Computer Science Logo Style: Symbolic

computing Brian Harvey, 1997 This series is for people--adults and teenagers--who are interested in computer programming because it's fun. The three volumes use the Logo programming language as the vehicle for an exploration of computer science from the perspective of symbolic computation and artificial intelligence. Logo is a dialect of Lisp, a language used in the most advanced research projects in computer science, especially in artificial intelligence. Throughout the series, functional programming techniques (including higher order functions and recursion) are emphasized, but traditional sequential programming is also used when appropriate. In the second edition, the first two volumes have been rearranged so that illustrative case studies appear with the techniques they demonstrate. Volume 1 includes a new chapter about higher order functions, and the recursion chapters have been reorganized for greater clarity. Volume 2 includes a new tutorial chapter about macros, an exclusive capability of

Berkeley Logo, and two new projects. Throughout the series, the larger program examples have been rewritten for greater readability by more extensive use of data abstraction. Volume 1 Symbolic Computing, is addressed to a reader who has used computers and wants to learn the ideas behind them. Symbolic computing is the manipulation of words and sentences, in contrast both to the graphics most people associate with Logo and to the numerical computation with which more traditional languages such as Pascal and C++ are most comfortable. This volume is well known for its clear and thorough presentation of recursion, a key idea in computer science that other texts treat as arcane and difficult. The Logo programs in these books and the author's free Berkeley Logo interpreter are available via the Internet or on diskette.

Home Learning Environments for Young Children Cathy Nutbrown,Peter Clough,Kay Davies,Peter

Hannon,2022-04-07 By bringing together research evidence on effectively supporting parents to engage with their children's early learning, and the role of education professionals in developing partnerships with families, this book focuses on partnerships between professionals and parents to enhance family learning for young children in literacy and other aspects of early learning. The move towards setting, home-based, and online learning has accelerated, and it is important for both students and practitioners to value parents' roles in their young children's learning; to consider how parents can support young children's learning in these scenarios, and how to apply this in practice with children aged birth to five. Through a wealth of case studies from real experience, the authors showcase an inspiring range of inclusive projects and approaches with families, including marginalised groups such as bilingual learners, fostering families, and families identified as 'vulnerable' including imprisoned fathers and children with specific learning needs.

Subotta,2015-05-07 Governments must work tirelessly to update their preparedness for dealing with natural and man-made disasters, as well as taking account of the increasingly present threat of terrorism. Efficient international cooperation is key to achieving safety and internationalizing security policy. This book presents the proceedings of the NATO Advanced Research Workshop (ARW) Engaging the Public to Fight the Consequences of Terrorism and Disasters, held in Tbilisi, Georgia, in June

2014. The purpose of the workshop was to analyze accumulated European theoretical knowledge and practical experience in the field of disaster prevention and the involvement of the public in preventing and fighting the consequences of terrorism, as well as natural and man-made disasters. There was a particular focus on the perspective of the region, especially with a view to meeting European Union standards and setting uniform and independent standards for hazard and risk assessment methods. The protection of economically critical infrastructure, such as dams, pipelines and transport and storage facilities, was addressed as were the issues of managing water and non-renewable resources, the disposal of dangerous chemicals and radioactive waste, and defensible methods of transport for fuel supplies and key personnel. Contributions reflected the extensive experience of the participating NATO and partner countries, including Armenia, Austria, Bulgaria, Georgia, Germany, Italy, Moldova, the Netherlands, Romania, Turkey and Ukraine as well as international organizations such as UNECE and NATO.

Hand Over Fist Kevin D. Glenn,2014-07-08 Incivility among Christians has been referred to as a "cannibal culture, " "venomous, " "pandemic, " and "anything but Christlike." Why is it so hard for Christians to have a civil conversation anymore? We need the humility to open our hands and ask for help, the boldness to lift up our hand to incivility and say, "Enough, " and the confidence to hold out our hand to offer help and guidance to others. That's hard to do with a clenched fist. Hand Over Fist provides the Christian community with tools to recognize various forms of conflict, interpret those conflicts appropriately, and engage those conflicts through a process that equips and empowers Christians to participate in civil discourse. And the solution to all of it is in the palm of your hand.
