Anatomy of the Works Minis Brian

Moylan, 2011-11-16 Particularly famous for their great adventures in the Monte Carlo rally, works Minis humbled many bigger and more powerful cars during the 1960s and 1970s. Mechanic Brian Moylan spent 22 years in the workshops of the BMC Competitions Department where the works cars were built. Here, all the secrets of how ordinary production line Mini Coopers were converted into the mighty giant-killing Minis of motorsport are revealed in full. Contributions from 'Ginger' Devlin & 'Jumping Jeff' Williamson reveal in detail the modifications to the works racing and rallycross cars respectively. " ... invaluable to anyone restoring a period car ... good stuff if you're into nuts and bolts, and top value." - Classic & Sports Car " ... a technical profile on the various modified Minis that were produced by the BMC competitions department for racing, rallying and rallycross. Separate chapters ... all backed up by appendices on the race and rallycross cars ... complete a package that will interest competitive Mini pilots" - Classics

The Last Works Minis Bryan Purves, Tim

Brenchley, 2014-08-20 The Mini, the car of the 20th Century and still in motorsport in 1997, 35 years after its 1st event. This is its story. In the 60s the BMC works teams using Minis were virtually unstoppable in their quest for recognition in the big world of rallying, they succeeded where others had failed and the BMC works teams were at the time probably the envy of the motorsport world. They introduced to the enthusiast the Special Tuning or ST as it was later known, a range of tuning products that the public could buy and fit to their own cars thus using the very same parts that the works team were using. Sadly the competition department was wound down and the ST finally went the same way in 1980. Imagine the excitement that hit the media when in

the Autumn of 1993 Rover officially announced that they would fund the build of several cars to once again campaign the world famous Rallye Monte Carlo. Although they were not works cars, the large contribution of materials and money to the project it was regarded as tantamount to funding a works team, especially when Paddy Hopkirk was named as one of the drivers. It was this that started 4 years of Works backed mini s to varying degrees, culminating in 1996 to a full works backed team of 2 cars and a full campaign of rallies and races for the three years. Typically the Mini of the 90 s, similarly to the Mini of the 60 s, carried with it a fair degree of controversy. Over the next four years there was plenty of it, with money being diverted by the sponsor from one team to another, one car even being stolen and top rallying stars carrying out secret test sessions, being just a few examples. All of this using cars that were designed way back in the 50 s and even still using the same basic design of engine and gearbox against competitors who were using cars designed over thirty years later with modern engines and transmissions. This book highlights how the use of fuel injection, distributor-less ignition, six speed gearboxes and modern tyres all helped to bring the mighty mini once again to the foreground of modern rallying and racing. In 1996 the ST range of competition parts was re-introduced, with the parts coming from the latest 1996 build of works cars but once again in mid 1997 the project was pulled amid secrecy, sackings and bitter recriminations that even to this day have prevented the authors from being able to speak to those that were involved behind the scenes at the end of the line for the Last Works Minis . With many unseen photo s of the cars development, copies of Rovers internal documents, copy pages from the road books of top rallies, all of this in colour this book truly brings this previously untold story to life.

The Mini Story Giles Chapman,2011 Very few cars inspire as much affection as the original Mini. It's the small car everyone loves to eulogise because it oozes energetic fun, classless minimalism and evergreen style.But it's also of massive historical importance: the 1959 Mini, designed by Alec Issigonis, set the template from which all successful compact cars have been created ever after. It was the technological wonder of its age. The original Mini was on sale for 41 years, during which its 5.3m sales made it the best-selling British car of all time - an achievement unlikely ever to be beaten.And just when it looked like the little car would shrivel and die, BMW had the vision to reinvent it as the planet's most desirable small car range, and put it back on the serious motoring map as the MINI.Here, award-

winning writer Giles Chapman tells the whole, amazing story.
