Ad Hoc Networks Shiwen Mao, Scott Midkiff, Hua Zhu, 2010-02-17 Ad hoc networks refer to the wireless networking paradigm that covers a variety of network forms for specific purposes, such as mobile ad hoc networks, sensor networks, vehicular networks, underwater networks, underground networks, personal area networks, and home networks. The various forms of ad hoc networks promise a broad scope of applications in civilian, commercial, and military areas, which have led to significant new research problems and challenges, and have attracted great efforts from academia, industry, and government. This unique networking paradigm necessitates re-examination of many established wireless networking concepts and protocols, and calls for developing new fundamental understanding of problems such as interference, mobility, connectivity, capacity, and security, among others. While it is essential to advance theoretical research on fundamentals and practical research on efficient algorithms and protocols, it is also critical to develop useful applications, experimental prototypes, and real-world deployments to achieve a practical impact on our society for the success of this networking paradigm. The annual International Conference on Ad Hoc Networks (AdHocNets) is a new event that aims at providing a forum to bring together researchers from academia as well as practitioners from industry and government to meet and exchange ideas and recent research work on all aspects of ad hoc networks. As the first edition of this event, AdHocNets 2009 was successfully held in Niagara Falls, Ontario, Canada, during September 22-25, 2009.

The Legacy of Kierkegaard John Heywood Thomas, 2011-11-03 John Heywood Thomas was probably the earliest twentieth-century British scholar to study Kierkegaard's texts. Here he offers, as the fruit of a lifetime's devotion to that study, what Kierkegaard would call a fragment--a little of what needs to be said about the legacy of this radical Danish writer, philosopher, and theologian.

This book, based on lectures given at the University of Calgary, seeks to explore different aspects of Kierkegaard's work in its original context and its legacy. Chapters include studies on Kierkegaard the writer (located within the history and development of European literature and nineteenth-century aesthetic theory) and Kierkegaard the philosopher (understood within the context of the development of philosophy in the first quarter of the nineteenth century). Also, since he always described himself as a religious thinker, Kierkegaard's view of religion is explored and in particular his attitude to the possibility of Christianity without the confines of an established church. Because Kierkegaard's philosophy is never separate from his religious thinking, Heywood Thomas also offers studies on the issues of metaphysics in Kierkegaard--its relation to theology, the scope of reason, the problem of time, and the meaning of death. Finally, to appreciate Kierkegaard as a man of his time as well as a man for all seasons, his views on education are considered.

Schopenhauer and the Aesthetic Standpoint Sophia Vasalou, 2013-07-18 With its pessimistic vision and bleak message of world-denial, it has often been difficult to know how to engage with Schopenhauer's philosophy. Schopenhauer's arguments have seemed flawed and his doctrines marred by inconsistencies; his very pessimism almost too flamboyant to be believable. Yet a way of redrawing this engagement stands open, Sophia Vasalou argues, if we attend more closely to the visionary power of Schopenhauer's work. The aim of this book is to place the aesthetic character of Schopenhauer's standpoint at the heart of the way we read his philosophy and the way we answer the question: why read Schopenhauer - and how? Approaching his philosophy as an enactment of the

sublime with a longer history in the ancient philosophical tradition, Vasalou provides a fresh way of assessing Schopenhauer's relevance in critical terms. This book will be valuable for students and scholars with an interest in post-Kantian philosophy and ancient ethics.

Between Kant and Hegel George Di Giovanni, Henry Siltson Harris, 2000 This volume fills a lamentable gap in the philosophical literature by providing a collection of writings from the pivotal generation of thinkers between Kant and Hegel. It includes some of Hegel's earliest critical writings--which reveal much about his thinking before the first mature exposition of his position in 1807--as well as Schelling's justification of the new philosophy of nature against skeptical and religious attack. This edition contains George di Giovanni's extensive corrections, new preface, and thoroughly updated bibliography.

Hegel and Christian Theology : A Reading of the Lectures on the Philosophy of Religion Peter C. Hodgson, 2005-03-03 Peter C. Hodgson engages the speculative reconstruction of Christian

theology that is accomplished by Hegel's Lectures on the Philosophy of Religion, and provides a close reading of the critical edition of the lectures. He analyses Hegel's concept of the object and purpose of the philosophy of religion, his critique of the theology of his time, his approach to Christianity within the framework of the concept of religion, his concept of God, his reconstruction of central Christian themes, and his placing of Christianity among the religions of the world. Hodgson makes a case for the contemporary theological significance of Hegel by identifying currently contested sites of interpretation and their Hegelian resolution.

William Faulkner Richard Godden,2009-01-10 In William Faulkner, Richard Godden traces how the novelist's late fiction echoes the economic and racial traumas of the South's delayed modernization in the mid-twentieth century. As the New Deal rapidly accelerated the long-term shift from tenant farming to modern agriculture, many African Americans were driven from the land and forced to migrate north. At the same time, white landowners exchanged dependency on black labor for dependency on northern capital. Combining powerful close readings of *The Hamlet*, *Go Down*, *Moses*, and *A Fable* with an examination of southern economic history from the 1930s to the 1950s, Godden shows how the novels' literary complexities--from their narrative structures down to their smallest verbal emphases--reflect and refract the period's economic complexities. By demonstrating the interrelation of literary forms and economic systems, the book describes, in effect, the poetics of an economy. Original in the way it brings together close reading and historical context, William Faulkner offers innovative interpretations of late Faulkner and makes a unique contribution to the understanding of the relation between literature and history.

Between the Lines Monique-Adelle Callahan, 2011-04-22 *Between the Lines* examines the role of three women poets of African descent--Frances Harper, Cristina Ayala, and Auta de Souza--in shaping the literary history of the Americas. Despite their different geographic locations, each shared common concerns and wrestled in their works with the sociopolitical predicaments of the late nineteenth century. Their verse vigorously examined slavery and confronted the existential struggle against boundaries imposed by race, nation, and gender. The writers each conceived of the poem as a dynamic forum where new concepts of individual and collective freedoms could be imagined. In their work readers encounter the poem as a site of cross-cultural exchange, a literary space in which the boundaries of nation can be redefined. *Between the Lines* places national poetics in a global economy of identities, histories and languages. It looks to poetry to demonstrate how people translate from one cultural or linguistic arena to another, how literary expression writes identities, and how language is used to conceptualize history. The book is the first to juxtapose Cuba, Brazil and the United States in a study of nineteenth-century women's poetry, and the first to include the Lusophone literary tradition in a comparative study of African descendants in Latin America, the U.S., and the Caribbean. With close readings and expertly rendered translations, Monique-Adelle Callahan situates the work of these three poets in a hemispheric context that opens up their writing to new interpretations and expands the definition of African American literature.

God Lois Malcolm, 2012-09-28 This volume provides an excellent collection of primary source documents from key Christian theologians that show ways in which God has been understood throughout the history of Christian thought. Malcolm surveys the major features which have marked theological understandings of God throughout six distinct periods, including the early church, the medieval era, the Reformation, modernity, the twentieth-century, and the present day. She describes the historical contexts and theological relevance of each of these works, which have helped shape the various ways Christians have come to understand God. This book will be particularly valuable to students of theology by providing significant insights from these important and accessible texts.
