Seeing through the Smoke M. D. Grinspoon, 2023-04-20 Depending on which doctor you speak with, or which websites you read, cannabis could be an appealing, low-risk medicine – even an aid to wellness – or an insidiously addictive drug rotting the brains of our youth. This dissonance confuses young people, distressed patients, and paralyzes politicians, all while inviting dubious sources of information and resulting in uninformed choices, enhanced polarization, and a fragmented national policy. *Seeing Through the Smoke* is an unflinching examination at the grossly misunderstood drug that uses data-driven medical science and a critical historical perspective to reveal the truth behind cannabis. In this balanced and measured investigation, Cannabis specialist and Instructor in Medicine at Harvard Medical School Dr. Peter Grinspoon untangles the reality behind cannabis, revealing how we ended up with radically divergent understandings of the drug and pointing a way toward a middle ground that we can all share. Moving through an illuminating tour of the social history and the medical science behind cannabis, Grinspoon unpacks the layers of disinformation left by a sordid history of government propaganda, racial suppression, and indifference from the medical community to answer questions like: Is cannabis addictive? What are its best-established medical uses? Can cannabis help cure cancer? How does cannabis affect memory? How dangerous is cannabis for teens? Is cannabis a safer treatment for ADHD and PTSD? What exactly is CBD and how is it different from marijuana? What are the most concerning side effects? By focusing on the most critical purported harms—driving, pregnancy, addictiveness, memory—and by focusing on the most commonly cited medical benefits—relieving chronic pain, sleep, anxiety, PTSD, autism, and cancer—*Seeing Through the Smoke* will help patients, parents, doctors, health experts, regulators, and politicians move beyond biased perceptions and arrive at a shared reality towards cannabis.

Free Refills Peter Grinspoon, 2016-02-16 *Free Refills* is the harrowing tale of a Harvard-trained medical doctor run horribly amok through his addiction to prescription medication, and his recovery. Dr. Peter Grinspoon seemed to be a total success: a Harvard-educated M.D. with a thriving practice; married with two great kids and a gorgeous wife; a pillar of his community. But lurking beneath the thin veneer of having it all was an addict fueled on a daily boatload of prescription meds. When the police finally came calling—after a tip from a sharp-eyed pharmacist—Grinspoon's house of cards came tumbling down fast. His professional ego turned out to be an impediment to getting clean as he cycled through recovery to relapse, his reputation, family life, and lifestyle in ruins. What finally moves him to recover and reclaim life—including working with other physicians who themselves are addicts—makes for inspiring reading.

Chasing New Horizons Alan Stern, David Grinspoon, 2018-05-01 Called spellbinding (*Scientific American*) and thrilling...a future classic of popular science (PW), the up close, inside story of the greatest space exploration project of our time, *New Horizons'* mission to Pluto, as shared with David Grinspoon by mission leader Alan Stern and other key players. On July 14, 2015, something amazing happened. More than 3 billion miles from Earth, a small NASA spacecraft called *New Horizons* screamed past Pluto at more than 32,000 miles per hour, focusing its instruments on the long mysterious icy worlds of the Pluto system, and then, just as quickly, continued on its journey out into the beyond. Nothing like this has occurred in a generation—a raw exploration of new worlds unparalleled since NASA's *Voyager* missions to Uranus and Neptune—and nothing quite like it is planned to happen ever again. The photos that *New Horizons* sent back to Earth graced the front pages of newspapers on all 7 continents, and NASA's website for the mission received more than 2 billion hits in the days surrounding the flyby. At a time when so many think that our most historic achievements are in the past, the most distant planetary exploration ever attempted not only succeeded in 2015 but made history and captured the world's imagination. How did this happen? *Chasing New Horizons* is the story of the men and women behind this amazing mission: of their decades-long commitment and persistence; of the political fights within and outside of NASA; of the sheer human ingenuity it took to design, build, and fly the mission; and of the plans for *New Horizons'* next encounter, 1 billion miles past Pluto in 2019. Told from the insider's perspective of mission leader Dr. Alan Stern and others on *New Horizons*, and including two stunning 16-page full-color inserts of images, *Chasing New Horizons* is a riveting account of scientific discovery, and of how much we humans can achieve when people focused on a dream work together toward their incredible goal.

Drug Crazy Mike Gray, 2013-05-13 Over the last fifteen years, American taxpayers have spent over \$300 billion to wage the war on drugs--three times what it cost to put a man on the moon. In *Drug Crazy*, journalist Mike Gray offers a scathing indictment of this financial fiasco, chronicling a series of expensive and hypocritical follies that have benefited only two groups: professional anti-drug advocates and drug lords. The facts are alarming. More than twenty-five years ago, a presidential committee determined that marijuana is neither an addictive substance nor a stepping stone to harder drugs, but the embarrassing final report was shelved by a government already heavily invested in the war against drugs. Many medical experts recommend simply prescribing drugs to addicts, and communities that have done this report a lower crime rate and reduced unemployment among drug users. In a riveting account of how we got to this impasse--discriminatory policies, demonization of users, grandstanding among both lawmakers and lawbreakers--conventional wisdom is turned on its head. Rather than a planned assault on the scourge of addiction, the drug war has happened almost by accident and has been continually exploited by political opportunists. A gripping account of the violence, corruption, and chaos characterizing the drug war since its inception, Mike Gray's incisive narrative launches a frontal attack on America's drug orthodoxy. His overview of the battlefield makes it clear that this urgent debate must begin now.

Psychedelic Drugs Reconsidered Lester Grinspoon, James B. Bakalar, 1997 First published in 1979, *Psychedelic Drugs Reconsidered* is regarded by many as the most comprehensive, accurate, and accessible analysis of psychedelic drugs for the general reader. It records the extensive history of scientific research on, and societal experience with, psychedelic drugs. The Lindesmith Center reprint edition features a new introduction by the authors on recent developments in psychedelic research, as well as a preface by Dr. Ethan Nadelmann, director of the Lindesmith center.

Earth in Human Hands David Grinspoon, 2016-12-06 NASA Astrobiologist and renowned scientist Dr. David Grinspoon brings readers an optimistic message about humanity's future in the face of climate change. For the first time in Earth's history, our planet is experiencing a confluence of rapidly accelerating changes prompted by one species: humans. Climate change is only the most visible of the modifications we've made--up until this point, inadvertently--to the planet. And our current behavior threatens not only our own future but that of countless other creatures. By comparing Earth's story to those of other planets, astrobiologist David Grinspoon shows what a strange and novel development it is for a species to evolve to build machines, and ultimately, global societies with world-shaping influence. Without minimizing the challenges of the next century, Grinspoon suggests that our present moment is not only one of peril, but also great potential, especially when viewed from a 10,000-year perspective. Our species has surmounted the threat of extinction before, thanks to our innate ingenuity and ability to adapt, and there's every reason to believe we can do so again. Our challenge now is to awaken to our role as a force of planetary change, and to grow into this task. We must become graceful planetary engineers, conscious shapers of our environment and caretakers of Earth's biosphere. This is a perspective that begs us to ask not just what future do we want to avoid, but what do we seek to build? What kind of world do we want? Are humans the worst thing or the best thing to ever happen to our planet? Today we stand at a pivotal juncture, and the answer will depend on the choices we make.

Lonely Planets David Grinspoon, 2009-03-17 PEN Literary Award Winner: “The best, most entertaining examination of the possibility of other life in the universe since [Carl] Sagan’s best work.” –Boulder Daily Camera It’s been decades since Carl Sagan first addressed the general public about the possibility of extraterrestrial life from a

scientist's perspective. We've learned a lot in those years, and now planetary scientist David Grinspoon investigates the big questions: How widespread are life and intelligence in the cosmos? Is life on Earth an accident, or in some sense the "purpose" of this universe? And how can we, working from the Earth-centric definition of "life," even begin to think about the varieties of life-forms on other planets? In accessible, lively prose, and using the topic of extraterrestrial life as a mirror with which to view human beliefs, evolution, history, and aspirations, Grinspoon takes us on a three-part journey—the history of our expanding awareness of other planets and our ideas on alien life dating back to the earliest days of astronomy; the science of cosmic evolution and the evolution of life on Earth, including a critique of the "Rare Earth hypothesis"; and the beliefs that humans hold, addressing the limits of our ability to conceptualize or communicate with intelligent aliens and the scientific and philosophical implications of far-future evolutionary possibilities. Rich in personal and often amusing anecdotes, *Lonely Planets* explores the shifting boundary between planetary science and natural philosophy, and reveals how the search for extraterrestrial life unites our spiritual and scientific quests for connection with the cosmos. Includes a new foreword about recent Mars discoveries "An outstanding introduction to cosmic evolution." —San Jose Mercury News "[A] terrific book." —San Diego Union-Tribune "A personable chat on life, the universe and everything." —Publishers Weekly

Venus Revealed David H. Grinspoon, 1997-01-05 Early robot probes sent by Russian and American scientists had given us some tantalizing but fragmentary glimpses of the surface and atmosphere, hinting at some of the most exotic conditions seen in the solar system. Magellan showed a planet full of beautiful landscapes, some eerily familiar and some completely unexpected - a world of active volcanoes, shining mountains, and even river valleys carved by torrents of flowing lava. Venus may once have had a wet, temperate, comfortable climate, much like Earth's. What happened to turn it into a hostile, burning, acid world? Our twin has important tales to tell us regarding several of Earth's most pressing environmental problems, including ozone destruction, global warming, and acid rain. In *Venus Revealed*, David Grinspoon makes a compelling case for comparative planetology as an important tool for gaining knowledge that is vital for our long-term survival on our own planet. He re-examines the uniqueness of our own Earth in light of the recent Magellan findings, while also raising the provocative questions: Did a runaway greenhouse effect transform Venus into the burning oven she is today? By treating Venus as a controlled experiment, what can we learn from her that will help us survive on Earth? Grinspoon tackles these and other long-debated questions while explaining the incredible scientific advances made possible by the Magellan space probe.--BOOK JACKET. Talking Smack Andrew McMillen, 2014-10-03 Honest, intimate conversations with some of Australia's best musicians, including Paul Kelly, Gotye, Tina Arena, Phil Jamieson, Steve Kilbey, Mick Harvey and Holly Throsby. Of all the creative industries, the starkest and most distinct link between drug use and creativity lies within music. The two elements seem to be intertwined, inseparable; that mythical phrase 'sex, drugs and rock and roll' has been bandied about with a wink and a grin for decades. But is it all smoke and mirrors, or does that cliché ring true for some of our best - known artists? In this fascinating new book, journalist Andrew McMillen talks with Australian musicians about their thoughts on - and experiences with - illicit, prescription and legal drugs. Through a series of in - depth and intimate interviews, he tells the stories of musicians who, like Paul Kelly, bit into the forbidden fruit and avoided choking. This isn't to say that stories of ruin and redemption are avoided - they're not. But, by having conversations about a subject that's rarely discussed in public, and much less often dealt with honestly, McMillen explores the truths of a contentious topic that isn't going away. *Talking Smack* is a timely and thought - provoking must - read, and includes interviews with some of our most successful and creative musicians: Paul Kelly Wally de Backer (Gotye) Steve Kilbey (The Church) Phil Jamieson (Grinspoon) Tina Arena Spencer P. Jones (Beasts of Bourbon) Mick Harvey (ex Nick Cave and the Bad Seeds) Lindy Morrison (The Go - Betweens) Ian Haug (Powderfinger) Bertie Blackman Tim Levinson (Urthboy) Holly Throsby Jon Toogood (Shihad) Jake Stone (Bluejuice)

EMMA'S POEM GRINSPOON ED PA SP SLS Linda Glaser, 2010-04-05 Give me your tired, your poor Your huddled masses yearning to breathe free . . . In 1883, Emma Lazarus, deeply moved by an influx of immigrants from eastern Europe, wrote a sonnet that gave a voice to the Statue of Liberty. Originally a gift from France to celebrate our shared national struggles for liberty, the statue, thanks to Emma's poem, came to define us as a nation that welcomes immigrants. The text of that now famous poem, *The New Colossus*, appears in this free-verse biography, illustrated in an exquisite folk art style. *The New Colossus* by Emma Lazarus has been selected as a Common Core Text Exemplar (Grades 4-5, Poetry)

A Theology for the Twenty-First Century Douglas F. Ottati, 2020-10-15 Christianity in the United States is in crisis. Liberalism is declining, evangelicalism is splintering, increasing numbers of Christians are slipping away from churches, and more and more young people are for various reasons finding Christianity as they conceive it (a metaphysical thought system, or society of science-deniers, or an ideology for oppressors) not just implausible but repellent. At the same time, Christians across denominational and ideological divides are rediscovering a moral core, especially in the Jesus of the Gospels, that reactivates and unites them, and this kind of faith appeals to many who consider themselves averse to all traditional organized religion. But any revitalized Christian faith is going to need to understand its rootedness in, and interpretation of, Christianity's foundational texts and traditions. Noted theologian Douglas F. Ottati steps in to offer a theology for this new era. Combining deep learning in texts and traditions with astute awareness of contemporary questions and patterns of thought and life, he asks: what does it mean, in our time, to understand the God of the Bible as Creator and Redeemer? Distilling the content of Christian faith into seventy concise propositions, he explains each in lucid, cogent prose. A Theology for the Twenty-First Century will be an essential textbook for those training for ministry in our current climate, a wise guide for contemporary believers who wonder how best to understand and communicate their faith, and an inviting and intelligent resource for serious inquirers who wonder whether the way of Jesus might help them grasp the real world while remaining open to the transcendent.
