Abstract State Machines 2004. Advances in Theory and Practice Wolf Zimmermann,Bernhard Thalheim,2004-04-27
Abstract state machines (ASM) sharpen the Church-Turing thesis by the consideration of bounded resources for computing devices. They view computations as an evolution of a state. It has been shown that all known models of computation can be expressed through specific abstract state machines. These models can be given in a representation-independent way. That is one advantage of transferring these models to ASM. The main advantage is, however, to provide a unifying theory to all of these models. At the same time ASM can be refined to other ASMs. Stepwise refinement supports separation of concern during software development and will support component-based construction of systems thus providing a foundation of new computational paradigms such as industrial programming, programming-in-the-large, and programming-in-the-world. ASM 2004 continued the success story of the ASM workshops. Previous workshops were held in the following European cities: Taormina, Italy (2003); Dagstuhl, Germany (2002); Las Palmas de Gran Canaria, Spain (2001); Monte Verita, Switzerland (2000); Toulouse, France (1999); Magdeburg, Germany (1998); Cannes, France (1998, 1997); Paderborn, Germany (1996); and Homburg, Germany (1994). The ASM workshops have had predecessors, e.g., the famous Lipari Summer School in 1993, whose influential outcome was the fundamental Lipari Guide.

A Political Sociology of Transnational Europe Niilo Kauppi,2014-02-14 Globalisation and complex Europeanisation are two significant challenges currently influencing the restructure of the European nation-state, and redefining political power. For this volume, first-rate European scholars look at the consequences of these and other challenges faced by European societies. Contributions revisit traditional objects of political science - state sovereignty, civil society and citizenship - mixing sophisticated empirical analyses with methodological and conceptual innovations including field theory, multiple correspondence analysis, and the study of space sets. Combining qualitative and quantitative research techniques, and macro- and micro-levels, chapters have in common a contextual analysis of politics through scrutiny of configurations of groups, representations and perceptions. A transnational perspective is the common thread linking every study in this volume, which seeks to avoid methodological nationalism.
