Jungalow: Decorate Wild Justina Blakeney,2021-04-06 From Justina Blakeney, the ultimate guide to designing wildly creative interiors that are free-spirited, layered, and deeply personal Justina Blakeney’s new book is her biggest, boldest, and most beautiful volume yet, filled with irresistible style, original patterns, and artwork—lushly photographed by Dabito. In each chapter, Justina shares her distinctive point of view on everything design fans want to know—how to make bold choices with color and pattern, how to take cues from nature, how to authentically glean inspiration from their heritage and travels, how to break rules, and all the other paths to truly begin to decorate wild. Along the way, Justina also shares personal narratives, practical advice, and nuanced insight into how she lives in her own space—how she reconnects with nature, how she plays and stays inspired, how she gives herself permission to feel free and wild, and how readers can do the same. Jungalow is the term coined by Justina for the brand that embodies her wild, but cozy and homey, style. Copycats abound, but there is no other book like this one—offering Justina’s authentic, encouraging voice and approachable, signature style.

Movies (And Other Things) Shea Serrano,2019-10-08 INSTANT #1 NEW YORK TIMES BESTSELLER WALL STREET JOURNAL BESTSELLER BARNES & NOBLE BESTSELLER AMAZON BESTSELLER Paging through Serrano's *Movies (and Other Things)* is like taking a long drive at night with a friend; there's that warmth and familiarity where the chat is more important than the fastest route from Point A to Point B...It's like a textbook gone right; your attention couldn't wander if it tried. -- Elisabeth Egan, New York Times Book Review Shea Serrano is back, and his new book, *Movies (And Other Things)*, combines the fury of a John Wick shootout, the sly brilliance of Regina George holding court at a cafeteria table, and the sheer power of a Denzel monologue, all into one. *Movies (And Other Things)* is a book about, quite frankly, movies (and other things). One of the chapters, for example, answers which race Kevin Costner was able to white savior the best, because did you know that he white saviors Mexicans in *McFarland, USA*, and white saviors Native Americans in *Dances with Wolves*, and white saviors Black people in *Black or White*, and white saviors the Cleveland Browns in *Draft Day*? Another of the chapters, for a second example, answers what other high school movie characters would be in Regina George's circle of friends if we opened up the Mean Girls universe to include other movies (Johnny Lawrence is temporarily in, Claire from *The Breakfast Club* is in, Ferris Bueller is out, Isis from *Bring It On* is out...). Another of the chapters, for a third example, creates a special version of the Academy Awards specifically for rom-coms, the most underrated movie genre of all. And another of the chapters, for a final example, is actually a triple chapter that serves as an NBA-style draft of the very best and most memorable moments in gangster movies. Many, many things happen in *Movies (And Other Things)*, some of which funny, others of which are sad, a few of which are insightful, and all of which are handled with the type of care and dedication to the smallest details and pockets of pop culture that only a book by Shea Serrano can provide.

The Truck Simulator - Craig Luxmoore,2011 There has been a lot written about trucks and truck drivers and how difficult they can make driving for the average person. This raises the question 'do they get sufficient training before they are let loose on an unsuspecting public?' In many cases the answer is a resounding 'No'. So what's being done about it? In many countries the answer is very little but, however, there may be a solution in the Truck Simulator. This book seeks to raise some awareness about the simulator in New Zealand. At the time of initial publication of the thesis this is based around there were no dedicated truck simulators in New Zealand and this research looked at the possibility of one being imported and how it might affect the training paradigm in New Zealand. The simulator in question has now arrived and has opened up the opportunity for further evaluation as to it's effectiveness.

How to Talk about Videogames Ian Bogost,2015-11-15 Videogames! Aren't they the medium of the twenty-first century? The new cinema? The apotheosis of art and entertainment, the realization of Wagnerian gesamtkunstwerk? The final victory of interaction over passivity? No, probably not. Games are part art and part appliance, part tableau and part toaster. In *How to Talk about Videogames*, leading critic Ian Bogost explores this paradox more thoroughly than any other author to date. Delving into popular, familiar games like Flappy Bird, Mirror's Edge, Mario Kart, Scribblenauts, Ms. Pac-Man, FarmVille, Candy Crush Saga, Bully, Medal of Honor, Madden NFL, and more, Bogost posits that videogames are as much like appliances as they are like art and media. We don't watch or read games like we do films and novels and paintings, nor do we perform them like we might dance or play football or Frisbee. Rather, we do something in-between with games. Games are devices we operate, so game critique is both serious cultural currency and self-parody. It is about figuring out what it means that a game works the way it does and then treating the way it works as if it were reasonable, when we know it isn't. Noting that the term games criticism once struck him as preposterous, Bogost observes that the idea, taken too seriously, risks balkanizing games writing from the rest of culture, severing it from the “rivers and fields” that sustain it. As essential as it is, he calls for its pursuit to unfold in this spirit: “God save us from a future of games critics, gnawing on scraps like the zombies that fester in our objects of study.”

The Multi-Agent Transport Simulation MATSim Andreas Horni,Kai Nagel,Kay W. Axhausen,2016-08-10 The MATSim (Multi-Agent Transport Simulation) software project was started around 2006 with the goal of generating traffic and congestion patterns by following individual synthetic travelers through their daily or weekly activity programme. It has since then evolved from a collection of stand-alone C++ programs to an integrated Java-based framework which is publicly hosted, open-source available, automatically regression tested. It is currently used by about 40 groups throughout the world. This book takes stock of the current status. The first part of the book gives an introduction to the most important concepts, with the intention of enabling a potential user to set up and run basic simulations. The second part of the book describes how the basic functionality can be extended, for example by adding schedule-based public transit, electric or autonomous cars, paratransit, or within-day replanning. For each extension, the text provides pointers to the additional documentation and to the code base. It is also discussed how people with appropriate Java programming skills can write their own extensions, and plug them into the MATSim core. The project has started from the basic idea that traffic is a consequence of human behavior, and thus humans and their behavior should be the starting point of all modelling, and with the intuition that when simulations with 100 million particles are possible in computational physics, then behavior-oriented simulations with 10 million travelers should be possible in travel behavior research. The initial implementations thus combined concepts from computational physics and complex adaptive systems with concepts from travel behavior research. The third part of the book looks at theoretical concepts that are able to describe important aspects of the simulation system; for example, under certain conditions the code becomes a Monte Carlo engine sampling from a discrete choice model. Another important aspect is the interpretation of the MATSim score as utility in the microeconomic sense, opening up a connection to benefit cost analysis. Finally, the book collects use cases as they have been undertaken with MATSim. All current users of MATSim were invited to submit their work, and many followed with sometimes crisp and short and sometimes longer contributions, always with pointers to additional references. We hope that the book will become an invitation to explore, to build and to extend agent-based modeling of travel behavior from the stable and well tested core of MATSim documented here.

The Transgressionists and Other Disquieting Works Giorgio De Maria,2022-07-12 A disturbing, unsettling novel . . . if it had been published in English soon after its first appearance in Italian (1968), the name of Giorgio De Maria would be well-known, his novels and stories mentioned in the context of J.G. Ballard, Anna Kavan, Shirley Jackson or Robert Aickman.—Lisa Tuttle, Nebula Award winner and author of Gabriel, Windhaven, and The Curious Affair of the Witch at Wayside Cross. Before an untimely mental breakdown cut short his two-decade career, Giorgio De Maria distinguished himself as one of Italy's most unique and eccentric weird fiction masters. With a background in the post-war literary culture of Turin -- Italy's urbane but eerie city of black magic -- De Maria drew inspiration from the Turinese underbelly of occultism, secret societies and radical politics. His writing coincided with the decade of terrorist violence known to Italians as the Years of Lead; the outcome was a weird fiction suffused with panic, rage, trauma, paranoia and meditations on antisocial hubris. In 1978, he told an interviewer: ...I think that the dimension of the fantastic, as much as this may seem paradoxical, is the most fitting one to express a reality as complex as ours today. De Maria's debut novel, The Transgressionists (1968) portrays a cell of malicious telepaths who meet in the cafés and jazz clubs of 1960s Turin to plot world domination. After experiencing the worst of their power, an embittered office clerk resolves to join them and prove himself worthy to share in their villainy. He cultivates twisted mindfulness techniques to awaken his inner sociopath. He fights off predatory phantoms that seem maddeningly drawn to him. He prepares for the dangerous Great Leap which will make him into a fully-fledged Transgressionist. But could his megalomania strain relations with his fiancée? Will he sacrifice love in his quest for omnipotence? The other works in this volume are no less surreal and startling. The Secret Death of Joseph Dzhughashvili (1976) gives us a nightmarish fantasy Soviet Union, where a dissident poet finds himself trapped in a psychological experiment conducted by Stalin himself. In The End of Everydayism, a group of futuristic artists begin using corpses as a medium -- with violent, unforeseen results. The antihero of General Trebisonda is a possibly insane commander who prepares for a war crime in an eerily deserted fortress. Available in English for the first time, this collection contains two novellas, two short stories and a dystopian teleplay, The Appeal, which the post-cyberpunk novelist Andrea Vaccaro has lauded as worthy of the best episodes of Black Mirror. Meanwhile, an introduction by translator Ramon Glazov offers a detailed account of De Maria's background, creative context and thoroughly unusual life.

The World Is Born From Zero Cameron Kunzelman,2022-07-18 The World is Born From Zero is an investigation into the relationship between video games and science fiction through the philosophy of speculation. Cameron Kunzelman argues that the video game medium is centered on the evaluation and production of possible futures by following video game studies, media philosophy, and science fiction studies to their furthest reaches. Claiming that the best way to understand games is through rigorous formal analysis of their aesthetic strategies and the cultural context those strategies emerge from, Kunzelman investigates a diverse array of games like The Last of Us, VA-11 Hall-A, and Civilization VI in order to explore what science fiction video games can tell us about their genres, their ways of speculating, and how the medium of the video game does (or does not) direct us down experiential pathways that are both oppressive and liberatory. Taking a multidisciplinary look at these games, The World is Born From Zero offers a unique theorization of science fiction games that provides both science fiction studies and video game studies with new tools for thinking how this medium and mode inform each other.
