The Bird Colin Tudge,2010-09-07 • How are birds so good at flying and navigating? • Why are birds so like mammals— and yet so very different? • Did birds descend from dinosaurs, and if so, does that mean birds are dinosaurs? • How do they court each other and fend off rivals? • What' s being communicated in birdsong? • Can we ever know how birds think? In this fascinating exploration of the avian class, Colin Tudge considers the creatures of the air. From their evolutionary roots to their flying, feeding, fighting, mating, nesting, and communicating, Tudge provocatively ponders what birds actually do—as well as why they do it and how. With the same curiosity, passion, and insight he brought to redwoods, pines, and palm trees in his widely acclaimed book *The Tree*, Tudge here studies sparrows, parrots, and even the Monkey-eating Eagle to better understand their world—and our own. There is far more to a bird's existence than gliding gracefully on air currents or chirping sweetly from fence posts—the stakes are life and death. By observing and explaining the complex strategy that comes into play with everything from migration to social interaction to the timing of giving birth to young, Tudge reveals how birds are uniquely equipped biologically to succeed and survive. And he offers an impassioned plea for humans to learn to coexist with birds without continuing to endanger their survival. Complete with an annotated cast list of all the known birds in the world— plus gorgeous illustrations—*The Bird* is a comprehensive and delightfully accessible guide for everyone from dedicated birders to casual birdwatchers that celebrates and illuminates the remarkable lives of birds.

Food and Wine Lover's Puzzle and Quiz Book The Puzzle Society,2009-10-20 Quite possibly the perfect combination: food and wine paired with challenging puzzles. The beautiful food-and-wine-themed design is a perfect complement to the fun and challenging puzzles inside. The collection features crosswords, word search, wordwheel, codewords, arrowwords, kriss cross, pathfinder, and logic problems.

Gasping for Air Kevin Glynn MD,2017-08-03 Breathing is a continuous battle between our need for oxygen and forces in nature that attack our lungs. Three hundred thousand Americans will die of respiratory diseases this year. *Gasping for Air* is the dramatic story of how infections, toxins, carcinogens, and air pollution strike against one of our basic body functions. The book also describes how we come into the struggle with diseases like asthma, cystic fibrosis, and sleep apnea, which make us vulnerable to assaults on breathing from without and within. We have powerful weapons to defend breathing. Medical science, public health, engineering, and business, all play important roles in the effort to support breathing. Yet, *Gasping for Air* also reminds readers how breathing support has been at the eye of the storm in many ethical dilemmas of modern healthcare. Here, Kevin Glynn, an experienced pulmonologist and lifelong asthma sufferer tells stories about the third most common cause of premature deaths in the developed world, describes lethal forces in Nature (infections, genetic predispositions) and from human activities (dusty occupations, tobacco smoking, chemical toxins, drug overdoses) that threaten to suffocate us, and offers sage advice for how to prevent and address those threats and the damage they cause.

Best Places to Stay in California Anne E. Wright,2000 This completely revised and updated guide describes more than 300 accommodations throughout the state, from country inns to guest farms to grand old resorts.
