Mind Change Susan Greenfield,2015-02-10 We live in a world unimaginable only decades ago: a domain of backlit screens, instant information, and vibrant experiences that can outcompete dreary reality. Our brave new technologies offer incredible opportunities for work and play. But at what price? Now renowned neuroscientist Susan Greenfield—known in the United Kingdom for challenging entrenched conventional views—brings together a range of scientific studies, news events, and cultural criticism to create an incisive snapshot of “the global now.” Disputing the assumption that our

technologies are harmless tools, Greenfield explores whether incessant exposure to social media sites, search engines, and videogames is capable of rewiring our brains, and whether the minds of people born before and after the advent of the Internet differ. Stressing the impact on Digital Natives—those who’ve never known a world without the Internet—Greenfield exposes how neuronal networking may be affected by unprecedented bombardments of audiovisual stimuli, how gaming can shape a chemical landscape in the brain similar to that in gambling addicts, how surfing the Net risks placing a premium on information rather than on deep knowledge and understanding, and how excessive use of social networking sites limits the maturation of empathy and identity. But *Mind Change* also delves into the potential benefits of our digital lifestyle. Sifting through the cocktail of not only threat but opportunity these technologies afford, Greenfield explores how gaming enhances vision and motor control, how touch tablets aid students with developmental disabilities, and how political “clicktivism” foment positive change. In a world where adults spend ten hours a day online, and where tablets are the common means by which children learn and play, *Mind Change* reveals as never before the complex physiological, social, and cultural ramifications of living in the digital age. A book that will be to the Internet what *An Inconvenient Truth* was to global warming, *Mind Change* is provocative, alarming, and a call to action to ensure a future in which technology fosters—not frustrates—deep thinking, creativity, and true

fulfillment. Praise for Mind Change “Greenfield’s application of the mismatch between human and machine to the brain introduces an important variation on this pervasive view of technology. . . . She has a rare talent for explaining science in accessible prose.”—The Washington Post “Greenfield’s focus is on bringing to light the implications of Internet-induced ‘mind change’—as comparably multifaceted as the issue of climate change, she argues, and just as important.”—Chicago Tribune “Mind Change is exceedingly well organized and hits the right balance between academic and provocative.”—Booklist “[A] challenging, stimulating perspective from an informed neuroscientist on a complex, fast-moving, hugely consequential field.”—Kirkus Reviews “[Greenfield] is not just an engaging communicator but a thoughtful, responsible scientist, and the arguments she makes are well-supported and persuasive.”—Mail on Sunday “Greenfield’s admirable goal to prove an empirical basis for discussion is . . . an important one.”—Financial Times “An important presentation of an uncomfortable minority position.”—Jaron Lanier, Nature

Lifelogging Stefan Selke, 2016-06-14 The following anthology delivers sound analysis to the theoretical classification of the current societal phenomenon - between innovative, world changing and yet disruptive technology, as well as societal and cultural transformation. Lifelogging, digital self-tracking and the real-time chronicling of man’s lifetime, is not only a relevant societal topic in the world of research and academic science these days, but

can also be found in literature, cultural pages of the written press and the theatre. The spectrum of Lifelogging ranges from sleep, mood, sex and work logging to Thing and Deathlogging. This leads to several questions: How does one live in a data society? Is “measured” man automatically also “better” man? And if so, what is the cost? Do new categories of reality or principles of social classification develop as a result of Lifelogging? How does the “social view” on things change? The authors in this anthology provide insightful answers to these pressing questions.

Eye Tracking and Visualization Michael Burch, Lewis Chuang, Brian Fisher, Albrecht Schmidt, Daniel Weiskopf, 2017-01-20 This book discusses research, methods, and recent developments in the interdisciplinary field that spans research in visualization, eye tracking, human-computer interaction, and psychology. Topics include visualization and visual analytics of eye-tracking data, metrics and cognitive models, eye-tracking experiments in the context of visualization interfaces, and eye tracking in 3D and immersive environments. The extended ETVIS papers are complemented by a chapter offering an overview of visualization approaches for analyzing eye-tracking data and a chapter that discusses electrooculography (EOG) as an alternative of acquiring information about eye movements. Covering scientific visualization, information visualization, and

visual analytics, this book is a valuable resource for eye-tracking researchers within the visualization community.

Tracking Environmental Change Using Lake Sediments Eric Capo, Cécilia

Barouillet, John P. Smol, 2024-01-20 This book, entitled Tracking Environmental Change Using Lake Sediments: Volume 6 – Sedimentary DNA, provides an overview of the applications of sedimentary DNA-based approaches to paleolimnological studies. These approaches have shown considerable potential in providing information about the long-term changes of overall biodiversity in lakes and their watersheds in response to natural and anthropogenic changes, as well as tracking human migrations over the last thousands of years. Although the first studies investigating the preservation of these molecular proxies in

sediments originate from the late-1990s, the number of scientific publications on this topic has increased greatly over the last five years. Alongside numerous ecological findings, several sedimentary DNA studies have been dedicated to understanding the reliability of this approach to reconstruct past ecosystem changes. Despite the major surge of interest, a comprehensive compilation of sedimentary DNA approaches and applications has yet to be attempted. The overall aim of this DPER volume is to fill this knowledge gap.

John Madden Peter Richmond, 2019-07-30 *Game for Life: John Madden explores the life and career of the iconic coach, broadcaster, and face of the long-running Madden NFL video game franchise. A 2006 enshrinee, Madden led the Oakland Raiders to their first Super Bowl win in 1976 against the Minnesota Vikings, and after his retirement went on to become a celebrated and beloved color commentator and analyst who captured fourteen Sports Emmy Awards for Outstanding Sports Event Analyst. Bestselling author Peter Richmond, who chronicled Madden's Raiders in his acclaimed book, Badasses, tells the inspiring story of how a small-college standout who never made it out of his first NFL training camp as a player, went from an assistant coach at tiny Allan Hancock College to a Super Bowl-winning head coach with the highest winning percentage in the modern era (.763). The Game for Life biography series celebrates The Pro Football Hall of Fame's mission of honoring the heroes of professional football, preserving its history, promoting its values, and celebrating excellence everywhere.*

Global Monsoon System, The: Research And Forecast (Third Edition) Chang Chih-pei, Johnson Richard H, Kuo Hung-chi, 2017-01-25 This book is the third edition of a book series on the state of the science of monsoon research and forecasting. The series is updated approximately every five years based on

the invited reviews of the World Meteorological Organization's International Workshop on Monsoons (IWM). The third edition is an outgrowth of the reviews initially presented in late 2013 at IWM-V, with manuscripts revised and updated through 2015 and early 2016. As in previous editions, the book builds on the concept that the monsoon in various parts of the globe can be viewed as components of an integrated global monsoon system, while also emphasizing that significant region-specific characteristics are present in individual monsoon regions. In addition to the regional monsoons, the current volume covers contemporary topics with emphasis on intraseasonal oscillations, extreme weather, decadal variability, climate change, and summary of recent field experiments including CINDY/DYNAMO in the Indian Ocean and the Asian Monsoon Years. World Scientific Series on Asia-Pacific Weather and Climate is indexed in SCOPUS.

Our Social World Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2016-11-30 Inspire your students to develop their sociological imaginations in *Our Social World*. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the Social World Model", a conceptual framework used across chapters to see the complex links between various micro- to macro-levels of the social system, students will develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects.

Born Digital John Palfrey, Urs Gasser, 2016-07-12 An excellent primer on what it means to live digitally. It should be required reading for adults trying to understand the next generation. -- Nicholas Negroponte, author of *Being Digital* The first generation of children who were born into and raised in the digital world are coming of age and reshaping the world in their image. Our economy, our politics, our culture, and even the shape of our family life are being transformed. But who are these wired young people? And what is the

world they're creating going to look like? In this revised and updated edition, leading Internet and technology experts John Palfrey and Urs Gasser offer a cutting-edge sociological portrait of these young people, who can seem, even to those merely a generation older, both extraordinarily sophisticated and strangely narrow. Exploring a broad range of issues -- privacy concerns, the psychological effects of information overload, and larger ethical issues raised by the fact that young people's social interactions, friendships, and civic activities are now mediated by digital technologies -- *Born Digital* is essential reading for parents, teachers, and the myriad of confused adults who want to understand the digital present and shape the digital future.
