Blockchain: Empowering Secure Data Sharing Meng Shen,Liehuang Zhu,Ke Xu,2020-07-15 With the development of big data, data sharing has become increasingly popular and important in optimizing resource allocation and improving information utilization. However, the expansion of data sharing means there is an urgent need to address the issue of the privacy protection – an area where the emerging blockchain technology offers considerable advantages. Although there are a large number of research papers on data sharing modeling and analysis of network security, there are few books dedicated to blockchain-based secure data sharing. Filling this gap in the literature, the book proposes a new data-sharing model based on the blockchain system, which is being increasingly used in medical and credit reporting contexts. It describes in detail various aspects of the model, including its role, transaction structure design, secure multi-party computing and homomorphic encryption services, and incentive mechanisms, and presents corresponding case studies. The book explains the security architecture model and the practice of building data sharing from the blockchain infrastructure, allowing readers to understand the importance of data sharing security based on the blockchain framework, as well as the threats to security and privacy. Further, by presenting specific data sharing case studies, it offers insights into solving data security sharing problems in more practical fields. The book is intended for readers with a basic understanding of the blockchain infrastructure, consensus mechanisms, smart contracts, secure multiparty computing, homomorphic encryption and image retrieval technologies.

The Critical Turn in Tourism Studies Irena Ateljevic,Nigel Morgan,Annette Pritchard,2013-06-17 In today's increasingly complex tourism environment, decision-making requires a rounded, well-informed view of the whole. Critical distance should be encouraged, consultation and intellectual rigour should be the norm amongst managers and there needs to be a radical shift in our approach to educating future tourism and hospitality managers and researchers. This second edition intends to move the debate forward by exploring how critical tourism inquiry can make a difference in the world, linking tourism education driven by the values of empowerment, partnership and ethics to policy and practice. This volume is designed to enable its reader to think through vital concepts and theories relating to tourism and hospitality management, stimulate critical thinking and use multidisciplinary perspectives. The book is organized around three key ways of producing social change in and through tourism: critical thinking, critical education and critical action. Part one focuses on the importance of critical thinking in tourism research and deals with two key topics of our academic endeavours (i) tourism epistemology and theoretical and conceptual developments; (ii) research entanglements, knowledge production and reflexivity. Part two considers 'the university as a site for activism' by mapping out the moral, academic and practical role of educators in developing ethical and responsible graduates and explores the student experience. The final part attempts to provide new understandings of the ways in which social justice and social transformation can be achieved in and through tourism. This timely and thought provoking book which collectively questions tourism's current and future role in societal development is essential reading for students, researchers and academics interested in Tourism & Hospitality.
