The learning system also features instructional videos that demonstrate how to use the spreadsheet models and excerpts from the author's blog, which are used to depict additional examples of the analysis process. Along

the way, it skillfully outlines an effective approach to creating and interpreting outputs typically associated with a top-down money management shop — including a macroeconomic forecasting newsletter, detailed stock research reports, and a portfolio performance attribution analysis. Covers topics including active and passive money management, fundamental analysis and portfolio attribution analysis Companion streaming videos show how to use free online data to create your own analyses of key economic indicators, individual stocks, and stock portfolios A valuable resource for universities who have applied equity analysis and portfolio management courses Practical and up-to-date, the book is an excellent resource for those with a need for practical investment expertise.

Income And Wealth From Self-Directed Investing Ian Duncan

MacDonald, 2019-09-17 In 2001, after an investment adviser lost \$300,000 of Ian MacDonald's money, he took what was left and self-managed it. His investment objective was to build a stock scoring program that would give him an annual dividend income worth 6% of his portfolio, while increasing the value of that portfolio every year by about 9% (his background was in building commercial risk scoring computer programs for the banks and other businesses). He succeeded in his objective. While he had developed that stock scoring program for his own use, in 2019 he used it to help an elderly lady who had suffered a catastrophic financial loss, due to an investment adviser's greed. After much of her loss had been recovered and her monthly income had doubled, she told Ian MacDonald that he needed to write a book to help people like her who knew little about investing and could easily be taken advantage of. He wrote that book. It is called, *Income and Wealth from Self-Directed Investing*. He includes that PC stock scoring program with his 300 page book. To further help investors, in the last 100 pages of the book, are charts listing all the companies traded on the TSX that pay a dividend of 3.5% or more. Four sorts of the data in these charts is provided: by score, stock price, dividend percent and by company name. The data sorts make it easy and fast to identify and weigh which stocks are the best ones to add to your portfolio. Like the elderly widow, there are many who fear that they will outlive their life savings? They feel forced to use investment advisers because no one has

shown them how to invest safely. Ian MacDonald's book takes away the fear of investing by explaining, the following in easy to understand language: (1) The danger of entrusting your money to an investment adviser whose fees and hidden agenda could drain your savings.(2) Why investing in dividend paying common stock is the safest way for you to invest, as compared to bonds, mutual funds, etc. (3) How to open an online self-directed stock trading account without having to involve bank employees.(4) How to easily find for your portfolio the best twenty stocks for capital gain and the highest dividends.(5) How to find and sort potential stock purchases from best to worse, so you can pick the twenty best and safest.(6) How to verify that stocks have no harmful information attached to them that could potentially be a problem if purchased.(7) How to purchase a stock you have carefully chosen, in less than five minutes.(8) How to quickly and easily monitor your purchased stocks on a daily, monthly and quarterly basis.The stock market is not a casino and what Ian MacDonald teaches is not a get rich quick scheme. It is a logical, easy to understand method of investing. Since implementing his scoring system, his portfolio has grown by 300% while generating a steady ever growing retirement income. He thinks every investor should now know exactly what they are invested in and understand why they are invested in it. Through booming times and recessions there is no reason your self-directed portfolio can not generate a reliable monthly income and grow year-after-year.

The main reason for this is in my experience the following: People don't plan their investing or think too much about it, from what I experienced unusually it starts out with dissatisfaction of your current financial situation, way too high taxes, way too low interests in your savings account and also inflation take's a big chunk out of your hard earned money. Someday you come across your neighbour, or your co-worker who is also just a regular guy and he tells you about his or her investing portfolio, you get so excited that 2 month later you start your own portfolio as basically the markets will always go your direction and this guy told you about diversification so it will not be a problem... here comes the bear market, you are totally frozen and don't know how to react on this rapid price movement and usually people tend to sell the stocks at the point of the most fear - the market lows. One year later you could have lost 50% of your investing portfolio. Basically what I want to show you is the importance of a substantial knowledge basis when acting in the markets and start out investing as the odds are on our side if we just do the right things. How I Invest My Money Brian Portnoy, Joshua Brown, 2020-11-17 The world of investing normally sees experts telling us the 'right' way to manage our money. How often do these experts pull back the curtain and tell us how they invest their own money? Never. *How I Invest My Money* changes that. In this unprecedented collection, 25 financial experts share how they navigate markets with their own capital. In this honest rendering of how they invest, save, spend, give, and borrow, this group of portfolio managers, financial advisors, venture capitalists and other experts detail the 'how' and the 'why' of their investments. They share stories about their childhood, their families, the struggles they face and the aspirations they hold. Sometimes raw, always revealing, these stories detail the indelible relationship between our money and our values. Taken as a whole, these essays powerfully demonstrate that there is no single 'right' way to save, spend, and

invest. We see a kaleidoscope of perspectives on stocks, bonds, real assets, funds, charity, and other means of achieving the life one desires. With engaging illustrations throughout by Carl Richards, *How I Invest My Money* inspires readers to think creatively about their financial decisions and how money figures in the broader quest for a contented life. With contributions from: Morgan Housel, Christine Benz, Brian Portnoy, Joshua Brown, Bob Seawright, Carolyn McClanahan, Tyrone Ross, Dasarte Yarnway, Nina O'Neal, Debbie Freeman, Shirl Penney, Ted Seides, Ashby Daniels, Blair duQuesnay, Leighann Miko, Perth Tolle, Josh Rogers, Jenny Harrington, Mike Underhill, Dan Egan, Howard Lindzon, Ryan Krueger, Lazetta Rainey Braxton, Rita Cheng, Alex Chalekian
