**Worlding the south** Sarah Comyn,Porscha Fermanis,2021-07-06 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This collection brings together for the first time literary studies of British colonies in nineteenth-century Australia, New Zealand, South Africa, South America, Southeast Asia, and the South Pacific Islands. Drawing on hemispheric studies, Indigenous studies, and southern theory to decentre British and other European metropolises, the collection offers a groundbreaking challenge to national paradigms and traditional literary periodisations and canons by prioritising southern cultural networks in multiple regional centres from Cape Town to Dunedin. *Worlding the south* examines the dialectics of literary worldedness in ways that recognise inequalities of power, textual and material violence, and literary and cultural resistance. The collection revises current literary histories of the 'British world' by arguing for the distinctiveness of settler colonialism in the southern hemisphere, and by incorporating Indigenous, diasporic, and south-south perspectives.

*Flames* Stephen Dolginoff,2014-08-27 One year ago, Edmond died in a horrible fire. He took with him

the dreams of his fiancée, Meredith, the trust of his best friend, Eric, and the answers to the burning questions that still linger about his death and the terrible crime he committed. But on a stormy night at the cemetery where he rests, the secrets from his past will finally refuse to stay buried; and those he left behind will finally refuse to stay silent. In this original, suspense-filled musical thriller by the author/composer of *Thrill Me*, there are enough twists, turns and surprises to keep the audience guessing up until the final shocking moments.

*Alphaherpesviruses* Sandra Knowles Weller, 2011 Alphaherpesviruses are a fascinating group of DNA viruses that includes important human pathogens such as herpes simplex virus type 1 (HSV-1), HSV-2, and varicella-zoster virus (VZV); the causative agents of cold sores, genital ulcerous disease, and chickenpox/shingles, respectively. A key attribute of these viruses is their ability to establish lifelong latent infection in the peripheral nervous system of the host. Such persistence requires subversion of the host's immune system and intrinsic antiviral defense mechanisms. Understanding the mechanisms of the immune evasion and what triggers viral reactivation is a major challenge for today's researchers. This has prompted enormous research efforts into understanding the molecular and cellular biology of these viruses. This up-to-date and comprehensive volume aims to distill the most important research in this area providing a timely overview of the field. Topics covered include: transcriptional regulation, DNA replication, translational control, virus entry and capsid assembly, the role of microRNAs in infection and oncolytic vectors for cancer therapy. In addition there is coverage of virus-host interactions, including apoptosis, subversion of host protein quality control and DNA damage response pathways, autophagy, establishment and reactivation from latency, interferon responses, immunity and vaccine development. Essential reading for everyone working with alphaherpesviruses and of interest to all virologists working on latent infections.
