Social-Behavioral Modeling for Complex Systems Paul K. Davis, Angela O'Mahony, Jonathan Pfautz, 2019-03-18 This volume describes frontiers in social-behavioral modeling for contexts as diverse as national security, health, and on-line social gaming. Recent scientific and technological advances have created exciting opportunities for such improvements. However, the book also identifies crucial scientific, ethical, and cultural challenges to be met if social-behavioral modeling is to achieve its potential. Doing so will require new methods, data sources, and technology. The volume discusses these, including those needed to achieve and maintain high standards of ethics and privacy. The result should be a new generation of modeling that will advance science and, separately, aid decision-making on major social and security-related subjects despite the myriad uncertainties and complexities of social phenomena. Intended to be relatively comprehensive in scope, the volume balances theory-driven, data-driven, and hybrid approaches. The latter may be rapidly iterative, as when artificial-intelligence methods are coupled with theory-driven insights to build models that are sound, comprehensible and usable in new situations. With the intent of being a milestone document that sketches a research agenda for the next decade, the volume draws on the wisdom, ideas and suggestions of many noted researchers who draw in turn from anthropology, communications, complexity science, computer science, defense planning, economics, engineering, health systems, medicine, neuroscience, physics, political science, psychology, public policy and sociology. In brief, the volume discusses: Cutting-edge challenges and opportunities in modeling for social and behavioral science Special requirements for achieving high standards of privacy and ethics New approaches for developing theory while exploiting both empirical and computational data Issues of

reproducibility, communication, explanation, and validation Special requirements for models intended to inform decision making about complex social systems

Michelin Man Olivier Darmon,1998 Subtitled: 100 Years of Bibendum. This graphic volume celebrates the life and work of one of the world's most universally recognized and brilliant marketing figures. Throughout this century Bibendum's images have conveyed the message of a firm that has successfully branched out beyond the tire business into all sectors of the travel industry, from maps and travel guides to the creation of road signs and the numbering of highways, as seen here in lavishly illustrated sketches, artwork and photographs from the Michelin Tyre Company's archives. Only available through Classic Motorbooks. Hdbd., 9 3/4 x 12 1/2, 144 pgs., 100+ b&w ill., 100+ color.

S'épanouir Arianna Huffington,2015-04-29 Comment vraiment réussir ?En dormant de vraies nuits complètes. En apprenant à dissiper le stress et l'impression tenace que nous sommes plongés dans

une famine temporelle, manquant sans cesse de temps pour faire ce que nous avons à faire. En apprenant à nous débrancher et en nous reconnectant à nous-même. En nous étonnant de la vie et en donnant aux autres. En nous ressourçant par la marche, la méditation ou des exercices de pleine conscience. Voilà la réponse provocatrice, mais très sage, d'Arianna Huffington dans son livre, *S'épanouir*. En effet, à quoi bon réussir si le succès n'est pas tenable physiquement et mentalement ? La culture d'entreprise occidentale se nourrit dans les faits de stress, de manque de sommeil et d'épuisement. La maladie du siècle qui nous guette et en rattrape beaucoup, c'est le burn-out. À longue échéance, l'argent et le pouvoir en soi sont comme un tabouret à deux pieds : on peut s'y tenir en équilibre un moment, mais on finit inévitablement par se casser la figure. Il faut intégrer un troisième paramètre, le bien-être. Si nous ne redéfinissons pas la réussite, le prix à payer, notamment en termes de santé, continuera à augmenter, comme Arianna Huffington l'a appris à ses dépens. Elle a décidé d'œuvrer à transformer notre idée de la réussite. C'est une nouvelle révolution qui s'amorce. Récit souvent intime, documenté de nombreuses études scientifiques très récentes, son livre est destiné à nous aider à opérer la transition entre la conscience de ce qu'il faudrait faire et sa réalisation concrète. Il dessine pour chacun le chemin qui mène à l'épanouissement. Arianna Huffington est née en Grèce. Après des études d'économie à Cambridge en Angleterre, elle choisit de s'installer aux États-Unis à l'âge de vingt-cinq ans. Journaliste, elle fonde en 2005 le Huffington Post, site d'actualité qui remporte un succès immédiat, avant de connaître une expansion internationale : il compte aujourd'hui une douzaine de déclinaisons, dont une édition française.

Strategy and Management of Industrial Brands Philippe Malaval, 2012-12-06 Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to

the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first

English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war
- has an introduction and extensive background notes by the modern English historian Paul Harris.

High Solid Binders Mircea Manea,2009-01-15 To conserve resources, protect the environment, and yet formulate high performance coatings at an acceptable cost: these challenges are readily met by high solids. Such systems are the epitome of high performance and low environmental impact. They are usually the best option where solvent-borne systems would otherwise be the only choice. This book delivers comprehensive knowledge in the field of high solid systems. More especially, it provides an overview of the various classes of binders and ways of transforming them into high solid binders. It lists a broad range of options and approaches for tackling technological and environmental problems.

Nanomaterials, Polymers and Devices E. S. W. Kong,2015-04-13 Providing an eclectic snapshot of the current state of the art and future implications of the field, Nanomaterials, Polymers, and Devices:

Materials Functionalization and Device Fabrication presents topics grouped into three categorical focuses: The synthesis, mechanism and functionalization of nanomaterials, such as carbon nanotubes, graphene, silica, and quantum dots Various functional devices which properties and structures are tailored with emphasis on nanofabrication. Among discussed are light emitting diodes, nanophotonic, nano-optical, and photovoltaic devices Nanoelectronic devices, which include semiconductor, nanotube and nanowire-based electronics, single-walled carbon-nanotube based nanoelectronics, as well as thin-film transistors

The Complexity of Social Norms Maria Xenitidou, Bruce Edmonds, 2014-05-28 This book explores the view that normative behaviour is part of a complex of social mechanisms, processes and narratives that are constantly shifting. From this perspective, norms are not a kind of self-contained social object or fact, but rather an interplay of many things that we label as norms when we 'take a snapshot' of them at a particular instant. Further, this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them. The sort of issues that this perspective opens to exploration include: Of what is this complex we call a social norm composed of? How do new social norms emerge and what kind of circumstances might facilitate such an appearance? How context-specific are the norms and patterns of normative behaviour that arise? How do the cognitive and the social aspects of norms interact over time? How do expectations, beliefs and individual rationality interact with social norm complexes to effect behaviour? How does our social embeddedness relate to social constraint upon behaviour? How might the socio-cognitive complexes that we call norms be usefully researched?

We3 Grant Morrison, 2005-07-01 A powerful tale from the ALL-STAR SUPERMAN team of Grant Morrison and Frank Quitely. Morrison and Quitely deliver the emotional journey of WE3□three house

pets weaponized for lethal combat by the government—as they search for home and attempt to ward off the shadowy agency that created them. With nervous systems amplified to match their terrifying mechanical exoskeletons, the members of Animal Weapon 3 (WE3) have the firepower of a battalion between them. But they are just the program's prototypes, and now that their testing is complete, they're slated to be permanently decommissioned, causing them to seize their one chance to make a desperate run for freedom. Relentlessly pursued by their makers, the WE3 team must navigate a frightening and confusing world where their instincts and heightened abilities make them as much a threat as those hunting them.

Photonic Networks Giancarlo Prati, 2012-12-06 The day when fiber will deliver new, yet now only foreseeable, broadband services to the end user is getting nearer and nearer as we make our way towards the prophetic year 2000. Step by step, as we move from first generation lasers and fibers to the by now common erbium-doped fiber amplifiers, looking forward to such things as wavelength multiplexing and solitons, photonic switching and optical storage, the community of researchers in optical communications has stepped into the era of photonic networks. It is not just a question of terminology. Optical communication means technology to the same extent that photonic network means services. If it is true that information is just as marketable a product as oil or coke, the providing of an extensive global information infrastructure may end up having an even greater impact than the setting up of a world-wide railroad network did at the beginning of the industrial era. Just like wagons, bandwidth will be responsible for carrying and delivering goods to customers. The challenge for all of us in this field is for it to function in every section of the overall network, transport, access and customer area, in the best possible way: the fastest, most economical and most flexible. New services provided by a new network that exploits the potential and peculiarities of photonics surely

requires a rethinking of solutions, new ideas, new architectures, new design, especially where electronics is still dominant, as in transport and access networks.
