Learn Like a Pro Barbara Oakley PhD,Olav Schewe,2021-06-01 A book for learners of all ages containing the best and most updated advice on learning from neuroscience and cognitive psychology. Do you spend too much time learning with disappointing results? Do you find it difficult to remember what you read? Do you put off studying because it's boring and you're easily distracted? This book is for you. Dr. Barbara Oakley and Olav Schewe have both struggled in the past with their learning. But they have found techniques to help them master any material. Building on insights from neuroscience and cognitive psychology, they give you a crash course to improve your ability to learn, no matter what the subject is. Through their decades of writing, teaching, and research on learning, the authors have developed deep connections with experts from a vast array of disciplines. And it's all honed with feedback from thousands of students who have themselves gone through the trenches of learning. Successful learners gradually add tools and techniques to their mental toolbox, and they think critically about their learning to determine when and how to best use their mental tools. That allows these learners to make the best use of their brains, whether those brains seem "naturally" geared toward learning or not. This book will teach you how you can do the same.

The Crux Richard P. Rumelt,2022-05-03 Financial Times, Best Business Books of 2022 Forbes, Best Business Books of 2022 The Next Big Idea Club, Best Leadership Books of 2022 The Globe & Mail, Best Management Books of 2022 The paradigm-busting theory for doing strategy. What passes for strategy in too many businesses, government agencies, and military operations is a toxic mix of wishful thinking and a jumble of incoherent policies. Richard P. Rumelt's breakthrough concept is that leaders become effective strategists when they focus on challenges rather than goals, pinpointing the crux of their pivotal challenge—the aspect that is both surmountable and promises the greatest progress—and taking decisive, coherent action to overcome it. Rumelt defines the essence of the strategist's skill with vivid storytelling, from how Elon Musk found the crux that propelled the success of SpaceX to how the American military came to grips with the weaknesses of its battle strategy. Musk's core challenge, for example, was rocket reusability. His intense focus on the soft landing of SpaceX's rockets enabled them to be used again—radically reducing the cost of putting a pound in orbit. Musk's strategy was not based on how value is created or how to position SpaceX in its industry. It was a design foraction, the mental maneuver that focuses energy on what really made a difference through understanding the crux and creating an effective response that led to breakthrough.
