Divorcing a Narcissist Tina Swithin,2012 Tina Swithin was swept off her feet by a modern day Prince Charming and married him one year later. Tina soon discovered that there was something seriously wrong with her fairytale. The marriage was filled with lies, deception, fraud and many tears. Tina was left in an utter state of confusion. This wasn't the man that she married...or was it? Tina first heard the term, Narcissistic Personality Disorder from her therapist in 2008 but quickly dismissed the notion that something could be wrong with her husband. It took several years for Tina to begin researching the disorder and suddenly, the past ten years of her life made complete sense. Tina soon discovered that there is only one thing more difficult than being married to a narcissist and that is divorcing a narcissist. In her book, Tina will explain how a smart, independent woman can fall prey to a narcissistic man. Tina discusses the red flag reflections that she chose to ignore while dating and during the marriage. Tina acted as her own attorney in an extremely high-conflict divorce and she will share the strategies that helped her to navigate through this battle while maintaining her sanity and sense of humor. Tina will help you to feel less alone in your journey and will assure you that there is light at the end of the tunnel no matter how dark things are right now. While Tina endured a tumultuous 6-year custody battle, she prevailed and today, her daughters have peace.

The Arctic and World Order Kristina Spohr,Daniel S. Hamilton,Jason C. Moyer,2021-01-26 The Arctic, long described as the world's last frontier, is quickly becoming our first frontier—the front line in a world of more diffuse power, sharper geopolitical competition, and deepening interdependencies between people and nature. A space of often-bitter cold, the Arctic is the fastest-warming place on earth. It is humanity's canary in the coal mine—an early warning sign of the world's climate crisis. The Arctic “regime” has pioneered many innovative means of governance among often-contentious state and non-state actors. Instead of being the “last white dot on the map,” the Arctic is where the contours of our rapidly evolving world may first be glimpsed. In this book, scholars and practitioners—from Anchorage to Moscow, from Nuuk to Hong Kong—explore the huge political, legal, social, economic, geostrategic and environmental challenges confronting the Arctic regime, and what this means for the future of world order.

The Coding Manual for Qualitative Researchers Johnny Saldana,2012-10-04 The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis - demonstrates the writing of analytic memos -discusses available analytic software -suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences.

The Palgrave Handbook of Critical Menstruation Studies Chris Bobel,Inga T. Winkler,Breanne Fahs,Katie Ann Hasson,Elizabeth Arveda Kissling,Tomi-Ann Roberts,2020-07-24 This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: ““what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

Immunophenotyping J. Philip McCoy, Jr, 2020-09-15 This volume presents the latest collection of immunophenotypic techniques and applications used in research and clinical settings. Chapters in this book cover topics such as constructions of high dimensions fluorescence and mass cytometry panels; fluorescence barcoding; using dried or lyophilized reagents; and immunophenotypic examples of specific cell types. The book concludes with a discussion on the critical roles of quality control and immunophenotyping in the clinical environment. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and comprehensive, *Immunophenotyping: Methods and Protocols* is a valuable resource for any researchers, clinician, or scientist interested in learning more about this evolving field.

PVC waste treatment in the Nordic countries Anna Fråne, Jurate Miliute-Plepiene, Alexandra Maria Almasi, Anna-Karin Westöö, 2019-02-18 The aim of the project was to map PVC waste streams in Denmark, Sweden, Norway and Finland. The available estimates are made occasionally, mostly within the frames of different projects and are not based on any formalized official reporting system or other rigorous accounting scheme. Overall, a large part of PVC waste ends up in mixed waste fractions and is eventually treated in waste-to-energy plants. Landfilling of PVC waste is banned in two countries, but some exceptions exist. Norway is the only country that treats some PVC waste as hazardous waste. The current waste treatment situation in the four Nordic countries is driven by several factors, such as diverse origins of PVC products, some specifics of the Nordic market, rather low focus on PVC waste in policy strategies or plans, technical issues regarding incineration of PVC waste, and the lack of domestic recycling.

Making Futures Pelle Ehn, Elisabet M. Nilsson, Richard Topgaard, 2014-10-31 This book describes experiments in innovation, design, and democracy, undertaken largely by grassroots organizations, non-governmental organizations, and multi-ethnic working-class neighborhoods. These stories challenge the dominant perception of what constitutes successful innovations. They recount efforts at social innovation, opening the production process, challenging the creative class, and expanding the public sphere. The cases considered include a collective of immigrant women who perform collaborative services, the development of an open-hardware movement, grassroots journalism, and hip-hop performances on city buses. They point to the possibility of democratized innovation that goes beyond solo entrepreneurship and crowdsourcing in the service of corporations to include multiple futures imagined and made locally by often-marginalized publics.

Inside Asylum Bureaucracy: Organizing Refugee Status Determination in Austria Julia Dahlvik, 2018-04-03 This open access monograph provides sociological insight into governmental action on the administration of asylum in the European context. It offers an in-depth understanding of how decision-making officials encounter and respond to structural contradictions in the asylum procedure produced by diverging legal, political, and administrative objectives. The study focuses on structural aspects on the one hand, such as legal and organisational elements, and aspects of agency on the other hand, examining the social practices and processes going on at the frontside and the backside of the administrative asylum system. Coverage is based on a case study using ethnographic methods, including qualitative interviews, participant observation, as well as artefact analysis. This case study is positioned within a broader context and allows for comparison within and beyond the European system, building a bridge to the international scientific community. In addition, the author links the empirical findings to sociological theory. She explains the identified patterns of social practice in asylum administration along the theories of social practices, social construction and structuration. This helps to contribute to the often missing theoretical development in this particular field of research. Overall, this book provides a sociological contribution to a key issue in today's debate on immigration in Europe and beyond. It will appeal to researchers, policy makers, administrators, and practitioners as well as students and readers interested in immigration and asylum.

Springer Handbook of Robotics Bruno Siciliano, Oussama Khatib, 2016-07-27 The second edition of this handbook provides a state-of-the-art overview on the various aspects in the rapidly developing field of robotics. Reaching for the human frontier, robotics is vigorously engaged in the growing challenges of new emerging domains. Interacting, exploring, and working with humans, the new generation of robots will increasingly touch people and their lives. The credible prospect of practical robots among humans is the result of the scientific endeavour of a half a century of robotic developments that established robotics as a modern scientific discipline. The ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the *Springer Handbook of Robotics*. The first edition of the handbook soon became a landmark in robotics publishing and won the American Association of Publishers PROSE Award for Excellence in Physical Sciences & Mathematics as well as the organization's Award for Engineering & Technology. The second edition of the handbook, edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors, continues to be an authoritative reference for robotics researchers, newcomers to the field, and

scholars from related disciplines. The contents have been restructured to achieve four main objectives: the enlargement of foundational topics for robotics, the enlightenment of design of various types of robotic systems, the extension of the treatment on robots moving in the environment, and the enrichment of advanced robotics applications. Further to an extensive update, fifteen new chapters have been introduced on emerging topics, and a new generation of authors have joined the handbook's team. A novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos, which bring valuable insight into the contents. The videos can be viewed directly augmented into the text with a smartphone or tablet using a unique and specially designed app. Springer Handbook of Robotics Multimedia Extension Portal: <http://handbookofrobotics.org/>

All Fall Down Jennifer Weiner, 2015-04-07 Allison Weiss has a great job, a handsome husband, an adorable daughter and a secret. Allison Weiss is a typical working mother, trying to balance a business, aging parents, a demanding daughter, and a marriage. But when the website she develops takes off, she finds herself challenged to the point of being completely overwhelmed. Her husband's becoming distant, her daughter's acting spoiled, her father is dealing with early Alzheimer's, and her mother's barely dealing at all. As she struggles to hold her home and work life together, and meet all of the needs of the people around her, Allison finds that the painkillers she was prescribed for a back injury help her deal with more than just physical discomfort. However, when Allison's use gets to the point that she can no longer control or hide it, she ends up in a world she never thought she'd experience outside of a movie theater: rehab. Amid the teenage heroin addicts, the alcoholic grandmothers, the barely-trained recovery coaches, and the counselors who seem to believe that one mode of recovery fits all, Allison struggles to get her life back on track, even as she's convincing herself that she's not as bad off as the women around her.

Landscape Experiences as a Cultural Ecosystem Service in a Nordic Context Rasmus Reinvang, Marianne Zandersen, Henrik Lindhjem, 2015 Cultural ecosystem services in the form of experiences derived from landscapes are potentially important, but often overlooked. Given the large and unprecedented landscape changes many of the Nordic countries are undergoing, there is a need to find ways of including people's preferences and the value of landscape impacts in policy assessments and decision-making processes. The project aim has been to synthesize knowledge about the magnitude and value of landscape experiences, and investigate current practices and examples of how landscape impacts are incorporated (or not) in policy assessments and decision-making contexts in the Nordics. The literature demonstrates potentially high unaccounted welfare loss from landscape change. We find clear weaknesses in current practices, that a second phase will try to address. The project was carried out by Vista Analysis in Oslo and Department of Environmental Science at Aarhus University from 2014-15.
