of technological leapfrogging, which has enabled China to move beyond the middle income trap and possibly the Thucydides trap, although at a slower speed.

A Transnational Study of Law and Justice on TV Peter Robson, Jennifer L Schulz, 2016-11-17 This collection examines law and justice on television in different countries around the world. It provides a benchmark for further

study of the nature and extent of television coverage of justice in fictional, reality and documentary forms. It does this by drawing on empirical work from a range of scholars in different jurisdictions. Each chapter looks at the raw data of how much justice material viewers were able to access in the multi-channel world of 2014 looking at three phases: apprehension (police), adjudication (lawyers), and disposition (prison/punishment). All of the authors indicate how television developed in their countries. Some have extensive public service channels mixed with private media channels. Financing ranges from advertising to programme sponsorship to licensing arrangements. A few countries have mixtures of these. Each author also examines how TV justice has developed in their own particular jurisdiction. Readers will find interesting variations and thought-provoking similarities. There are a lot of television shows focussed on legal themes that are imported around the world. The authors analyse these as well. This book is a must-read for anyone interested in law, popular culture, TV, or justice and provides an important addition to the literature due to its grounding in empirical data.

academy in society are taking place in the UK, the USA and Europe as well as in other parts of the world. Chapters cover diverse areas of history from this perspective including: public history national histories new technologies and the natural sciences campaigning histories the impact agenda. This collection is a political and intellectual intervention at a time when scholars and readers of history are being asked to explain why history matters and it seeks to intervene in the debates on 'impact', on education and on the role of the past in the shaping of our future. Bringing together leading authors from a wide range of fields, *The Impact of History?* is an accessible and engaging yet polemical and thought-provoking overview of the role of history in contemporary society.

**75 Wasted Years, Let us Catch Up and Leapfrog** Vikram Sinha, 2022-08-02 The author tears into the false narrative of India's progress since independence and the mirage of a glorious future, created by the political class and the bureaucracy. With facts, data, and a touching narration he reveals the plight of the poor and the unemployed through the decades. One of the most agonizing facts that he highlights is that since independence, India has fallen 100 places behind other countries in GDP per capita; and with Bangladesh overtaking India on this parameter, India is destined to remain the poorest large country in the world. The book illustrates how Indians have become hostage to a crippled system that is unable to deliver. Power brokers in the garb of politicians, entrenched bureaucracy driven by self-interest, ineffective judiciary, and elements of the fourth estate along with self-seeking pseudo-intellectuals have formed a powerful coalition to thwart any change in the system and policies which is essential for the transformation of India, initiated from time to time by some progressive governments. Based on his diagnosis of why India continues to fall by the wayside as also his insights into strategies, governance systems, and best practices of countries like South Korea, China, and others, the author evolves a framework for the strategic transformation of India to 'Catch Up and Leapfrog' these countries.
