*Draught Surveys* W. Jim Dibble, Peter Mitchell, 2009 The accurate measurement of dry bulk cargoes by a vessel can minimise considerably the risk of shortage claims and disputes. This guide outlines the methods and corrections for a draught survey to be carried out to the required accuracy. It includes UN ECE draught survey forms in an effort to achieve standardisation throughout the industry.

Reeds Vol 13: Ship Stability, Powering and Resistance Jonathan Ridley, Christopher Patterson, 2021-08-05 This indispensable guide to ship stability covers essential topics such as flotation and buoyancy, small angle, large angle and longitudinal stability, water density effects, bilging, ship resistance, and advanced hydrostatics. Each chapter has a comprehensive list of aims and objectives at the start of the topic, followed by a checklist at the end of the topic for students to ensure that they have developed all the relevant skills before moving onto the next topic area. The book features over 170 worked examples with fully explained solutions, enabling students to work through the examples to build up their knowledge and develop the necessary key skills. The worked examples, which range in difficulty from very simple one-step solutions to SQA standard exam questions and above, are predominantly based on a hypothetical ship. The reader is supplied with extracts from a typical data book for the ship which replicates those found on actual ships, enabling the reader to develop and practise real-life skills. This edition has been fully updated in line with the recently changed rules and regulations around ship stability and the updated national exam syllabus. Updates include corrections and clarifications to worked examples, new text on damaged stability and probabilistic stability, extra content on hydrostatic forces and centres of pressure, and extra content on stability information for small craft.

**Bulk Cargo** Peter Grunau, 2016-12-14 The book is a guide for loading, unloading and stowage of solid bulk cargoes. It describes the common practices preparing the vessel for loading and unloading of bulk cargoes and distribution of the cargo. The practice of preparing a loading/unloading plan including de-ballasting and ballasting operation is, as well as the description of the draught survey, part of the book. Finally the common practice for loading grain cargoes, the calculation of the residual area and the mandatory requirements if loading for the US or in ports of the US, is described. Additional to the loading/unloading requirements a detailed description how to prepare a voyage plan including risk assessment if transporting bulk cargoes is included. The book should be an assistance for the ship command for a better and easier understanding of carrying bulk cargoes.

A Draught of the South Land Paul Moon, 2023-08-31 The story of how the map of New Zealand emerged is a fascinating one. The first full map of the continent was published in London in 1773, which might seem the natural starting point, but over the preceding 150 years, fragments of charts and intelligence about New Zealand ricocheted around various parts of the world. In *A Draught of the South Land*, Paul Moon provides the first comprehensive account of this piecemeal process. Moon's investigation covers several continents over more than a century, and reveals the personalities, blunders, strategic miscalculations, scientific brilliance, and imperial power-plays that were involved. Above all, he examines the roles played by explorers and traders, Māori and European rulers, scientific societies and military groups, as well as specialist cartographers and publishers. At a time when maps as colonial tools, enablers of trade and objects of curiosity are being studied anew, his careful analysis and engaging narrative will be of interest to scholars everywhere.
