Image Analysis and Processing - ICIAP 2017 Sebastiano Battiato, Giovanni Gallo, Raimondo Schettini, Filippo Stanco, 2017-10-13 The two-volume set LNCS 10484 and 10485 constitutes the refereed proceedings of the 19th International Conference on Image Analysis and Processing, ICIAP 2017, held in Catania, Italy, in September 2017. The 138 papers presented were carefully reviewed and selected from 229 submissions. The papers cover both classic and the most recent trends in image processing, computer vision, and pattern recognition, addressing both theoretical and applicative aspects. They are organized in the following topical sections: video analysis and understanding; pattern recognition and machine learning; multiview geometry and 3D computer vision; image analysis, detection and recognition; multimedia; biomedical and assistive technology; information forensics and security; imaging for cultural heritage and archaeology; and imaging solutions for improving the quality of life.

Artificial Intelligence Research and Development L. Museros, O. Pujol, N. Agell, 2014-10-10 This book presents 34 original papers accepted for presentation at the 17th International Conference of the Catalan Association for Artificial Intelligence (CCIA 2014), held in October 2014 in Barcelona, Spain. The Catalan Association for Artificial Intelligence (ACIA), was created in 1994 as a non-profit association to promote cooperation among researchers from the Catalan-speaking artificial intelligence research community. Conferences are now held annually throughout the Catalan-speaking countries. The papers in this volume have been organized around different topics, providing a representative sample of the current state-of-the-art in the Catalan artificial intelligence community and of the collaboration between ACIA members and the worldwide AI community. The book will be of interest to all those working in the field of artificial intelligence.

Producing Online News Ryan Thornburg, 2010-10-27 Buy your copy now and pay only \$5 for shipping!* (Use code C9BRGG when checking out. Applies only to orders in the US/Canada.) Follow the author's blog at <http://www.producingonlinenews.com>! The dazzling speed of change in online journalism can mask a simple truth: online news is still news. Cutting-edge technology benefits the audience only when journalists apply it in the service of good stories. Building on a foundation of news stories, Producing Online News shows students how to use the right tools to get the right information to the right people at the right time. The goal is to become a full-fledged online news producer and transform stories into a complete news experience for an ever more demanding audience. Ryan Thornburg, a journalism trainer who has managed the websites of top news organizations, hones the skills students need to produce stories using multimedia, interactivity and on-demand delivery- online journalism's three pillars. Practical instructions show students not just how to use the tools but also how to make good journalistic choices in applying them. The book works for courses specifically in online journalism or for any journalism course that incorporates multiple platforms. Features that make for stronger stories: TOOLS sections walk students through the latest technology- Twitter, Wordpress, Audacity, Caspio, Dipity and more- so their writing gains more immediacy and impact. Real-world examples from both traditional outlets and new-style sites like ProPublica, PolitiFact, BeliefNet and Global Voices showcase journalists connecting with their audiences. View Source boxes uncover the technology behind a specific news project- for example, how do just five editors at Yahoo News publish 2,000 stories a day? News Judgement boxes explore journalistic

choices- sure, students can link a story to anything on the web- but should they?

New Trends in Disruptive Technologies, Tech Ethics and Artificial Intelligence Daniel H. de la Iglesia, Juan F. de Paz Santana, Alfonso J. López Rivero, 2022-08-27 This book provides a forum for experts to present their latest research in disruptive technologies, promoting knowledge transfer. Due to the important advances in technologies such as artificial intelligence, big data, the Internet of things, or bioinformatics produced in recent years, it is necessary to conduct a thorough review of current ethical patterns. One of the research fields that is in full expansion and with a broad future is technology ethics or tech ethics. Just a few years ago, this type of research was a small part, and they did not have too many technology researchers involved. At present, due to the explosion of new applications of artificial intelligence, their problems and their legal barriers have flourished innumerable initiatives, declarations, principles, guides, and analyses focused on measuring the social impact of these systems and on the development of a more ethical technology. It is, therefore, a problem that needs to be addressed from an academic and multidisciplinary point of view, where experts in ethics and behavior work together with experts in new and disruptive technologies. The international conference “Disruptive Technologies Tech Ethics and Artificial Intelligence” (DITTET 2022) provides a forum to present and discuss the latest scientific and technical advances and their implications in the field of ethics. It provides a unique opportunity to bring together experts in different fields, academics, and professionals to exchange their experience in the development and deployment of disruptive technologies, artificial intelligence, and their ethical problems.

MatConvNet Deep Learning and iOS Mobile App Design for Pattern Recognition: Emerging Research and Opportunities Wu, Jiann-Ming, Tien, Chao-Yuan, 2020-04-17 Deep learning has become a trending area of research due to its adaptive characteristics and high levels of applicability. In recent years, researchers have begun applying deep learning strategies to image analysis and pattern recognition for solving technical issues within image classification. As these technologies continue to advance, professionals have begun translating this intelligent programming language into mobile applications for devices. Programmers and web developers are in need of significant research on how to successfully develop pattern recognition applications using intelligent programming. **MatConvNet Deep Learning and iOS Mobile App Design for Pattern Recognition: Emerging Research and Opportunities** is an essential reference source that presents a solution to developing intelligent pattern recognition Apps on iOS devices based on MatConvNet deep learning. Featuring research on topics such as medical image diagnosis, convolutional neural networks, and character classification, this book is ideally designed for programmers, developers, researchers, practitioners, engineers, academicians, students, scientists, and educators seeking coverage on the specific development of iOS mobile applications using pattern recognition strategies.

Pro's Guide to iPhoneography Robert Morrissey, 2015-08-11 The iPhone is revolutionizing photography. Never before has a camera been so portable yet powerful, so versatile and ubiquitous. Yet, as this book shows, this amazing device has untapped potential for taking jaw-droppingly detailed, sharp, professional-quality images. In this book, commercial photographer Robert Morrissey investigates the photographic capabilities of the iPhone, right out of the box, then moves to advanced uses that will surprise even seasoned photographers. Starting with the basics, Morrissey teaches readers critical strategies for taking great pictures—from how to properly hold your phone, to how and why to use the flash. You'll learn simple ideas for improving your photos—from crafting a strong composition to posing subjects for flattering results. Next, you'll learn to use the iPhone's panoramic and HDR features to take your imaging to the next level. You'll also get some great insights into how to photograph action, scenes with non-average tones, landscapes,

and much more—with natural light and flash.

*Brain-Inspired Cognitive Architectures for Artificial Intelligence: BICA*AI 2020* Alexei V. Samsonovich, Ricardo R. Gudwin, Alexandre da Silva Simões, 2020-12-08 The book focuses on original approaches intended to support the development of biologically inspired cognitive architectures. It bridges together different disciplines, from classical artificial intelligence to linguistics, from neuro- and social sciences to design and creativity, among others. The chapters, based on contributions presented at the Eleventh Annual Meeting of the BICA Society, held on November 10-14, 2020, in Natal, Brazil, discuss emerging methods, theories and ideas towards the realization of general-purpose humanlike artificial intelligence or fostering a better understanding of the ways the human mind works. All in all, the book provides engineers, mathematicians, psychologists, computer scientists and other experts with a timely snapshot of recent research and a source of inspiration for future developments in the broadly intended areas of artificial intelligence and biological inspiration.

Studies in Temporal Urbanism Fabian Neuhaus, 2011-08-04 This book is very much about what the name urbanTick literally says, about the ticking of the urban, the urban as we experience it everyday on the bus, in the park or between buildings. It is about the big orchestrated mass migration of commuters, the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish-eater-trucks. It is also, not to forget, about climate, infrastructure, opening hours, term times, parking meters, time tables, growing shadows and moon light. But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns. The content of this book is based on the content of the urbanTick blog between 2008-2010. One year blogging about this topic brought together a large collection of different aspects and thoughts. It is not at all a conclusive view, the opposite might be the case, it is an exploratory work in progress, while trying to capture as many facets of the topic as possible.

Impact of New Media in Tourism Dinis, Maria Gorete, Bonixe, Luís, Lamy, Sónia, Breda, Zélia, 2021-02-19 Tourism consumers are increasingly demanding and seek to base their travel decision-making process on relevant and credible tourism information. In recent years, user-generated content on social media, the opinion of travel bloggers, and entertainment programs in the media have influenced the public's travel purchasing behavior and acted as a driving force for the development of tourism products, such as film tourism. It also has played a role in the evolution and development of marketing, giving rise to new applications, as in the case of digital and influence marketing. On the other hand, tourism organizations and destination management organizations face major challenges in communicating the attributes of a tourism product, since this cannot be experienced before consumption. Thus, they need to know how and in which means or platforms of communication they can inform potential consumers. Impact of New Media in Tourism provides

theoretical and practical contributions in tourism and communication including current research on the influence of new media and the active role of consumers in tourism. With a focus on decision making and increasing the visibility of products and destinations, the book provides support for tourism agencies and organizations around the world. Covering themes that include digital marketing, social media, and online branding, this book is essential for professionals, academicians, researchers, and students working or studying in the field of tourism and hospitality management, marketing, advertising, and media and communications.

The Brand Bubble John Gerzema,Edward Lebar,2008-11-03 How to use brands to gain and sustain competitive advantage Companies today face a dilemma in marketing. The tried-and-true formulas to create sales and market share behind brands are becoming irrelevant and losing traction with consumers. In this book, Gerzema and LeBar offer credible evidence--drawn from a detailed analysis of a decade's worth of brand and financial data using Y&R's Brand Asset Valuator (BAV), the largest database of brands in the world--that business is riding on yet another bubble that is ready to burst--a brand bubble. While most managers still see metrics like trust and awareness as the backbone of how brands are built, Gerzema asserts they're dead wrong--these metrics do not add to increased asset value. In fact, by following them, they actually hasten the declining value of their brands. Using a five-stage model, The Brand Bubble reveals how today's successful brands--and tomorrow's--have an insatiable appetite for creativity and change. These brands offer consumers a palpable sense of movement and direction thanks to a powerful energized differentiation. Gerzema reveals how brands with energized differentiation achieve better financial performance than traditional brands have. Plus, Gerzema helps readers develop energized differentiation in their own brands, creating consumer-centric and sustainable organizations.
