A Night at the Gardens Russell Field, 2023-04-28 When Toronto's Maple Leaf Gardens opened in 1931, manager Conn Smythe envisioned an arena that would project an aura of middle-class respectability. In *A Night at the Gardens*, Russell Field shares how this new arena anticipated spectators by examining varying spectator behaviours, who the spectators were, and what the experience of spectating was like. Drawing on archival records, the book explores the neighbourhood in which Maple Leaf Gardens was situated, the design of the arena's interior spaces, and the ways in which the venue was operated in order to appeal to respectable spectators at a particular intersection of class and gender. Oral history interviews with former spectators at Maple Leaf Gardens detail the experience of watching the spectacle that unfolded on the ice during each hockey game. *A Night at the Gardens* tells the fascinating story of how one prominent public building became such an important part of Toronto society.

Public Opinion and the Political Future of the Nation's Capital Edward M. Meyers, 1996-06-01 Despite widespread agreement that the District of Columbia's political system has collapsed, there is a serious lack of thoughtful proposals addressing the political future of the nation's capital. In this book, Edward M. Meyers examines the opinions of average Americans about Washington, D.C., in order to understand how many Americans are likely to approach the question of what reforms are needed. Meyers first explores the political, economic, and social conditions of the District, providing an informed context for understanding and evaluating its political options. Presenting the results of in-depth qualitative research with focus groups held across the country, Meyers reveals that regardless of the participants' knowledge about the District, their beliefs in six basic concepts or schemata—such as respect for democratic rights, attitudes about race, and aversion to an intrusive federal government—molded their opinions about various options for District self-governance. The book concludes with insights into the District by local and national political leaders, including OMB Director Alice Rivlin, Jesse Jackson, Representatives Eleanor Holmes Norton, Thomas Davis, and James Walsh, and Marion Barry.

computation though this deferment may  
come at a computational cost so most  
quantum circuits depict a network  
consisting only of quantum logic  
gates and no measurements
