Land Use Dynamics and Governance in Sungai Selangor Watershed Jamilah

Mohamad, Goh Hong Ching, 2015-11-24 Watersheds have been widely recognized as the best scale at which to govern water. At the geographic scale of the watersheds, stakeholders are able to make decisions on how to manage water resources in a setting more conducive to participation. Through coordinated development and management of water, land, and related resources, economic and social welfare can be optimized without compromising sustainability of vital environmental systems. Sungai Selangor is an important water resource for the state of Selangor. It is the major contributor in meeting water demand to the Selangor State and Kuala Lumpur. Since early days, Sungai Selangor has played a central role in the development of settlements in northern Selangor. The research described here is an attempt to understand the development forces operating in the Sungai Selangor watershed. The approach taken is intentionally multi-disciplinary, as it attempts to paint a broad brush picture of the current situation within the Sungai Selangor watershed. Increasing pressures on land development is a major factor that causes land use conflicts in the watershed. Spatial-environmental governance should improve collaboration and connections between citizens and decision-makers at the watershed scale. Many issues within the economic, social or environmental realm necessitate an understanding of the spatial context within which such forces operate. The book is organized in ten chapters, each chapter being devoted towards addressing particular issues considered prevalent or outstanding within the community living within the watershed. Although the book has been written in an academic manner, it should also appeal to the general public and students in higher education institutions as it relates to topical issues. Beginner researchers may find that the discussion of various issues within a location-specific context might spark off their interest to begin their own research on particular aspects that appeal to their own area of expertise.

HuluPress Tatiana Pospelova, 2013 Hulu offers ad-supported online-streaming TV-shows, movies and documents on demand through a monthly paid subscription. The company now has more than 430 content partners, providing over 60,000 TV episodes, 2,300 TV series, and 50,000 hours of video. Nowadays Hulu's customers can either sign up for a free trial for limited TV shows and movies or pay \$7.99 monthly fee to get access to the full library. Our idea is to expand Hulu's online product range by offering magazine and newspaper editions. Hence, customers could choose between three different options such as free trial with limited shows, monthly payment for all the newest episodes, online newspapers and magazines subscriptions. As we all know, the entertainment and information channels are changing rapidly. Hulu is a young and emerging company, which understands the way that people consuming is shifting. We strongly believe that this approach will continue and affect the development of press and media in general.

Music, Social Media and Global Mobility Ole J. Mjos, 2013-07-03 This book is about the relationship between media, communication and globalization, explored through the unique empirical study of electronic music practitioners' use of the global social media: MySpace, Facebook, YouTube and Twitter. To understand the significance of the emerging nexus between social media and music in a global context, the book explores various aspects of production, distribution and consumption among electronic music practitioners as they engage with global social media, as well as a historical, political and economic exposition of the rise of this global social media environment. Drawing on interview-based research with electronic music artists, DJs, producers and managers, together with the historical portrayal of the emergence of global social media this pioneering study aims to capture a development taking place in music culture within the wider transformations of the media and communications landscape; from analogue to digital, from national to global, and from a largely passive to more active media use. In doing so, it explores the emergence of a media and communications ecology with increased mobility, velocity and uncertainty. The numerous competing, and rapidly growing and fading social media exemplify the vitality and volatility of the transforming global media, communication and

cultural landscape. This study suggests that the music practitioner's relationship with MySpace, Facebook, YouTube and Twitter and the key characteristics of these global social media, alter aspects of our practical and theoretical understandings of the process of media globalization. The book deploys an interdisciplinary approach to media globalization that takes into account and articulates this relationship, and reflects the enduring power equations and wider continuities and changes within the global media and communications sphere.

Legal Issues in the Rehabilitation of Abandoned Housing Projects (UUM Press)

Nuarrual Hilal Md. Dahlan, 2011-01-01 Abandoned housing project is one of the housing problems in Peninsular Malaysia. Even though there are laws and policies provided by the Malaysian Government to control the housing industry, the abandoned housing project is still an unsettled issue for the Malaysian Government to tackle. The real victims are the purchasers themselves. There is virtually no standard common way to face the problems of abandoned housing projects. Likewise, there is no similar specific method to deal with the rehabilitation of abandoned housing projects. This is due to the fact that in every abandoned housing project and its rehabilitation, the problem and issues faced by the stakeholders vary. Thus different methods are used to deal with the problems, especially to rehabilitate the projects. If the project is not variable for rehabilitation, the project will be stalled forever without any prospects for rehabilitation, to the detriment of the purchasers. This book discusses the law and practice in rehabilitating abandoned housing project in Peninsular Malaysia. Certain suggestions are also provided in this modest book for facing the problems of abandoned housing projects and their rehabilitation in Peninsular Malaysia and for the betterment of the housing industry in Peninsular Malaysia.

Media Management Bernd W. Wirtz, 2020-09-11 "Digitalization significantly changes the media. To cope with this change and to exploit new market opportunities is a major challenge for media corporations. Bernd Wirtz provides a valuable guideline for this new world, combining theory, facts, and practice." Dr. Hubert Burda, German publisher and Managing Corporate Partner of Hubert Burda Media Holding KG "The media business is subject to substantial change while differences between distinctive media areas are fading away. This is due to technical innovation in areas like transmittance of content, bearer of content and recording devices but also due to new formats, trends and constant change of

consumer behavior.” The textbook “Media and Internet Management” stays abreast of changes and covers this topic on a well-founded and comprehensive basis. It makes a valuable contribution to theory and practice in media management and is highly recommendable to media managers.” Christoph Mohn, Chairman of the Supervisory Board, Bertelsmann AG “The world of media is full of challenges and dynamic conditions for its field. The dynamic of this market is accelerated even more by new digital technologies and ongoing globalization. This book is an absolute “must have” for everyone who wants to know more about the basics, conditions and requirements of modern media management. The analytical clearness and structure make this publication highly relevant for students, but also for managers.” Urs Rohner, Chairman of the Board of Directors, Credit Suisse Group AG “Media Management is a textbook, but a very welcome newcomer for students and teachers as it fills a market gap for good educational material in this rapidly evolving field. It is concise, simple (but not simplistic), and contains a contemporary overview of concepts and tools for media managers. ” Prof. Dr. Bozena I. Mierzejewska, Editor of The International Journal on Media Management, Fordham University, New York “Summed up, with his second edition Wirtz managed to strengthen the outstanding position of his publication “Media Management”. His textbook shines because of its content, analytical clearness and the high relevance for business practice without losing its academic background. With the second edition this book has established its position in the field of media business as the leading standard reference book in Germany. It is suitable for business students, lectures as well as managers who can gain magnificent information from it.” Prof. Dr. Wolfgang Fritz, Director of the Institute of Marketing, Braunschweig University of Technology, Germany; Honorary Professor at the Institute of Business Administration, University of Vienna, Austria.
