Dice Men Ian Livingstone, 2022-11-10 It never seems like the right time to start a business. The idea to start our own company first cropped up during one of our many 'beer and a board game' sessions after work at our flat. And when Steve began writing reviews of board games for Games & Puzzles magazine, we all got even more interested in the idea. So, one day, we did. It was January 1975. Since then, Games Workshop has grown into a cornerstone of the UK gaming industry. From the launch of Dungeons and Dragons from the back of a van, to creating the Fighting Fantasy series, co-founders Ian Livingstone and Steve Jackson tell their remarkable story for the first time. An initial order of only six copies was enough for Games Workshop to secure exclusive rights to sell Dungeons and Dragons in the whole of Europe. Hobbyists themselves, Steve and Ian's passion for the game soon spread and in 1977 they opened the first Games Workshop store. They went on to become bestselling authors and created an entirely new genre of interactive stories. Dice Men is more than just the story of an iconic shop which has changed gaming for ever, it's an insight into the birth of an industry. Games Workshop has grown from its humble beginnings to become a global company listed on the London Stock Exchange, a FTSE 250 company with a market capitalisation of more than £3.5 billion. Dice Men is the story of the rollercoaster early years.

Zones of Control Pat Harrigan, Matthew G. Kirschenbaum, 2016-04-15

Examinations of wargaming for entertainment, education, and military planning, in terms of design, critical analysis, and historical contexts. Games with military themes date back to antiquity, and yet they are curiously neglected in much of the academic and trade literature on games and game history. This volume fills that gap, providing a diverse set of perspectives on wargaming's past, present, and future. In Zones of Control, contributors consider wargames played for entertainment, education, and military planning, in terms of design, critical analysis, and historical contexts. They consider both digital and especially tabletop games, most of which cover specific historical conflicts or are grounded in recognizable real-world geopolitics. Game designers and players will find the historical and critical contexts

often missing from design and hobby literature; military analysts will find connections to game design and the humanities; and academics will find documentation and critique of a sophisticated body of cultural work in which the complexity of military conflict is represented in ludic systems and procedures. Each section begins with a long anchoring chapter by an established authority, which is followed by a variety of shorter pieces both analytic and anecdotal. Topics include the history of playing at war; operations research and systems design; wargaming and military history; wargaming's ethics and politics; gaming irregular and non-kinetic warfare; and wargames as artistic practice. Contributors Jeremy Antley, Richard Barbrook, Elizabeth M. Bartels, Ed Beach, Larry Bond, Larry Brom, Lee Brimmicombe-Wood, Rex Brynen, Matthew B. Caffrey, Jr., Luke Caldwell, Catherine Cavagnaro, Robert M. Citino, Laurent Closier, Stephen V. Cole, Brian Conley, Greg Costikyan, Patrick Crogan, John Curry, James F. Dunnigan, Robert J. Craft Communities Susan Luckman, Nicola Thomas, 2023-12-14 Craft Communities addresses the social groups, old and new, which have developed around craft production and consumption, exploring the social and cultural impact of contemporary practices of making. Addressing a wide range of crafting practice, from yarnbombs to Shetlands shawls, brassware to paper crafting, in a variety of regional and national contexts, the contributors consider how craft practices operate collectively in the home, communities, businesses, workshops, schools, social enterprises, and online. It further identifies how social media has emerged as a key driver of the 'Third Wave' of craft. From Etsy to Instagram, Twitter to Pinterest, online communities of the handmade are changing the way people buy and sell, make and meet.

Business Orchestration Johan Wallin, 2006-08-04 Digital convergence is redefining industries, and putting information, knowledge and collaboration at the heart of strategic leadership and management. In the face of such change it is those leaders who can 'orchestrate' a complex network of employees, customers and suppliers in a single ongoing learning experience that will succeed. Exploring four learning roles for customers (information acquirer; explorer; performer; inventor) and orchestrators (conductor; architect; auctioneer; promoter), Business Orchestration provides a strategic view of how to harness digital convergence by mobilizing and integrating the resources of other companies to create business value.

Feminist War Games? Jon Saklofske, Alyssa Arbuckle, Jon Bath, 2019-12-10
 Feminist War Games? explores the critical intersections and collisions between feminist values and perceptions of war, by asking whether feminist values can be asserted as interventional approaches to the design, play, and analysis of games that focus on armed conflict and economies of violence. Focusing on the ways that games, both digital and table-top, can function as narratives, arguments, methods, and instruments of research, the volume demonstrates the impact of computing technologies on our perceptions, ideologies, and actions. Exploring the compatibility between feminist values and systems of war through games is a unique way to pose destabilizing questions, solutions, and approaches; to prototype alternative narratives; and to challenge current idealizations and assumptions. Positing that feminist values can be asserted as a critical method of design, as an ideological design influence, and as a lens that determines how designers and players interact with and within arenas of war, the book addresses the persistence and brutality of war and issues surrounding violence in games, whilst also considering the place and purpose of video games in our cultural moment. Feminist War Games? is a timely volume that questions the often-toxic nature of online and gaming cultures. As such, the book will appeal to a broad variety of disciplinary interests, including sociology, education, psychology, literature, history, politics, game studies, digital humanities, media and cultural studies, and gender studies, as well as those interested in playing, or designing, socially engaged games.
