**Facebook as a Communicational Tool in Romantic Relationships of European and North American Adolescents and Young Adults** Max Korbmacher,2018-02-01 Bachelor Thesis from the year 2017 in the subject Communications - Interpersonal Communication, grade: 1.7, University of Bremen (Department of Sociology), course: B.A. Sociology, language: English, abstract: A relatively small amount of research addresses romantic relationship communication on Facebook. However, the aim of this literature review was to conclude current research about romantic relationship communication of European and North American adolescents and young adults on Facebook. Communication behaviours were observed in Knapp's (1978) three relational stages: formation, maintenance, and dissolution. Facebook was found to be a significant communicational tool for adolescents and young adults in romantic relationships. Findings displayed that not only communication between partners but also between couple and network influence relationship outcomes. The availability of information can lead to dialectical struggles between relationship partners (Baxter, 2011), and high levels of social control from romantic relationship partners' networks. A special importance of Facebook was found in the

relationship formation, where Facebook serves as the main tool to communicate and to gather information about potential and existing partners. Relationship maintenance on Facebook requires publications of relationship information. The frequency and importance of those publications depends on the relationship partners and their Facebook networks. No research has been conducted on relationship dissolutions on Facebook yet. Although, research on behaviours after the dissolution revealed that former partners cleared their profiles from information connected to ex-partners. Harassment and monitoring of ex-partners were also reported behaviours. More research is needed to provide sufficient evidence to validate the presented data. Additionally, only a small amount of research addresses the reliability of offline behaviour and links between offline and online behaviour in the field of romantic relationships.

**Analysing Representations of Social Media in European News Media Discourse** Christine Develotte, Anthippi Potolia, Eija Suomela-Salmi, 2021-11-02 This book explores representations of social media in European media discourses across different socio-historical contexts, demonstrating how such analysis can illuminate the tension between global and local in media discourses in today's globalised world. The volume draws on data from a trilingual corpus from different editions of the free daily Metro from Finland, France, and Greece spanning a five-year period, with a focus on Facebook and Twitter. Adopting a French discourse analysis approach, which takes as its point of departure the notion of "discourse as the social practice of representing", the book integrates qualitative and quantitative analyses to investigate the social and political role depictions of social media play in specific socio-historical contexts. This approach brings to the fore both commonalities and differences in the popularity of specific platforms and coverage of specific news topics and hot-button issues. In so doing, the volume elucidates the ways in which global practices become integrated and immersed into local contexts, offering avenues for future research on social media in news discourses. This book will be of interest to scholars in applied linguistics, intercultural communication, discourse analysis, media studies, and cultural studies.

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is actually astonishing.
