Sport 2.0 Andy Miah, 2024-02-06 Ramifications of the convergence of sports and digital technology, from athlete and spectator experience to the role of media innovation at the Olympics. Digital technology is changing everything about modern sports. Athletes and coaches rely on digital data to monitor and enhance performance. Officials use tracking systems to augment their judgment in what is an increasingly superhuman field of play. Spectators tune in to live sports through social media, or even through virtual reality. Audiences now act as citizen journalists whose collective shared data expands the places in which we consume sports news. In *Sport 2.0*, Andy Miah examines the convergence of sports and digital cultures, examining not only how it affects our participation in sport but also how it changes our experience of life online. This convergence redefines how we think of about our bodies, the social function of sports, and the kinds of people who are playing. Miah describes a world in which the rise of competitive computer game playing—e-sports—challenges and invigorates the social mandate. Miah also looks at the Olympic Games as an exemplar of digital innovation in sports, and offers a detailed look at the social media footprint of the 2012 London Games, discussing how organizers, sponsors, media, and activists responded to the world's largest media event. In the end, Miah does not argue that physical activity will cease to be central to sports, or that digital corporeality will replace the nondigital version. Rather, he provides a road map for how sports will become mixed-reality experiences and abandon the duality of physical and digital.

**Rick Limmer's Guide to Playing Bogey Golf** Oliver E. Cathey Jr., 2012-07 Oliver Cathey, AKA Rick Limmer, retired from a 40 year career as an Operations Research Analyst to play golf at PGA West in La Quinta, CA. Rick believes that a little levity makes for an easy read and makes technical points stick a little easier in your head. In this, his second book about golf, Rick writes about the course management skills that can immediately cut 10 strokes off the scores of high handicap golfers. If you're a high handicap golfer, this book will show you how going for bogey will get you bogey when going for par gets you doubles and triples. It will show you how to stay out of trouble and how to get out cleanly when you get in trouble anyway. This book will not fix your swing. It's aimed at fixing your game. The author's Bogey Golfer Solution is demonstrated by examples on two famous golf courses at PGA West, the Arnold Palmer course you see on TV during the Humana Classic and on the PGA West Stadium course that people come from all over the world to play.

In *Putting by the Numbers*, author Bob Labbe provides a quantitative method of lag putting applicable for all golfers whether recreational, amateur, or professional. It can help you reduce your score by four to five strokes per round regardless of skill level. This method is based upon science, including physics and engineering mechanics, but is simplified and reduced to an arithmetic method anyone can use if able to do simple arithmetic in

their head quickly. Putting by the Numbers provides a video trailer and an on-course and in-home practice video that fully demonstrates the method that can be used to play on any golf course throughout the world. No new equipment or change in your putting stroke is needed, just the willingness to practice in and around the putting green to develop your unique power factor to overcome the frictional surfaces encountered during play.
