Hybrid Organic-Inorganic Interfaces Marie Helene Delville, Andreas Taubert, 2017-12-04 Hybrid

organic-inorganic materials and the rational design of their interfaces open up the access to a wide spectrum of functionalities not achievable with traditional concepts of materials science. This innovative class of materials has a major impact in many application domains such as optics, electronics, mechanics, energy storage and conversion, protective coatings, catalysis, sensing and nanomedicine. The properties of these materials do not only depend on the chemical structure, and the mutual interaction between their nano-scale building blocks, but are also strongly influenced by the interfaces they share. This handbook focuses on the most recent investigations concerning the design, control, and dynamics of hybrid organic-inorganic interfaces, covering: (i) characterization methods of interfaces, (ii) innovative computational approaches and simulation of interaction processes, (iii) in-situ studies of dynamic aspects controlling the formation of these interfaces, and (iv) the role of the interface for process optimization, devices, and applications in such areas as optics, electronics, energy and medicine.

The Nurse Practitioner in Urology Michelle Lajiness, Susanne Quallich, 2016-05-02 This book is designed to meet the needs of nurse practitioners, advanced practice nurses and also physician assistants, working in urology. The full range of domains of practice is covered, including assessment and diagnosis, clinical management, nurse practitioner and patient relationships, consultation, health promotion and disease prevention, and practice management and research. Some background knowledge is assumed regarding the normal anatomy and physiology of the genitourinary system and the pathophysiology underlying specific urologic health-related problems. The Nurse Practitioner in Urology will be invaluable in ensuring that the nurse practitioner is able to maintain exemplary management of patients with acute and chronic urologic conditions in a wide variety of settings, including independent practices, hospitals, and academic urologic practices. It explains fully the role

of the nurse practitioner as a skilled clinician in urology, blending nursing and medical management and capable of managing many chronic nonoperative urologic conditions while recognizing those conditions which may benefit from surgical management. As populations continue to age worldwide, there is no doubt that the provision of advanced urologic care by nurse practitioners is an area that will continue to expand, benefiting from additional training and expertise.

Assessment Strategies for Online Learning Dianne Conrad, Jason Openo, 2018-07-15

Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

Advancing Equity and Achievement in America's Diverse Schools Camille M. Wilson, Sonya Douglass Horsford, 2013-09-05 *Advancing Equity and Achievement in America's Diverse Schools* illustrates how educators, students, families and community partners can work in strategic ways to build on social, cultural, and ethnic diversity to advance educational equity and achievement. By drawing on the latest data on demographic change, constructions of culture and cultural difference, and the politics of school reform in urban, rural, and suburban school communities, this volume looks toward solutions and strategies for meaningful educational improvement. Contributors consider both the diversity of youth and families served in public schools, and the culture of U.S. schooling, highlighting the influence of policy and reform agendas; students' identities and agency; experiences and approaches of diverse educators; and the workings of effective school partnerships. Chapters also focus on those often overlooked in educational scholarship such as Native Americans, students experiencing poverty and/or homelessness, Muslim students, students with special needs, and students and educators who are lesbian, gay, bisexual, transgender, intersex, or queer. In all, this edited collection stresses the need for high quality education that is inclusive, culturally responsive and unifying so all students can experience academic success. This book is a meaningful resource for educators, policymakers, and community-based leaders interested in doing such transformative work.

Revisiting Integrated Water Resources Management Cecilia Tortajada, 2017-10-02 The book includes seventeen excellent researched and documented papers that reflect the diversity of thought, ideas and experiences related to IWRM. They draw from an extensive, inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local, basin, regional and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal,

policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation and the reasons why that has been the case; reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery; and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the International Journal of Water Resources Development.
