Samuel Wells

**The Archaeology of a Great Estate** Nicola Bannister, John Barnatt, 2009-08-25 The Peak District is a historic upland landscape, with a rich palimpsest of features which invoke the many generations of people who have inhabited the area. The great estate of Chatsworth reflects the Peak in microcosm. Its landscapes are diverse and contain many exceptional features including archaeological earthworks of medieval open fields and later enclosures in the park, and prehistoric stone circles, barrows, fields and settlements on the Estate moorlands. This book tells the story of the historic landscape and its archaeology; it is a companion volume to Chatsworth: A Landscape History (Barnatt & Williamson), but in contrast to that book includes the whole of the Estate landscape, including the extensive farmland and moorlands beyond the park and concentrates on visible archaeology and what it can tell us about the past. The result is a fascinating in-depth portrait of one of the major estates in Britain.

*Arthurian Studies in Honour of P.J.C. Field* Bonnie Wheeler, 2004 Studies range over the whole field of Arthurian literature, in Europe and North America, with special focus on Malory and Morte Darthur.

*Easy Programming with the TI-99/4A* Richard Guenette, 2012-12-06 Welcome to the world of computer programming. Your Texas Instruments TI-99/4A is a real 16-bit microcomputer, complete with sound and color graphics. Making these features do what you want may seem impossible at first, but don't worry; there's nothing mysterious about computer programming. Learning to program computers simply means learning a new language-in this case, TI BASIC (for Beginner's All purpose Symbolic Instruction Code), a version of the most popular language used on today's microcomputers. This book will teach you, step by step, how to tell your machine what you wish it to do-in other words, how to program it. But that's not all. You'll also find chapters on general microcomputer principles, cassette deck use, the TI-99/4A as a terminal for much larger systems, options for expansion, and a list of resources for getting the most out of your home computer. With the 99/4A you have access to a large library of programs, or software, already written by someone else. Without knowing anything about programming, you can use this software to play games, learn math, or store addresses. But at some point you'll want to make your personal computer really personal. You might want to create your own video game or compose a tune. And that's when you'll want to learn programming.

**Maritime Simulation** Moshe R. Heller, 2012-12-06 Welcome to Bavaria - Germany and to the First Intercontinental Maritime Simulation Symposium and Mathematical Modelling Workshop. A triennial international conference jointly promoted by Control Data, IMSF and SCS, which takes place at Schliersee, a small town near the Alps. The aim of the Symposium is to cover most of the aspects of maritime modelling and simulation in theory and practice, to promote the exchange of knowledge and experience between different international research groups in this field, and to strengthen the international contact between developers and users of modelling and simulation techniques. On the occasion of the Symposium people of scientific and engineering disciplines will meet to discuss the state-of-the art and future activities and developments. A large number of contributed papers has been strictly examined and selected by the papers committee to guarantee a high international standard. The book contains the accepted papers which will be presented at the Symposium. The papers have been classified according to the following topics: VI 1. Fifth Generation Computer Technology 2. Simulation-Software-Tools 3. An Industrial Computer System - The Chrysler Story 4. Marine Mathematical Modelling 5. CFD for Marine Vehicles 6. Navigation Methodology 7. Marine Maneuvering and Motion Simulation 8. Off-Shore Modelling 9. Steering and Control of Marine Vehicles 10. Training and Traffic Control 11. Under-Water Vehicles Operation Authors from 9 countries will meet at the Symposium.

*Amorous Games* James Woodrow Hassell, 2014-07-29 Among the more interesting incunabula preserved in the Salle de la Réserve of the Bibliothèque National in Paris are the apparently unique copies of two editions, very similar in content, of a work entitled Les Adevineaux amoureux. In much more comprehensive form Les Adevineaux amoureux is preserved in a manuscript belonging to the Musée Conde at Chantilly. All three texts, in medieval French, appear to date from the 1470s. The present work, Amorous Games, is a critical edition of Les Adevineaux amoureux. Amorous Games is a miscellany whose principal unifying force is the compiler's aim to provide a manual of conversation and entertainment for polite society. Included are series of questions and answers belonging to the well-established medieval tradition of the Demandes amoureuses; a very large number of riddles, mainly folk riddles; and venditions en amours, little poems that apparently came into being as part of a social game. Students of medieval French literature, particularly those with a penchant for some of the minor genres, will find new material in the Amorous Games.

Folklorists will discover what is probably the largest collection of riddles bequeathed to us by medieval France and also much that is of value to specialists in the proverb and folk tale. For this critical edition of Les Adevineaux amoureux Professor Hassell has selected the Chantilly manuscript, because it is the most complete and also because it had not yet been published. The Appendix contains the text of the more complete of the two incunabula and the significant variants appearing in the other fifteenth-century printed edition. The manuscript text has been collated with that of the incunabula, and copious notes and an index to the riddles have been supplied. In his introduction Professor Hassell discusses in detail the major classes and subclasses of the riddle, drawing on the work of Petsch, Taylor,

Abrahams, and other scholars of the genre.
