Learning All The Time John Holt,1990-01-22 The essence of John Holt's insight into learning and small children is captured in *Learning All The Time*. This delightful book by the influential author of *How Children Fail* and *How Children Learn* shows how children learn to read, write, and count in their everyday life at home and how adults can respect and encourage this wonderful process. For human beings, he reminds us, learning is as natural as breathing. John Holt's wit, his gentle wisdom, and his infectious love of little children bring joy to parent and teacher alike.

The First 20 Hours Josh Kaufman,2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Time to Teach, Time to Learn Chip Wood,1999 In this groundbreaking book on school reform, Chip Wood boldly confronts the epidemic of busyness in our nation's K-8 schools. He shows how changing the way we use time will transform our schools from the fact factories they have become into the democratic communities of learning which they can and should be, schools in which the pace of the day encourages investigation, contemplation, completion, and community.

See Time Daniel Liebowitz,2019-10-10 Teach secrets to telling time! From the daily cycle of day and night, to the seconds, minutes and hours that measure them, children easily learn how to tell time with a creative, right-brain system-especially those struggling with conventional methods. Sunrise, sunset, and daily activities all help to solve the clock's mystery in this book.

It's About Learning (and It's About Time) Louise Stoll,Dean Fink,Lorna Earl,2005-08-18 The purpose of this book is to re-orient the current agenda in education towards learning. The recent emphasis has been on achieving standards through managing schools, teachers and the teaching process. But the real purpose of schools was, is, and always will be about learning. In an increasingly complex, diverse and unpredictable world, it is necessary for schools and those working with them to refocus on learning at all levels - pupils, teachers, leaders, the organisation as a whole and all of the school's partners. *It's About Learning* is a clear and well written discussion woven with practical examples and strategies. It also includes an annotated bibliography suggesting useful follow-up reading, and the issues are posed as questions for reflection and discussion.

Extending Learning Time for Disadvantaged Students: Profiles of promising practices ,1995

Time to Learn George Harrison Wood,2005 More than one school's story, *Time to Learn* uses the story of Federal Hocking High School's metamorphosis as a case study for understanding the mechanisms of high-quality high school reform.

Lives of the Scientists Kathleen Krull,2016-09-06 Scientists have a reputation for being focused on their work—and maybe even dull. But take another look. Did you know that it's believed Galileo was scolded by the Roman Inquisition for sassing his mom? That Isaac Newton loved to examine soap bubbles? That Albert Einstein loved to collect joke books, and that geneticist Barbara McClintock wore a Groucho Marx disguise in public? With juicy tidbits about everything from favorite foods to first loves, the subjects of Kathleen Krull and Kathryn Hewitt's *Lives of the Scientists: Experiments, Explosions (and What the Neighbors Thought)* are revealed as creative, bold, sometimes eccentric—and anything but dull.

Time to Learn Christopher Gabrieli,Warren Goldstein,2008-04-25 Across the country, an educational revolution is taking root. Kids are learning more. Teachers are free to teach beyond the test. And parents aren't worried about what their kids are up to after school. What accounts for this change? The simple answer is, "More time to learn." The current school day—6 hours and 180 days per year—is obsolete. It fails to provide students with the academic foundations and well-rounded education they need to succeed and thrive in the twenty-first century. The old school day is also out of step with the reality of working families without a stay-at-home parent to manage their children's after-school time. Using an additional one to two hours, the new school day reworks the schedule so that children can master core academic subjects, receive individualized instruction and tutoring, and be exposed to a broad array of topics such as the arts, music, drama, and sports.

Managing Learning Time Ida Halasz,1984

Expanded Learning Time and Opportunities Helen Janc Malone,2011-10-25 Expanding the learning day is gaining national momentum as an important school-improvement and whole-child development strategy. This issue focuses on school-community partnerships that provide a seamless, longer learning day that best meets the academic (Expanded Learning Time or ELT) and developmental (Expanded Learning Opportunities or ELO) needs of high-poverty students in resource-poor communities. First it draws attention to the importance of ELOs and offers contours of the ELT-ELO partnerships through research evidence and policy analysis. It then covers both in practice and features a spectrum of ELT-ELO partnerships, from less to more integrated models. The issue pays close attention to: The central role ELOs play in ELT schools The changing safeguards for community-based organizations Ways in which current education policy is shaping the approach of schools and community partners to learning and development. This is the 131st volume of New Directions for Youth Development, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions.
