Jorge Hendrichs, Rui Pereira, Marc J.B. Vreysen

Emergency preparedness IPPC Secretariat, 2023-03-17 The introduction and purpose provide the scope and background of the guide, as well as key principles of outbreak management and description and comparison of generic and specific contingency plans. Organizational arrangements cover legislation, command structure, training, outbreak exercises, consultation, resourcing, communications, documentation, and funding. Background information on the pest provides information on pest risk assessment. Official actions based on presumptive diagnosis include information about notification, escalation, triage and significance assessment including staff resourcing, imposition of measures and maintenance of trade. The chapter on official actions to eradicate the pest after confirmation of diagnosis includes area restrictions, movement controls, trace forward and trace back, delimitation and surveillance, legislation, treatments and other management measures, and engagement with stakeholders. Review of measures in cases of prolonged official actions considers establishing trigger points, auditing and considering how success is demonstrated. Determining completion of official action considers criteria for pest freedom and measures to maintain plant pest freedom. The chapter on recovery and compensation covers de-escalation, stakeholder support and compensation arrangements. Evaluation and revision of contingency plans considers lessons learned, consideration of gaps in the plan, revision of the plan, and implementation of lessons learned.

A Song of Frutas Margarita Engle, 2021-08-03 From Pura Belpré Award-winning author Margarita Engle comes a lively, rhythmic picture book about a little girl visiting her grandfather who is a pregonero—a singing street vendor in Cuba—and helping him sell his frutas. When we visit mi abuelo, I help him sell frutas, singing the names of each fruit as we walk, our footsteps like drumbeats, our hands like maracas, shaking... The little girl loves visiting her grandfather in Cuba and singing his special songs to sell all kinds of fruit: mango, limón, naranja, piña, and more! Even when they're apart, grandfather and granddaughter can share rhymes between their countries like un abrazo—a hug—made of words carried on letters that soar across the distance like songbirds.

LA DIETA DE MARIN COUNTY Albert C Goldberg, MD, 2013-12 This book contains everything a parent needs to know to design an optimal diet for the healthy child from infancy through the teenage years. It addresses the need for a practical nutrition book that contains evidence based information rather than faith based reasoning passed off as science. It addresses the daily nutritional health issues of children in a specific, truthful, and friendly way. In addition to parents, this book will be of special interest to nursery schools, elementary and high school teachers, coaches, all health care providers, family physicians, pediatricians, and nurses who work with children, including pediatric and family nurse practitioners. At the turn of the previous century, malnutrition the lack of certain nutrients, vitamins and minerals was a problem second only to infection in this country. Today malnutrition is more likely to be a case of overconsumption of certain nutrients. Too much has replaced too little: too much fat, too much salt, too much sugar, and too much ultra-processed food. The author reveals the solution to the problem of overconsumption in this book, which is peppered throughout with helpful, nutritious recipes, as well as examples of the food labels of many popular products, with notes on what to look out for when reading the packages of your favorite foods. Although most of Dr. Goldberg's suggestions and anecdotes come from his years of nurturing thousands of children (and their parents), he has recruited the experience of many other experts in nutrition. For the past twenty five years the author has worked in countries such as Argentina, Chile, China, Colombia, Ecuador, Ethiopia, Honduras, India, Nepal, Philippines, Peru, Venezuela, and Vietnam, where poverty, ignorance, social disintegration and war have contributed to nutritional diseases, and he has brought back with him a keen understanding of the multi-cultural effects upon diet. In 2001 Doctor Goldberg was selected as one of fifty Unsung Heroes of Compassion from around the world and was acknowledged personally by His Holiness

the XIV Dalai Lama.

Area-wide Integrated Pest Management Jorge Hendrichs, Rui Pereira, Marc J.B. Vreyen, 2021-02-01 Over 98% of sprayed insecticides and 95% of herbicides reach a destination other than their target species, including non-target species, air, water and soil. The extensive reliance on insecticide use reduces biodiversity, contributes to pollinator decline, destroys habitat, and threatens endangered species. This book offers a more effective application of the Integrated Pest Management (IPM) approach, on an area-wide (AW) or population-wide (AW-IPM) basis, which aims at the management of the total population of a pest, involving a coordinated effort over often larger areas. For major livestock pests, vectors of human diseases and pests of high-value crops with low pest tolerance, there are compelling economic reasons for participating in AW-IPM. This new textbook attempts to address various fundamental components of AW-IPM, e.g. the importance of relevant problem-solving research, the need for planning and essential baseline data collection, the significance of integrating adequate tools for appropriate control strategies, and the value of pilot trials, etc. With chapters authored by 184 experts from more than 31 countries, the book includes many technical advances in the areas of genetics, molecular biology, microbiology, resistance management, and social sciences that facilitate the planning and implementing of area-wide strategies. The book is essential reading for the academic and applied research community as well as national and regional government plant and human/animal health authorities with responsibility for protecting plant and human/animal health.
