Talking Texts Rosalind Horowitz, 2017-09-25 This volume examines how oral and written language function in school learning, and how oral texts can be successfully inter-connected to the written texts that are used on a daily basis in schools. Rather than argue for the prominence of one over the other, the goal is to help the reader gain a rich understanding of how both might work together to create a new discourse that ultimately creates new knowledge. Talking Texts: Provides historical background for the study of talk and text Presents examples of children's and adolescents' natural conversations as analyzed by linguists Addresses talk as it interfaces with domains of knowledge taught in schools to show how talk is related to and may be influenced by the structure, language, and activities of a specific discipline. Bringing together seminal lines of research to create a cohesive picture of discourse issues germane to classrooms and other learning settings, this volume is an essential resource for researchers, graduate students, classroom teachers, and curriculum specialists across the fields of discourse studies, literacy and English education, composition studies, language

development, sociolinguistics, and applied linguistics.

Categories in Text and Talk Georgia Lepper, 2000-08-02 `This is a very fine introduction to the tradition and practice of categorisation analysis, a method for analysing language derived from the work of Harvey Sacks. Georgia Lepper conveys with great effectiveness and simplicity the basic principles of this method, and enables the reader to apply it in practice. Through a series of practical exercises and worked examples, the reader is taken through the necessary steps to achieve full independence in practice of this important analytic method. A great deal of practical wisdom and experience has gone into this book, and it will undoubtedly be of great assistance to students and researchers seeking to apply this still innovative approach to qualitative data analysis` - Clive Seale, Goldsmiths College, University of London

`A stunning introduction to categorization analysis! Georgia Lepper is a master teacher and her book a major achievement. Sensibly organized, amply illustrated, and deftly instructive, this remarkably clear text is a pedagogical milestone in the area` - Jaber F Gubrium, University of Florida This is the first practical book on how to apply Harvey Sacks` membership categorization analysis` technique, an increasingly influential method for

conversation analysis. Categorization analysis is a method for the study of situated social action and offers a complementary method to the traditional sequential analysis used in the study of naturally occurring talk and text. The author provides an understanding of the concepts through an analysis of data samples and a series of exercises. Later chapters discuss the application to a variety of disciplines. Examples used to illustrate the approach include, talk, text and images, narratives, stories and organizational settings. The practice of research is further elucidated in the use of an extended case study and the topics of reliability, validity and ethics are also covered. Additional features include suggested further readings at the end of each chapter and a glossary of terms. The book will be invaluable to students and beginning researchers in the disciplines of linguistics, sociology and anthropology, and other main users of conversational and narrative analysis methods, in cultural studies, ethnography, organization studies, discursive psychology and psychotherapy, who are seeking empirical methods for the study of the phenomena of everyday interaction. This book can be used as a companion volume to *Doing Conversation Analysis: A Practical Guide* also published in the *Introducing Qualitative Methods* series.

Action, Talk, and Text Gordon Wells, 2001 This book draws from six years of work by the Developing Inquiring Communities in Education Project (DICEP) to provide a range of practical, replicable methods for building collaborative communities, in which democratic principles of education may be realized. Recognizing that each classroom is unique in its makeup, its context, and its history, these seasoned teacher-researchers rely heavily on discourse, both spoken and written, to engage students in the active learning process. Their findings are striking and clear, and testify to the exciting potential that dialogic interaction and collaborative knowledge building have for the field of education. Key features of this book are: identification of appropriate research questions; real-life teaching strategies based on extensive hands-on experience in the field; and workable suggestions for facilitating inquiry-based learning and teaching.

Politics as Text and Talk Paul Chilton, Christina Schöffner, 2002-10-31 Human beings are political animals. They are also articulate mammals. How are these two aspects linked? This is a question that is only beginning to be explored. The present collection makes a contribution to the investigations into the use of language in those situations which, informally and intuitively, we

call 'political'. Such an approach is revealing not only for politics itself but also for the human language capacity. Each chapter outlines a particular method or analytic approach and illustrates its application to a contemporary political issue, institution or mode of political behaviour. As a whole, the collection aims to give a sample of current research in the field. It will interest those who are beginning to carry the research paradigm forward, as well as provide an introduction for newcomers, whether they come from neighbouring or remote disciplines or from none.

Talk and Text Angela Downing Rothwell,A. Jesús Moya Guijarro,José Ignacio Albentosa Hernández,Joaquín Garrido,Eija Ventola,Tomás González,Raquel Hidalgo,2000 This book reviews some current theories about the internal organization of written and oral discourse. The articles range from the theoretical to the highly practical, from the cognitive frameworks which make coherence in oral conversation to the structural and linguistic devices which create textuality in written language. Contextual issues such as ideology, topicality and topic management, thematicity and academic discourse are explored via a contemporary and authentic sample of written fragments and oral corpora. This accesible book

will be useful to advanced undergraduate and postgraduate students and to teachers interested in Language and Linguistics.

Transforming Talk into Text Thomas M. McCann, 2014-08-08

Author Thomas McCann invites readers to rethink their approach to teaching writing by capitalizing on students' instinctive desire to talk. Drawing on extensive classroom research, he shows teachers how to craft class discussions that build students' skills of analysis, problem-solving, and argumentation as a means of improving student writing. McCann demonstrates how authentic discussions immerse learners in practices that become important when they write. Chapters feature portraits of teachers at work, including transcripts that reveal patterns of talk across a set of lessons. Interviews with the teachers and samples of student writing afford readers a deeper understanding of process. Students also report on how classroom discussions supported their effort to produce persuasive, argument-driven essays.

education What can you learn on a cell phone? Almost anything! How does that concept fit with our traditional system of education? It doesn't. Best-selling author and futurist Marc Prensky's book of essays challenges educators to "reboot" and make the changes necessary to prepare students for 21st century careers and living. His "bottom-up" vision includes students' ideas about what they need from teachers, schools, and education. Also featured are easy-to-do, high-impact classroom strategies that help students acquire "digital wisdom." Text Messages John Tucker, 2017-12-06 Facebook. Twitter. Snapchat. We live in a rapidly changing world, a world that seems to be increasingly inhospitable toward preaching. In the face of digital technology, social media, cultural pluralism, and pastoral burnout, how can Christian preachers proclaim the gospel faithfully and effectively? This book answers that question by bringing together a selection of important voices from across North America, Asia, and the Pacific. It argues that Spirit-empowered preaching is

characterized by five attributes: it opens the Scriptures, engages the culture, addresses the listener, dissects the preacher, and elevates the Savior. With contributions from authors like William Willimon, Darrell Johnson, Lynne Baab, Robert Smith Jr., and Paul Windsor, this is an excellent resource for ordained ministers, lay preachers, theological students, and anyone wrestling with the challenge of preaching God's word in a smartphone world.

If you're itching to cut the copper cord with your costly, traditional phone service, you need *Talk is Cheap*, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and drawbacks of both technologies (including service offerings, quality, capabilities, completion rates, and more).Talk is Cheap then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones.A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone.
