Translatology, Translation and Interpretation - Toward a New Scientific Endeavor Noury Bakrim,2024-02-07 This book brings together scholarly contributions to question, model, and reshape translatology as the scientific discipline studying language translation. The chapters emphasize the hypothesis of a real domain of observability and objectivity through experimental and applied perspectives. The authors offer a balanced view of adequacy and coherence between the empirical and theoretical components of the book. The chapters include a good deal of individual language data from both source and target approaches, with a focus on typologically and culturally diverse spaces such as the African context. Domains of inquiry such as terminology and the cognitive dimension of the process exemplify the ability to create a dialogue between multidisciplinary intersections and translatological attempts of laws and generalizations.

The Human Rights-Based Approach to Higher Education Jane Kotzmann, 2018-04-05 A human right to higher education was included in the International Covenant on Economic Social and Cultural Rights (ICESCR), which came into force in 1976. Yet the world has changed significantly since the ICESCR was drafted. State legislation and policies have generally followed a neoliberal trajectory, shifting the perception of higher education from being a public good to being a commodity able to be bought and sold. This model has been criticized, particularly because it generally reinforces social inequality. At the same time, attaining higher education has become more important than ever before. Higher education is a prerequisite for many jobs and those who have attained higher education enjoy improved life circumstances. This book seeks to determine: Is there still a place for the human right to higher education in the current international context? In seeking to answer this question, this book compares and contrasts two general theoretical models that are used to frame higher education policy: the market-based approach and the human rights-based approach. In the process, it contributes to an understanding of the likely effectiveness of market-based versus human rights-based approaches to higher education provision in terms of teaching and learning. This understanding should enable the development of more improved, sophisticated, and ultimately successful higher education policies. This book contends that a human rights-based approach to higher education policy is more likely to enable the achievement of higher education purposes than a market-based approach. In reaching this conclusion, the book identifies and addresses some strategic considerations of relevance for advocates of a human rights-based approach in this context.

Mobile Tech Report 2014 John R. Roberts, 2014-01-10 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the

computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: Blackberry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix
