Orthogeriatrics Paolo Falaschi,2021 This new open access edition supported by the Fragility Fracture Network aims at giving the widest possible dissemination on fragility fracture (especially hip fracture) management and notably in countries where this expertise is sorely needed. It has been extensively revised and updated by the experts of this network to provide a unique and reliable content in one single volume. Throughout the book, attention is given to the difficult question of how to provide best practice in countries where the discipline of geriatric medicine is not well established and resources for secondary prevention are scarce. The revised and updated chapters on the epidemiology of hip fractures, osteoporosis, sarcopenia, surgery, anaesthesia, medical management of frailty, peri-operative complications, rehabilitation and nursing are supplemented by six new chapters. These include an overview of the multidisciplinary approach to fragility fractures and new contributions on pre-hospital care, treatment in the emergency room, falls prevention, nutrition and systems for audit. The reader will have an exhaustive overview and will gain essential, practical knowledge on how best to manage fractures in elderly patients and how to develop clinical systems that do so reliably.

Municipal Solid Waste Management in Asia and the Pacific Islands Agamuthu Pariatamby,Masaru Tanaka,2013-09-05 Solid waste management issues, technologies and challenges are dynamic. More so, in developing and transitory nations in Asia. This book, written by Asian experts in solid waste management, explores the current situation in Asian countries including Pacific Islands. There are not many technical books of this kind, especially dedicated to this region of the world. The chapters form a comprehensive, coherent investigation in municipal solid waste (MSW) management, including, definitions used, generation, sustainable waste management system, legal framework and impacts on global warming. Several case studies from Asian nations are included to exemplify the real situation experienced. Discussions on MSW policy in these countries and their impacts on waste management and minimization (if any) are indeed an eye-opener. Undoubtedly, this book would be a pioneer in revealing the latest situation in the Asian region, which includes two of the world's most dynamic nations in the economic growth. It is greatly envisaged to form an excellent source of reference in MSW management in Asia and Pacific Islands. This book will bridge the wide gap in available information between the developed and transitory/developing nations.

Thermodynamic Modeling and Materials Data Engineering J.-P. Caliste,A. Truyol,Jack H. Westbrook,2012-12-06 J.-P. CALISTE, A. TRUYOL AND J. WESTBROOK The Series, Data and Knowledge in a Changing World, exemplifies CODATA's primary purpose of collecting, from widely different fields, a wealth of information on efficient exploitation of data for progress in science and technology and making that information available to scientists and engineers. A separate and complementary CODATA Reference Series will present Directories of compiled and evaluated data and Glossaries of data-related terms. The present book Thermodynamic Modeling and Materials Data Engineering discusses thermodynamic, structural, systemic and heuristic approaches to the modeling of complex materials behavior in condensed phases, both fluids and solids, in order to evaluate their potential applications. It was inspired by the Symposium on Materials and Structural Properties held during the 14th International CODATA Conference in Chambéry, France. The quality of the contributions to this Symposium motivated us to present a coherent book of interest to the field. Updated contributions inspired by Symposium discussions and selections from other CODATA workshops concerning material properties data and Computer Aided Design combine to highlight the complexity of material data issues on experimental, theoretical and simulation levels Articles were selected for their pertinence in three areas. Complex data leading to interesting developments and tools such as: • new developments in state equations and their applications, • prediction and validation of physical and energy data by group correlations for pure compounds, • modeling and prediction of mixture properties.

Blood Surfer Debra Jess,2015-08-10 Their destiny is written in blood. Welcome to Star Haven, where the police arrest and imprison alternative humans, if not execute them outright. When outlaw Hannah Quinn saves Officer Scott Grey's life by bloodsurfing through his broken body, he winds up on the wrong side of the kill line. Hannah blew any chance she had of escaping Star Haven when she chose to save Scott's life. Scott has a reputation for killing Alts instead of arresting them. Now that she's triggered his dormant Alt ability, he's forced to go on the run with her until she can break his despised Alt power. Suspicion dies hard after a lifetime of conditioning. Despite the threat to their lives, Hannah finds herself falling for the one man she can't trust-and Scott falls for the woman who destroyed his life. With love and mistrust at war in a city where betrayal can

earn your freedom, will Hannah and Scott's tenuous bond be enough to save them?
