Beyond the Conservatory Model Michael Stepniak,Peter Sirotin,2019-09-05 Amid enormous changes in higher education, audience and music listener preferences, and the relevant career marketplace, music faculty are increasingly aware of the need to reimagine classical music performance training for current and future students. But how can faculty and administrators, under urgent pressure to act, be certain that their changes are effective, strategic, and beneficial for students and institutions? In this provocative yet measured book, Michael Stepniak and Peter Sirotin address these questions with perspectives rooted in extensive experience as musicians, educators, and arts leaders. Building on a multidimensional analysis of core issues and drawing upon interviews with leaders from across the performing arts and higher education music fields, Stepniak and Sirotin scrutinize arguments for and against radical change, illuminating areas of unavoidable challenge as well as areas of possibility and hope. An essential read for education leaders contemplating how classical music can continue to thrive within American higher education.

Child Composers in the Old Conservatories Robert O. Gjerdingen,2020-01-10 In seventeenth century Italy, overcrowding, violent political uprising, and plague led an astonishing number of abandoned and orphaned children to overwhelm the cities. Out of the piety of private citizens and the apathy of local governments, the system of conservatori was created to house, nurture, and train these fanciulli vaganti (roaming children) to become hatters, shoemakers, tailors, goldsmiths, cabinet makers, and musicians - a range of practical trades that might sustain them and enable them to contribute to society. Conservatori were founded across Italy, from Venice and Florence to Parma and Naples, many specializing in a particular trade. Four music conservatori in Naples gained particular renown for their exceptional training of musicians, both performers and composers, all boys. By the eighteenth century, the graduates of the Naples conservatories began to spread across Europe, with some 600 boys formerly in residence beginning to dominate the European musical world. Other conservatories in the country - including the Paris Conservatory - began to imitate the principles of the Naples' conservatory's training, known as the partimento tradition. The daily lessons and exercises associated with this tradition were largely lost-until author Robert Gjerdingen discovered evidence of them in the archives of conservatories across Italy and the rest of Europe. Compellingly narrated and richly illustrated, *Child Composers in the Old Conservatory* follows the story of these boys as they undergo rigorous training with the conservatory's maestri and eventually become maestri themselves, then moves forward in time to see the influence of partimenti in the training of such composers as Claude Debussy and Colette Boyer. Advocating for the revival of partimenti in modern music education, the book explores the tremendous potential of this tradition to enable natural musical fluency for students of all ages learning the craft today.

The Conservatory: Ted Dalbotten,2006-07-25 Like Ted Dalbottens previous books, *Winterreise* and *Triptych a Mystery* (Part I, *The Painting*) which among other material dealt with various aspects of both the performing and non performing arts, the present volume aside from its examination of the human condition concerns itself particularly with musical matters, though not only performing issues. Since music has been the predominant activity of the author now in his eighty fourth year it was almost inevitable he would eventually seek to explore this aspect of his life in some extended fictional form and in some depth. Aside from his work as both dance and vocal accompanist, for the last twenty four years he has been involved in a small group calling themselves Two Piano- Eight, which meet regularly and of which he is one of the founding members. Their activity is reading through arrangements of mainly orchestral and chamber works for two pianos, eight hands to which he has contributed over seventy five of his own transcriptions of both large and smaller works.

Jewel of Como Leigh Roethke,Bonnie Blodgett,2009 Jewel of Como celebrates one of the most beloved buildings in Minnesota and, from the standpoint of horticulture and architecture, one of the most important in the world. This stunning new book published by the Afton Historical Society Press tells the story of the Marjorie McNeely Conservatory at Como Park in St. Paul, Minnesota, in words and pictures--breathtaking color photos of the conservatory today as well as historic photos that bring to life its rich and sometimes tumultuous past. The Marjorie McNeely Conservatory (originally called the Como Conservatory) is the centerpiece of Como Park. Designed and built in 1915, the conservatory was intended to serve two functions, as it still does today. The conservatory is both a show house where visitors can come in all seasons to enjoy tropical and semi-tropical splendors, and a shelter for the many plants the park displays in its indoor and outdoor gardens.
