Global Business Strategy Hwy-Chang Moon,2010 Given the rise of Asia in the global economy in recent decades, it is important to understand the uniqueness of Asian business. This book first introduces the core strategies prevalent in Western business, and then explains how they can be applied or adapted to Asian business. When necessary, modified or new business models (as developed by the author) are utilized to better explain Asian business. Furthermore, this book deals not just with the theory, but also with practice. Several real-life case studies and examples are discussed in order to compare and contrast the Asian and Western perspectives on global business strategy. Readers will therefore gain an enhanced understanding of Asian business and formulation of Asian business strategy.

Democratizing Global Justice John S. Dryzek,Ana Tanasoca,2021-06-10 Justice and democracy can be mutually reinforcing in global governance, a domain where both are currently lacking.

Critical Global Semiotics Maureen Ellis,2019-10-08 Critical Global Semiotics: Understanding Sustainable Transformational Citizenship incorporates powerful unifying frameworks which make explicit a developing global consciousness. It explores transdisciplinary 'common wealth' through focus on multimodality, media, and metaphor, testing two universally applicable humanitarian frameworks: critical realism (CR) and systemic functional semiotics (SFS). Every day, global citizens encounter an overwhelming host of genres and sub-genres, emergent semantic triangles, evolving semiotic trinity. Embodying philosophy, incorporating active engagement, this book addresses the political economy and cultural politics of diverse domains. Challenging daily drama and performative dharma, 24 analysts from 13 countries present current issues in Anthropology, Architecture, Dance, Feminism, Film, Health, Law, Management, Medicine, Music, Politics, Pharmaceuticals, Sociology, Sustainability Education, and Urban Development. The book's integrative, unifying foundations will be of interest to researchers, academics, and post-graduate students in the fields of linguistics, semiotics, and critical realist philosophy, as well as to policy makers, curriculum developers, and civil society.

Visions for the Global Economy John R. Gagain Jr.,2012-08-06 Visions for the Global Economy explores a collection of global issues that are vital to every student of world affairs. It addresses key topics on the global stage, focusing on the foundational aspects of these global issues. It gets to the heart of diverse arguments that create roadblocks to progress in the global economy and combines current affairs with key turning

points in history. This guide examines topics of the global economy at their core, as each chapter traces the storyline of one issue. Global issues and the decisions world leaders make are complex; and there never is one clear reason as to why something exists or why something takes place. Visions for the Global Economy also considers economic growth, global economic governance, and political economy, providing a solid base for understanding the increasingly complex world today. The global economy has changed exponentially over the last decade and a half. Today, students cannot exclusively study politics or economics. They need to study both and have a good grasp of the political economy to succeed in today's world.

Towards a Global Polity Richard Higgott, Morten Ougaard, 2003-12-11 While 'one world government' is not on the cards, the globalization of political life has progressed significantly over the last decades. Rather than adding to existing theoretical frameworks such as the realist picture of international anarchy or the English School's 'international society', this volume starts out from the idea of the world as one interconnected political system and explores ways and perspectives in which to analyse it as such. Subjects discussed include national sovereignty, law, public management, networks, economic governance, institutions and Europe. The contributors examine central aspects of this emerging global polity such as the role of law, of networks and of civil society. They discuss key theoretical and meta-theoretical questions on how to analyze and theorize the global polity, what drives it forward, and whether it can be democratized. Contributed to, and edited by renowned names in the field, the outstanding scholarship presented in this topical book provides an original contribution to the literature on globalization and global governance.

Locating US Theological Education In a Global Context Hendrik R. Pieterse, 2019-06-21 CONTRIBUTORS: E. Byron Anderson, K. K. Yeo, Margaret Eletta Guider, OSF, Lester Edwin J. Ruiz, Brent Waters, Namsoon Kang, Luis R. Rivera, and David Esterline. Theological education in the United States finds itself in untested circumstances today. Rapid social change is creating an increasing multicultural, multiracial, and multireligious context for leadership formation. At the same time, international enrollment, cross-border educational initiatives, student and faculty exchanges, and more are connecting US theological schools with a global community of Christian teaching and learning. How do US theological institutions "locate" themselves within this global ecology of theological formation so as to be both responsible participants and creative shapers within it? That is, how do they discern their proper place and role? It is questions like these that the contributors to this volume explore. Building on the decades-long discussion about the globalization of US theological education, this book argues that, in engaging such questions, US theological institutions have much to gain from a sustained conversation with the burgeoning literature on the internationalization of American higher education. This research offers theological institutions a trove of insights and cautionary tales as they seek to discern their rightful place and role in educating leaders in and for a global Christian church. CONTRIBUTORS: E. Byron Anderson, K. K. Yeo, Margaret Eletta Guider, OSF, Lester Edwin J. Ruiz, Brent Waters, Namsoon Kang, Luis R. Rivera, and David Esterline

Understanding Global Skills for 21st Century Professions Douglas Bourn, 2018-10-24 This book highlights the increasing need for people who will be working in professions such as teaching, health, engineering and business management to have the skills for living and working in a global society. Globalisation and the challenges resulting from recent political events in Europe and North America have given rise to a need for training and further and higher education programmes to address the skills young people all need to effectively engage in the current global society. Reviewing the range of theories and debates surrounding skills for the twenty-first century, the author suggests there is a need to directly address the real-world issues of today and move beyond abstract concepts such as team work, critical thinking and problem solving, as important as these concepts are. The author proposes a new framework for global skills using examples from international and national policy-makers and evidence from further and higher educational programmes and training courses. This pioneering yet practical book will be of value to students and scholars of global education as well as practitioners and policy makers.

Iranian Cinema in a Global Context Peter Decherney, Blake Atwood, 2014-09-15 Iranian films have been the subject of much critical and scholarly attention over the past several decades, and Iranian filmmakers are mainstays of international film festivals. Yet most of the attention has been focused on a small segment of Iranian film production: auteurist art cinema. Iranian Cinema in a Global Context, on the other hand, takes account of the wide range of Iranian cinema, from popular youth films to low budget underground films. The volume also reassesses the global circulation of Iranian art cinema, looking at its reception at international festivals, in university curricula, and at the Academy Awards. A final theme of the volume explores the intersection between politics and film, with essays on post-Khatami reform influences, representations of ineffective drug policies, and the representation of Jewish characters in Iranian film. Taken together, the essays in this volume present a new definition of the field of Iranian film studies, one that engages global media flows, transmedia interaction, and a heterogeneous Iranian national cinema.

Global Sports Policy Catherine Palmer, 2012-11-09 Lifts the analysis out of the nuts and bolts of sports policy and into some really thought-provoking areas which will equip the policy maker for the challenges of the 21st

century - Dominic Malcolm, Loughborough University This is an excellent analysis of the significance of globalisation for national sport policy and especially of the impact of global processes at the local socio-cultural level - Barrie Houlihan, Loughborough University Drawing upon a range of empirical case studies, Catherine Palmer situates sports policy within a broader consideration of global processes, practices and consequences, exploring the relationship between: the local and the global globalization and governance new technologies human rights the environment corporate responsibility. In doing so she sets out the ground for an understanding of policy making in sport and how this affects society. Covering both theory and practice, it is a detailed and thought provoking resource for students of sports policy, sports development, sports management and sports studies.

Global Justice and Territory Cara Nine, 2012-05-31 Historical injustice and global inequality are basic problems embedded in territorial rights. In *Global Justice and Territory* Cara Nine advances a general theory of territorial rights adapting a theoretical framework from natural law theory to ground all territorial claims.

Global Subjects Jean-François Bayart, 2007 Globalization is part of the fabric of our everyday lives. And yet we often view it as a threat to our identities, or even our very survival. This study offers a radically new vision of this phenomenon, one which goes completely against the way it is interpreted by neo-liberals or the anti-globalization movement.

Regional and Global Regulation of International Trade Francis Snyder, 2002-07-05 The processes of legal and economic integration at a regional and global scale have created powerful legal and economic dilemmas. They challenge the paradigms of constitutionalism, including the State's monopoly of constitutionalism, the autonomy of national political communities and the traditional forms of participation and representation. The phenomena of globalisation and regional forms of governance have promoted the inter-dependence of national political communities and destroyed the artificial boundaries upon which national constitutional democracies are found and from which they derive their legitimacy. Furthermore, it is inevitable that the development of international trade and economic integration will raise claims for some form of global distributive justice to complement the wealth maximisation arising from free trade. This will come from the gradual development of global forms of political discourse and law-making, challenging State constitutionalism and requiring some of the instruments and theories of constitutionalism. The essays in this collection, written by leading scholars in international trade law, argue the pros and cons of greater regional and global regulation. They conclude that whatever the final framework for international trade, the critical decisions about institutional form and content will be decided in an emerging global political arena. They help to identify this political arena, who governs it, and according to which rules, and identify the different institutional alternatives in that global political arena.

Sustainable Global Outsourcing Ron Babin, Brian Nicholson, 2012-08-31 Through a series of case studies and surveys, the authors examine current sustainability trends in outsourcing and recommend how providers should prepare for increasing buyer demands in this area, suggesting buyers and providers can work together to build

successful outsourcing relationships through collaborative sustainability projects.

Advanced Introduction to Global Administrative Law Sabino Cassese, 2021-02-26 Sabino Cassese presents an incisive introduction to the essential principles of global law, exploring the central theories of globalization through an analysis of the main developments in this area. The *Advanced Introduction* concludes that despite the ongoing dialectic between national governments and international institutions, globalization and states are progressing in parallel, while civil societies are increasingly involved in the machinery of globalization.

Global Consumer Organizations Karsten Ronit, 2015-08-27 As corporate activity continues to expand in line with the continued globalization of the economy there is an increasing demand for establishing rules to regulate the trans-boundary activities of firms and their many and complex relations with consumers. Until now, sources of knowledge in this field have been scattered and unsystematic and this volume fills a key gap in current literature, providing a concise and accessible introduction to the role of global consumer organizations. The book: Provides an historical overview that traces the early attempts made before WWII to formulate elements of global consumer policy, highlighting key issues and initiatives up until the 1980s. Outlines the groups of organizations that are responsible for dealing with consumer issues in areas such as trade and development, socio-economics and the environment, including the Organisation for Economic Co-operation and Development, World Trade Organization, International Monetary Fund, United Nations Conference on Trade and Development, and World Bank. Analyses the group of special intergovernmental organizations that address the problems of specific consumer segments, industries and service-providers, including the World Health Organization, International Telecommunication Union and World Tourism Organization. Evaluates both current and future challenges and dilemmas facing consumer organizations, including addressing the continued issues of coordination between them. Providing a much-needed overview of this key area in international organization, *Global Consumer Organizations* will be of interest to students and scholars in a range of areas, including international political economy, consumer behaviour, international organizations, economic policy and consumer behaviour.

Global Governmentality Wendy Larner, William Walters, 2004-08-02 *Global Governmentality* extends Foucault's political thought towards international studies, exploring the governance of the global, the international, the regional and many other extra-domestic spaces.

Global Governance and Democracy Jan Wouters, Antoon Braeckman, Matthias Lievens, Emilie Bécault, 2015-09-25 Globalization needs effective global governance. The important question of whether this governance can also become democratic is, however, the subject of a political and academic debate that began only recently. This multidisciplinary book aims to move this conversation forward by drawing insights from international relations, political theory, international law and international political economy. Focusing on global environmental, economic, security and human rights governance, it sheds new light on the democratic deficit of existing global governance structures, and proposes a number of tools to overcome it.

The Global Anti-Money Laundering Regulatory Landscape in Less Developed Countries Norman Mugarura, 2016-03-09

Examining the challenges of using the global anti-money laundering (AML) framework in an uneven global regulatory landscape, this book discusses the difficulties of relating de-regulation, liberalization and conflict of laws to the dynamics of the market economy and demonstrates how the global environment engenders money laundering. It suggests that corruption, general systemic failure and lack of infrastructural capacity in some developing economies are hampering the implementation of laws and regulations. Suggesting that these challenges can be overcome by designing AML regimes more suited to developing economies within the prevailing global climate, the book questions the assumption that that global regimes will be applicable and emphasises the need for more representation of developing economies on the relevant committees. This book is the first of its kind to present the perspective of developing economies and their involvement in AML regimes and should be of interest to those involved in business and commercial law as well as comparative law.
