Liquifying other fossil fuels and biofuels cannot make up for future petroleum shortfalls given a world population at sustainable food limits, with present GDP levels. Digital Business and Sustainable Development Yongrok Choi,2017-03-16 The Internet has ushered in a new era in the economies of networking. With the increasing need for optimization based on these network economies, the IT-based e-business has become a platform for study as well as daily practice. In a similar vein, global warming has raised many issues which come into conflict with traditional research and policies. The Internet revolution has also shifted our society from a government- and company-led economy to a 'netizen'- and consumer-led business world. This book enlightens us on why a harmonized participation of traditional network members or interested groups is necessary and how we can create values from diverse fields of interests and objectives, including the corporate social responsibility (CSR) and eco-friendly productivity. Digital Business and Sustainable Development integrates the platforms from these two fields of study based on the comparative analysis of Asian and other developing countries.

Management Enabling the Future Internet for Changing Business and New Computing Services Choong Seon Hong,Toshio Tonouchi,Yan Ma,Chi-Shih Chao,2009-09-19 We are delighted to present the proceedings of the 12th Asia-Paci?c Network Operations and Management Symposium (APNOMS 2009), which was held in Jeju, Korea, during September 23–25, 2009. Recently, various convergences in wired and wireless networks, and conv- gence of telecommunications and broadcastings, are taking place for ubiquitous multimedia service provisioning. For example, broadband IP/MPLS wired n- works are actively converged with IEEE 802.11e wireless LAN, IEEE 802.16 Wireless MAN, 3G/4G wireless cellular networks, and direct multimedia bro- cast (DMB) networks. For e?cient support of service provisioning for ubiq- tous multimedia services on the broadband convergencenetworks, well-designed and implemented network operations and management functions with Q- guaranteed tra?c engineering are essential. The converged network will open the way for a new world with emerging new businesses and computing services. Campus Cinephilia in Neoliberal South Korea Josie Jung Yeon Sohn,2022-05-16 Taking a

transnational approach to the study of film culture, this book draws on ethnographic fieldwork in a South Korean university film club to explore a cosmopolitan cinephile subculture that thrived in an ironic unevenness between the highly nationalistic mood of commercial film culture and the intense neoliberal milieu of the 2000s. As these time-poor students devoted themselves to the study of film that is unlikely to help them in the job market, they experienced what a student described as 'a different kind of fun', while they appreciated their voracious consumption of international art films as a very private matter at a time of unprecedented boom in the domestic film industry. This unexpectedly vibrant cosmopolitan subculture of student cinephiles in neoliberal South Korea makes the nation's film culture more complex and interesting than a simple nationalistic affair.
