iMedia Sarah Kember, 2016-04-05 What can queer feminist writing strategies such as parody and irony do to outsmart the sexism of smart objects, environments and materials and open out the new dialecticism of structure and scale, critique and creativity? Drawing on science and technology studies and feminist theory, this book examines the gendering of current and future media technologies such as smart phones, Google glass, robot nurses, tablets and face recognition. Kember argues that there is a tendency to affirm and celebrate the existence of smart and often sexist objects, environments and materials in themselves; to elide writing and other forms of mediation; and to engage in disembodied knowledge practices. Disembodied knowledge practices tend towards a scientism that currently includes physics envy and are also masculinist. Where there is some degree of convergence between masculinist and feminist thinking about objects, environments and materials, there is also divergence, conflict and the possible opening towards a politics of imedia. Presenting a lively manifesto for refiguring imedia, this book forms an often neglected gender critique of developments in smart technologies and will be essential reading for scholars in Communication Studies, Cultural and Media, Science and Technology and Feminism.

Always Already New Lisa Gitelman, 2008-08-29 In *Always Already New*, Lisa Gitelman explores the newness of new media while she asks what it means to do media history. Using the examples of early recorded sound and digital networks, Gitelman challenges readers to think about the ways that media work as the simultaneous subjects and instruments of historical inquiry. Presenting original case studies of Edison's first phonographs and the Pentagon's first distributed digital network, the ARPANET, Gitelman points suggestively toward similarities that underlie the cultural definition of records (phonographic and not) at the end of the nineteenth century and the definition of documents (digital and not) at the end of the twentieth. As a result, *Always Already New* speaks to present concerns about the humanities as much as to the emergent field of new media studies. Records and documents are kernels of humanistic thought, after all—part of and party to the cultural impulse to preserve and interpret. Gitelman's argument suggests inventive contexts for humanities computing while also offering a new perspective on such traditional humanities disciplines as literary history. Making extensive use of archival sources, Gitelman describes the ways in which recorded sound and digitally networked text each emerged as local anomalies that were yet deeply embedded within the reigning logic of public life and public memory. In the end Gitelman turns to the World Wide Web and asks how the history of the Web is already being told, how the Web might also resist history, and how using the Web might be producing the conditions of its own historicity.

Rethinking Media Change David Thorburn, Henry Jenkins, 2004-09-17 The essays in *Rethinking Media Change* center on a variety of media forms at moments of disruption and cultural transformation. The editors' introduction sketches an aesthetics of media transition—patterns of development and social dispersion that operate across eras, media forms, and cultures. The book includes case studies of such earlier media as the book, the phonograph, early cinema, and television. It also examines contemporary digital forms, exploring their promise and strangeness. A final section probes aspects of visual culture in such environments as the evolving museum, movie spectacles, and the virtual window. The contributors reject apocalyptic scenarios of media revolution, demonstrating instead that media transition is always a mix of tradition and innovation, an accretive process in which emerging and established systems interact, shift, and collude with one another.

World War I Media, Entertainments & Popular Culture Chris Hart, 2018-06-20 Entertainments and popular cultures played a major part in the lives of those experiencing the First World War. This collection of studies spans the role of newspapers, films, posters and music and much more, looking at the different ways, different media entertainments were produced and consumed during the war.

Remediation Jay David Bolter, Richard Grusin, 1999 A new framework for considering how all media constantly borrow from and refashion other media. Media critics remain captivated by the modernist myth of the new: they assume that digital technologies such as the World Wide Web, virtual reality, and computer graphics must divorce themselves from earlier media for a new set of aesthetic and cultural principles. In this richly illustrated study, Jay David Bolter and Richard Grusin offer a theory of mediation for our digital age that challenges this assumption. They argue that new visual media achieve their cultural significance precisely by paying homage to, rivaling, and refashioning such earlier media as perspective painting, photography, film, and television. They call this process of refashioning remediation, and they note that earlier media have also refashioned one another: photography remediated painting, film remediated stage production and photography, and television remediated film, vaudeville, and radio.

The Principles of Pathology: Systemic pathology John George Adami, Albert George Nicholls, 1911

Managing Electronic Media Joan M. Van Tassel, Lisa Poe-Howfield, 2010 The book explains the new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management.

The Twittering Machine Richard Seymour, 2020-09-22 A brilliant probe into the political and psychological effects of our changing relationship with social media Former social media executives tell us that the system is an addiction-machine. We are users, waiting for our next hit as we like, comment and share. We write to the machine as individuals, but it responds by aggregating our fantasies, desires and frailties into data, and returning them to us as a commodity experience. The Twittering Machine is an unflinching view into the calamities of digital life: the circus of online trolling, flourishing alt-right subcultures, pervasive corporate surveillance, and the virtual data mines of Facebook and Google where we spend considerable portions of our free time. In this polemical tour de force, Richard Seymour shows how the digital world is changing the ways we speak, write, and think. Through journalism, psychoanalytic reflection and insights from users, developers, security experts and others, Seymour probes the human side of the machine, asking what we're getting out of it, and what we're getting into. Social media held out the promise that we could make our own history—to what extent did we choose the nightmare that it has become?

100 Media Moments That Changed America Jim Willis, 2009-12-09 From the launching of America's first newspaper to YouTube's latest phone-videoed crime, the media has always been guilty of indulging America's obsession with controversy. This encyclopedia covers 100 events in world history from the 17th century to the present—moments that alone were major and minor, but ones that exploded in the public eye when the media stepped in. Topics covered include yellow journalism, the War of the Worlds radio broadcast, the Kennedy-Nixon debates, JFK's assassination, the Pentagon papers, and Hurricane Katrina. These are events that changed the way the media is used—not just as a tool for spreading knowledge, but as a way of shaping and influencing the opinions and reactions of America's citizens. Thanks to the media's representations of these events, history has been changed forever. From classified military plans that leaked out to the public to the first televised presidential debates to the current military tortures caught on tape, 100 Media Moments That Changed America will demonstrate not only an ever-evolving system of news reporting, but also the ways in which historical events have ignited the media to mold news in a way that resonates with America's public. This must-have reference work is ideal for journalism and history majors, as well as for interested general readers. Chapters are in chronological order, beginning with the 17th century. Each chapter starts with a brief introduction, followed by media event entries from that decade. Each entry explains the moment, and then delivers specific details regarding how the media covered the event, America's

response to the coverage, and how the media changed history.

The Media's Role in Defining the Nation David A. Copeland, David Copeland, 2010 In 1897, William Randolph Hearst said that his newspaper did not simply cover events that had already happened. «It doesn't wait for things to turn up», Hearst said. «It turns them up.» This book traces the close relationship between media and the United States' development from the colonial period to the twenty-first century. It explores how the active voice of citizen-journalists and trained media professionals has turned to media to direct the moral compass of the people and to set the agenda for a nation, and discusses how changes in technology have altered the way in which participatory journalism is practiced. What makes the book powerful is that its assessment of the influence and use of media encompasses many levels: it explores the potential of media as an agent for change from within small communities to the national stage.

Media Power Robert Stein, 2005 WHY WE'RE STUFFED WITH INFORMATION BUT STARVED FOR UNDERSTANDING Three decades ago, Media Power predicted the coming of our 24/7 news culture and how it would make us suffer from deprivation by surfeit. Selected by the Book of the Month Club And the Fortune Book Club Robert Stein, an award-winning editor, publisher, media critic and journalism teacher, is a former chairman of the American Society of Magazine Editors. His inquiry leads ultimately to moral concerns and he asks the right questions in abundance. -The New York Times Book Review Keen insights a humanitarian critic. -Public Opinion Quarterly You'll like it. It's salty. - Arnold Gingrich, Founding Editor, Esquire If freedom of the press ever disappears in America it will not be with a bang but a whimper. Well said. -Columbia Journalism Review

Broken News Chris Stirewalt, 2022-08-23 One of America's most experienced and exemplary journalists has written an unsparing analysis of the dreadful consequences -- for journalism and the nation -- of 'how the news lost a race to the bottom with itself.'" -- George F. Will In this national bestseller, Chris Stirewalt, a former Fox News political editor, takes readers inside America's broken newsrooms that have succumbed to the temptation of "rage revenue." One of America's sharpest political analysts, Stirewalt employs his trademark wit and insight to reveal how these media organizations slant coverage -- and why that drives political division and rewards outrageous conduct. The New York Times wrote that Stirewalt's book is an often candid reflection on the state of political journalism and his time at Fox News, where such post-mortem assessments are not common... Broken News is a fascinating, deeply researched, conversation-provoking study of how the news is made and how it must be repaired. Stirewalt goes deep inside the history of the industry to explain how today's media divides America for profit. And he offers practical advice for how readers, listeners, and viewers can (and should) become better news consumers for the sake of the republic.

The Power of the Media Adam Hibbert, 2006-08-01 Debates various issues involving the media, including Is advertising to children wrong?, Should the media be free to report on the private lives of public figures?, and Should the media censor extremists' views?
