Mr. Mig Paul T. Entrekin,2012-07-11 As indicated by the subtitle, “The Real Story of the First MiGs in America”, this is a collection of stories that offer, for the first time, a concise depiction of many first-hand accounts of how these jets were acquired. In addition to historical facts and figures dating to the inception of the Russian Mikoyan-Gurevich design bureau, substantial effort has been taken to expose myths and bring to light facts that are significant and important regarding how, where, when and why the MiG aircraft were obtained and who obtained them. In addition to the history of the MiG jet’s inception, the modern day stories of the people in America that acquired them are no less intriguing. As a bonus, you’ll learn of the experiences of the first person to own and operate a MiG in the United States and the free world including a peek into the arena of airshow flying.

*MiG Aircraft Since 1937* Bill Gunston,Yefim Gordon,1998 MiG Aircraft since 1937 reunites Bill Gunston, and Moscow-based Yefim Gordon, who previously worked together on Yakovlev Aircraft since 1924, also in the Putnam series. With their contacts in Russia, the authors have been allowed unprecedented access to the archives of both the former Soviet Union's design bureaux and the MiG company itself. As a result, they present here the first definitive and fully accurate work of reference on all the MiG designs, complete with hundreds of photographs and drawings - several of which have never been published before - as well as previously unrecorded details of MiG variants.

MiG Master, Second Edition Barrett Tillman,2014-03-15 To be equally enjoyed by professional aviators and aviation buffs with limited technical knowledge, this biography brings to life the legendary aircraft that scored the highest kill ratio of any U.S. fighter aircraft in the Vietnam War. The book is filled with authentic re-creations of Crusader-MiG fights and vivid descriptions of the people and events that are part of the F-8 story, including John Glenn's 1957 record-breaking flight across the United States in three hours and twenty-three minutes. As the Navy's first supersonic aircraft, the Crusader holds an honored spot in carrier flying, and the author shows why it is called one of the most capable, versatile, and long-lived aircraft in naval aviation history. Barrett Tillman effectively combines an exciting account of the F-8's operational history with a detailed and authoritative explanation of its design, construction, and modifications. Tillman recalls the years of frustration and experimentation spent in refining the aircraft and its gunnery system, and then takes the reader through key actions in Vietnam where seasoned pilots handled their rambunctious steeds with scarcely a glance in the cockpit. Extensive appendixes provide further details.

Mikoyan-Gurevich MiG-21 Alexander Mladenov,2014-06-20 The MiG-21 (NATO reporting name Fishbed) firmly holds the title of the world's most widely built and used jet fighter, with more than 10,000 units rolling off the lines of three plants in the former Soviet Union. The type was also built under license in India and Czechoslovakia, and without license in China until the late 2000s. Designed as a Mach-2 light tactical fighter, its original prototype, the Ye-6/1, was first flown in 1958. The first production variant of the type, designated the MiG-21F, appeared in 1960 and its improved sub-variant, the MiG-21F-13 (Type 74, NATO reporting name Fishbed-C), was made available for export by 1961. It was a simplified daytime short-range, clear-weather interceptor and tactical fighter.

*Mr. MiG* Paul Entrekin,2022-11 The Soviet-built MiG-15 swept-wing fighter startled the world when it was introduced into combat during the Korean War in the early 1950s. The West had no idea that Russia could produce such a capable fighter. Some 35 years later, former Marine aviator Paul Entrekin burst onto the North American Air Show circuit with the first civilian-owned MiG-15. His story tells of the myriad of challenges in obtaining, test-flying, licensing this first-of-its-kind air show aircraft. It's a walk down memory lane that includes some of the most well-known names in aviation and shares the ups and downs, joys, triumphs, and also the tragedies and bitter losses of friends and fellow aviators. Mr. MiG is an engaging, informative, and entertaining story that any aviation aficionado will enjoy.

**Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions** Nato,2008-09 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the ‘Fishbed’. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world’s air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

**MiG-21 Units of the Vietnam War** István Toperczer,2012-11-20 Having honed their piloting skills on the subsonic MiG-17 and transonic MiG-19, the Vietnamese Peoples' Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the USAF, Navy and Marine Corps crews striking at targets deep into communist territory. Most of the VPAF's 12+ aces scored their bulk of their kills in the MiG-21, which was then the best fighter produced by Russia's premier fast jet manufacturer, Mikoyan Gurevich. Well over 200 MiG-21s were supplied to the VPAF, and the numerous models and the schemes they wore are chronicled in great detail in this unique volume.

**Flight Craft 8: Mikoyan MiG-31** Yefim Gordon,Dmitriy Komissarov,2011-10-30 The MiG-31 started life as an advanced derivative of the famous MiG-25P interceptor, becoming the first Soviet fourth-generation combat aircraft. First flown in 1975, it differed from its progenitor primarily in having a crew of two (pilot and weapons systems operator), a highly capable passive phased-array radar \_ a world first \_ and new R-33 long-range missiles as its primary armament. The maximum speed was an impressive Mach 2.82, the cruising speed being Mach 2.35. The type entered service in 1981; more than 500 copies were built between 1981 and 1994. The powerful radar and other avionics allowed the MiG-31 to operate as a 'mini-AWACS' scanning the airspace and guiding other interceptors to their targets; a flight of three such aircraft in line abreast formation could cover a strip 800 km (500 miles) wide. To this day the MiG-31 remains one of the key air defence assets of the Russian Air Force. The book describes the MiG-31's developmental history, including upgrade programmes, and features a full and comprehensive survey of the various MiG-31 model-making kits currently available on the market.

**MiG** Rudolf Hofling,2015 At the beginning of the Second World War, MiG was founded by two aircraft engineers, Artyom Mikoyan and Mikhail Gurevich. Thus began a unique history. For decades, MiG aircraft have been among the most well-known and powerful military aircraft in the world and broke a number of records, both through their flight performance and with their large production numbers. Starting with the MiG-1 from 1939 to the MiG-35 of the year 2011, the world famous aircraft manufacturer and its products are presented in this Fact File edition. Numerous pioneering prototypes are described.

MiG-3 Aces of World War 2 Dmitriy Khazanov,2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

*Mikoyan Mig-29 Fulcrum Pilot's Flight Operating Manual (in English)* North Atlan Treaty Organization (Nato),2007-08-01 En instruktionsbog (Flight Manual) for MiG-29 Fulcrum.

*America’s Secret MiG Squadron* Gaillard R. Peck, Jr,2012-07-20 The personal account of the original “Red Eagle” of the establishment, equipment, and training practices of the highly classified MiG squadron of the USAF. America's Secret MiG Squadrons is the story of a group of incredibly brave military pioneers who put their lives on the line to establish a training program that would prepare the US Air Force for a potential Cold War battle with Soviet aircraft. As a F-4 Phantom II pilot in Vietnam, Col. Peck had been shocked by the technological abilities of Soviet-built aircraft, and at the poor level of training available to US pilots to aid them in their battles with Soviet MiGs in the skies over Vietnam. Working with the support of Gen Hoyt S. Vandenberg, Jr., and under conditions of extreme secrecy, the CONSTANT PEG program was launched with Peck as the original Red Eagle. This is the fascinating history of the men who trained to fly and maintain covertly obtained MiGs, for the first time providing an insider's perspective, personal anecdotes, and photographs, revealing how Peck battled bureaucracy and scepticism to ultimately establish the premier fighter pilot training center – the real Top Gun.

*Mikoyan MiG-29 Fulcrum* Yefim Gordon,E. Gordon,1999 Developed to meet the Soviet Union's requirement for a dual fighter and ground-attack aircraft, the MiG-29 entered operational service in 1983. Russian author and aviation expert Yefim Gordon interviews Mikoyan design and engineer personnel to reveal the development and operational history of the MiG-29. With access to all design and production records, as well as declassified technical drawings and photographs, Gordon has assembled the ultimate reference to this Cold War fighter, of which an estimated 500 are still believed to be in service around the globe, including in Russia, Bulgaria, Cuba, Czechoslovakia, Hungary, India, Iraq, Iran, Poland and Malaysia.

*MiG-17/19 Aces of the Vietnam War* István Toperczer,2016-10-20 At the beginning of the Vietnam War, the Vietnam People's Air Force (VPAF) were equipped with slow, old Korean War generation fighters – a combination of MiG-17s and MiG-19s – types that should have offered little opposition to the cutting-edge fighter-bombers such as the F-4 Phantom II, F-105 Thunderchief and the F-8 Crusader. Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority. Taking advantage of their jet's unequalled low-speed maneuverability, small size and powerful cannon armament they were able to take the fight to their missile-guided opponents, with a number of Vietnamese pilots racking up ace scores. Packed with information previously unavailable in the west and only recently released from archives in Vietnam, this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam.

**MiG-21 Aces of the Vietnam War** István Toperczer,2017-09-21 Having learned their trade on the subsonic MiG-17, pilots of the Vietnamese People's Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the US Air Force, US Navy and US Marine Corps crews striking at targets deep in communist territory. Although the communist pilots initially struggled to come to terms with the fighter's air-search radar and weapons systems, the ceaseless cycle of combat operations quickly honed their skills. Indeed, by the time the last US aircraft (a B-52) was claimed by the VPAF on 28 December 1972, no fewer than 13 pilots had become aces flying the MiG-21. Fully illustrated with wartime photographs and detailed colour artwork plates, and including enthralling combat reports, this book examines the many variants of the MiG-21 that fought in the conflict, the schemes they wore and the pilots that flew them.

*A MiG-15 to Freedom* No Kum-Sok,J. Roger Osterholm,2007-04-25 On September 21, 1953, U.S. airmen at Kimpo Air Base near Seoul, Korea, were startled to see landing a MiG-15, the most advanced Soviet-built fighter plane of the era, piloted by Senior Lieutenant No Kum-Sok, a 21-year-old North Korean Air Force officer. Once he landed, Lieutenant No found that his mother had escaped to the South two years earlier, and they were soon reunited. At his request, No came to the United States and became a U.S. citizen. His story provides a unique insight into how North Korea conducted the Korean War and how he came to the decision to leave his homeland.

**MiG-17 and MiG-19 Units of the Vietnam War** István Toperczer,2012-11-20 The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period.

*The MiG-21* Holger Müller,Motorbuch,2019-01-28 This book presents a detailed look at the design and development of the legendary MiG-21, including its powerplant, armament, upgrades, and variants. The Mikoyan-Gurevich MiG-21 was the standard fighter/interceptor aircraft of the Warsaw Pact and it stood up to its western counterparts for decades. This single-engine, supersonic jet fighter entered service in 1959, and in addition to the Soviet Union, almost every eastern European military operated the Mach 2 fighter, including East Germany (which flew more than 500 aircraft of this type), Poland, Romania, Yugoslavia, and others. With approximately 11,000 of all types built, the MiG-21 has been produced in greater numbers than almost any other combat aircraft in history, and has also seen combat with such countries as Vietnam, China, Syria, Iraq, Angola, and others.
