Le Corbusier – L'Unité d habitation de Marseille / The Unité d Habitation in Marseilles Jacques Sbriglio, 2015-04-24 the Unité in Marseille (1945-1952) was a pioneering achievement at a time when social housing in the post WWII years posed an immense problem. Freed from restrictive regulations for the first time Le Corbusier was able to put into practice his concept of modern social housing. A milestone of modern architecture and subject of controversial debate, the Unité in Marseille continues to attract numerous visitors and students of architecture. This volume is the latest addition to Birkhäuser's series of guides to Le Corbusier's most acclaimed buildings, and includes an additional chapter on his Unités in Rezé-les-Nantes, Briey en Forêt, Firminy and Berlin. The author, a practising architect and well known Le Corbusier specialist, lives in Marseille and teaches at the Ecole d'architecture de Marseille-Luminy.

Public Policy's Role in Achieving Sustainable Development Goals Hamdan, Mahani, Anshari, Muhammad, Ahmad, Norainie, Ali, Emil, 2023-08-18 In 2015, UN member states agreed to 17 global Sustainable Development Goals (SDGs) to end poverty, protect the planet, and ensure prosperity for all. The academic community, policymakers, industry leaders, and civil society must work together and share experiences on the implementation of SDGs. Open discussion on lessons learned from the inclusive education policies, the difficulties and obstacles developing economies face in implementing the SDGs, and the affordability of the clean energy policies initiated by the SDGs will guide and inform better decision making for future implementations across the world. *Public Policy's Role in Achieving Sustainable Development Goals* is authored by various esteemed researchers, policymakers, and academics from a multidisciplinary perspective and emphasizes quality research-based studies that contribute to theory, lessons learned, best practices, critical understanding, and policy implications or formulation on the Sustainable Development Goals (SDGs) in any country. It supports the acceleration required to implement the SDGs by mobilizing the academic community, policymakers, industry, and civil society to discuss experiences focusing on the SDGs and their implementation in the context of public policy, administration, and governance deemed most important for world regions. Thus, the book will have a global discussion while addressing the SDGs in a way that considers each region's specificities. It is designed for researchers from the social sciences, arts and humanities, sociology, politics, and the broader interdisciplinary fields of business and economics and also for policymakers, corporations, NGOs, government bodies, research centers, think tanks, and university libraries worldwide.

Visual Culture in the Built Environment Susan Winchip, 2014-02-07 *Visual Culture in the Built Environment: A Global Perspective* provides an integrated survey of global interior environments and architecture, explaining significant design styles and movements from the mid-19th century to the present day. In addition to learning the characteristics and designers of a particular style or movement, students will learn how and why interior environments and architecture develop, including the impact of cultural and political events. In reflecting the emerging field of Visual Culture studies, this textbook expands upon traditional approaches to studying the history of interior environments and architecture by presenting content within the global interdisciplinary

context of the arts, politics, technology, business, and economics.

Europeanization and Multilevel Governance Ian Bache, 2007-10-23 This state-of-the-art study traces the relationship between Europeanization and multilevel governance, two key concepts that have become increasingly important in recent years. Through the lens of cohesion policy, Ian Bache illustrates how the EU has affected the vertical and horizontal dimensions of domestic policymaking. The author focuses especially on Britain, comparing its experiences to that of ten other member states. Bringing together the conceptual tools of multilevel governance and policy networks and developing a framework for using these tools together in future research, this concise and clearly written study will be valuable for scholars and students of EU and British politics.

Cohesion Policy and Multi-level Governance in South East Europe Ian Bache, George Andreou, 2013-09-13 This book considers the extent to which EU cohesion policy and related pre-accession instruments are contributing to the development of more compound polities in south east Europe and, specifically, promoting multi-level governance. In this respect, there are two points of departure: the first is the argument that the EU is a highly compound polity that tends to pull member (and candidate) states in this direction; the second is the considerable literature that links EU cohesion policy to the promotion of multi-level governance. Following this, we have chosen a range of south east European states whose period of engagement with the EU generally differs: Greece, Slovenia, Bulgaria, Romania, Croatia, F.Y.R. Macedonia and Turkey. The case studies reveal that EU cohesion policy has created more compound polities but that system-wide multi-level governance remains weak and central governments are still prominent. However, there are interesting and potentially important developments in relation to particular features of multi-level governance, not least in states whose engagement with the EU in this sphere is relatively new. This book was published as a special issue of Southeast European and Black Sea Studies.

OECD Urban Policy Reviews A Territorial Approach to the Sustainable Development Goals Synthesis report OECD, 2020-02-07 In the face of megatrends such as globalisation, climate and demographic change, digitalisation and urbanisation, many cities and regions are grappling with critical challenges to preserve social inclusion, foster economic growth and transition to the low carbon economy. The 17 Sustainable Development Goals (SDGs) set the global agenda for the coming decade to end poverty, protect the planet and ensure prosperity for all.

Health and the Millennium Development Goals World Health Organization, 2005 This WHO's report provides a global overview of progress towards each of the health MDGs to date and identifies the challenges to be addressed if we are to meet the goals. It presents the essential elements - the strategies and inputs - that will help the international community working collectively, to tackle the health crisis facing many poor countries, and in doing so, contribute to poverty reduction.

A Systemic Functional Grammar of French Alice Caffarel-Cayron,2006-06-27 '[The] consistent interplay between theoretical and applied pursuits has always been a defining feature of systemic functional theory... This kind of mutual enrichment is clearly demonstrated in Alice Caffarel's work. The result is a description which penetrates to the heart of the language, revealing it at one and the same time as a specimen of the human semiotic and a unique resource for the continuous creation of meaning.' Professor M A K Halliday, from the Preface.

Tense, Mood and Aspect Louis de Saussure,Jacques Moeschler,Genoveva Puskás,2007 This book is a collection of articles dealing with theoretical issues in the study of tense, mood and aspect, as well as with specific semantic and syntactic problems raised by linguistic expressions dedicated to these domains across a variety of languages. Through these papers, strong variations are explored, but also crosslinguistic convergences are investigated. Numerous phenomena so far often left aside in linguistics are described and enlightened by different scientific standpoints, which they serve to illustrate. The languages investigated in this volume include Germanic languages (Dutch, English, German), Romance (French, Catalan, Italian), Slavic (Serbo-Croatian, Czech, Russian), Greek, and non-indoeuropean languages such as Thai, Digo and Kikuyu. Related topics such as grammaticalization, presuppositions, questions in dialogue, illocutionary acts and acquisition are incidentally called upon in order to shed light from the outside onto tense, mood (and modality) and aspect. This volume is of great interest for all scholars engaged in contemporary research on the linguistic expression of tense, mood and aspect. The papers gathered in this volume are a tight selection of the ones that were presented at the 6th Chronos colloquium.

Architecture and Capitalism Peggy Deamer, 2013-07-18 Architecture and Capitalism tells a story of the relationship between the economy and architectural design. Eleven historians each discuss in brand new essays the time period they know best, looking at cultural and economic issues, which in light of current economic crises you will find have dealt with diverse but surprisingly familiar economic issues. Told through case studies, the narrative begins in the mid-nineteenth century and ends with 2011, with introductions by Editor Peggy Deamer to pull the main themes together so that you can see how other architects in different times and in different countries have dealt with similar economic conditions. By focussing on what previous architects experienced, you have the opportunity to avoid repeating the past. With new essays by Pier Vittorio Aureli, Ellen Dunham-Jones, Keller Easterling, Lauren Kogod, Robert Hewison, Joanna Merwood-Salisbury, Robin Schuldenfrei, Deborah Gans, Simon Sadler, Nathan Rich, and Micahel Sorkin.
