**The Flat Earth Report** Tim Ozman,2017-06-17 THE FLAT EARTH REPORT

2nd Earth 2 Edward Vought,Eunice Vought,2015-10-03 Jon and the other members of their settlement family are awakened by calls for help from the other groups. What they find is more than they were expecting. We have a radio downstairs, as well as the one upstairs and we are starting to get calls from some of the men in our group, telling us they are okay, but that was a close one. We are also getting calls from the other groups telling us that they ran into the same thing we did when they started to go to the Docs aid. While we are talking, trying to figure out what is happening; a voice comes over the radio that I have never heard before. He is telling us that we are surrounded and have no recourse, but to surrender. He tells us if we do that, he will allow us to take our personal belongings and leave. That is everyone except the women they decide to keep. The voice tells us that they intentionally fired not to hit the men the first time, but from now on they will shoot to kill if they see anyone or if we try to resist. Join Jon, Dayna, and the others as they continue to meet the challenges of living in a world where the only law is what they can enforce. Previously published under a two-parter 2nd Earth, now it two books: Shortfall and Emplacement.

Left behind on the moon with a handful of desperate survivors and dwindling resources, Tess Robinson, a rising star in NASA with a troubled past, is thrust into a position where she must make peace with her ghosts if they are to survive. Now, in a frantic race against time and unimaginable odds, they must return to the broken earth if they hope to make the journey to Europa; but they must survive not only the final destructive forces unleashed on the planet, but the barbaric survivors they left behind. The Oversoul has done its job well. There is no war on Harmony. There are no weapons of mass destruction. There is no technology that could lead to weapons of war. By control of the data banks, and subtle interference in the very thoughts of the people, the artificial intelligence has fulfilled its mission. But now there is a problem. Earth Two J. A. Oquelly,2016-01-16 It is the middle of the twenty first century - 2053 AD. Planet Earth's environment is dangerously unstable and

seriously unpredictable. Our world has reached maximum capacity in its ability to support the overpopulation of human kind. The planet is functioning at maximum. The world's united governments and private establishments are desperately organizing and finalizing the necessary emergency preparations in an attempt to relocate humans off the planet to recently constructed orbiting biospheres on the adjacent planets including their assigned moons. Will mankind succeed and prevent the collapse of Earth? Because time is critically short. Or will another source intervene? Could it be realistic for one to consider that an extraterrestrial civilization has been monitoring our behavior for centuries from a distant system? And if this alien confederacy is not pleased will they hold our civilization accountable for the planet's deteriorating state? If that is the case what possible strategies could they have for our world and its species? In this isolated solar system of the Milky Way only time will reveal what is to come. But wait! There are presently alarming intelligence reports indicating the presence of strange unidentified flying objects in the skies above Earth. There is panic everywhere and the message is: The aliens are coming.

Some scientists uplift entire cities into the sky above the disaster, others build undersea colonies, while some look to space. A few delve into the darkness of genetic modification and try to evolve a new species of humanity. Now, over two centuries have passed since the day that changed the world. Many global trade routes have resumed, and it is an age of discovery ... and danger. Brave airship crews explore the sky wilderness between the aerial metropolises, connecting more of the floating cities. Threats lurk in the skies as well as the ruins scattered around the world like half-forgotten memories. These are the last cities of Earth.
