Bloomsbury CPD Library: Supporting Children with Special Educational Needs and Disabilities Cherryl Drabble,Bloomsbury CPD Library,2016-09-22

According to the most recent SEND Code of Practice, every teacher is a teacher of children with special educational needs and disabilities, and yet teachers often receive little or no training in this area. Despite their best intentions they are therefore often ill-equipped to rise to the challenge of helping their students achieve the best possible educational outcomes. This comprehensive resource will equip primary and secondary teachers and SENDCos with the training and skills they need to fully support children with SEND in mainstream classrooms. Cherryl Drabble draws on her vast experience as a CPD leader, NQT mentor and her many years of working with SEND to share guidance, practical activities and strategies for evaluating and strengthening your practice and that of your colleagues. The book provides a set of ready-to-use training plans, accompanied by PowerPoint slides available to download online for free, so you can train your colleagues in this essential area and ensure the best support possible for students with SEND across your school. In total, the book offers over 50 hours of CPD, equating to a cost of less than 50p per hour of training!

Popular Music in a Digital Music Economy Tim J. Anderson,2013-12-17 In the late 1990s, the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments, dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience, the end user, and their productive and distributive capacities around which services and musicians must orient their practices and investments.

How Not to Die Michael Greger, M.D., FACLM,Gene Stone,2015-12-08 From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America-heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more-and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, How Not to Die includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day.Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

The Little iTunes Book Bob LeVitus,2001 At the January 2001 Macworld Expo, Apple CEO Steve Jobs introduced iTunes, Apple's free digital music software. iTunes is a new application that offers the best way to manage digital music and burn custom CDs. With more than 275,000 copies downloaded the first week, it's clear that iTunes is a huge hit with the Macintosh community. For most users, managing their music collection on their hard disk, ripping MP3s from audio CDs, burning audio CDs, and finding music on the Web are all going to be new experiences. That's where The Little iTunes Book comes in. Readers will learn how to create MP3 files from audio CDs, listen to Internet radio stations, and search and browse their music collection. Once users have mastered the basics of this compelling new software, there will be no stopping them: they'll create custom playlists, use iTunes with portable MP3 players, and share music with friends and family.
