Innovations in Micro Irrigation Technology Megh R. Goyal,Vishal K.

Chavan,Vinod K. Tripathi,2016-03-30 The tenth and final volume in the series Research Advances in Sustainable Micro Irrigation, this valuable book focuses on new and recent innovations in technology, methods, and applications for micro irrigation. The book covers a wide variety of topics, including successes in micro irrigation in India, how new methods have helped the local economies in several areas, ways to enhance crop yield through new building programs, and new technology and systems. It looks at different aspects of these new innovations in micro irrigation, including economic impact, evaluation methods, bubbler systems, success with particular crops, scheduling, and more. This book is sure to be a helpful resource for professionals and practitioners in the field as well as for students pursuing the field of agriculture.

Date Palm Jameel M Al-Khayri,Shri Mohan Jain,Dennis V. Johnson,Robert R. Krueger,2023-06-14 Date palm (*Phoenix dactylifera* L.) is a tree belonging to the palm family (Arecaceae) and is cultivated for its sweet edible fruits. Over the past century, it has become a major commercial fruit crop and a key component of agricultural production in the world's subtropical arid and semiarid regions. A crop suited both to the low-input small-farmer and the modern high-input commercial plantation, the date palm provides a livelihood for millions of people living in marginal land areas where farming options are restricted. Date palm is mainly grown for its fruits, but the whole tree is utilized. Research into date palm improvement for fruit production in recent decades has brought about improved elite cultivars, stress and pathogen resistance, and enhanced postharvest technologies. These developments have led to revised recommendations for date palm producers, and increased opportunity to promote novel fruit products. With contributions from leading international experts, this is a valuable resource for researchers and students in horticulture, as well as date palm growers and processors.

Integrated Urban Water Management: Arid and Semi-Arid Regions Larry Mays,2014-04-21 The Integrated Urban Water Management (IUWM) is an emerging approach to managing the entire urban water cycle in an integrated way, which is key to achieving the sustainability of urban water resources and services. The IUWM incorporates: the systematic consideration of the various dimensions of water, including surface and groundwater resources, q

Human and Water Security in Israel and Jordan Philip Jan Schäfer,2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel, if they converge and if political solutions for the issue of water security could be derived. The analysis is based on the assumption that from human security perspective common solutions

for urgent problems can be derived more easily than out of a perspective of national security. Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors. An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan.

Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization.

Schools of Qur'anic Exegesis Hussein Abdul-Raof, 2013-12-13 Qur'anic exegesis has become the battleground of political Islam and theological conflict among various Muslim schools of thought. Using comparative and contrastive methodology, examples from the Qur'an are investigated in the light of various theological views to delineate the birth, development and growth of Qur'anic exegesis. The political status quo, in the past and at present, has impinged upon Qur'anic exegesis more than on any other discipline in Islamic studies. This book illustrates the dichotomy between mainstream and non-mainstream Islam, showing how Qur'anic exegesis reflects the subtle dogmatic differences and political cleavages in Islamic thought. Chapters explore in depth the intrusive views of the compilers of early exegesis manuscripts, the scepticism among Western scholars about the authenticity of early Muslim works of exegesis and of prophetic tradition, and the role of exegesis as a tool to reaffirm the Qur'an as a canon. Written to appeal to those with comparative exegetical interests as well as those focused on Islamic studies in general, this book will be an important reference for research students, scholars, and students of Islamic Studies, Theology, Religious studies and Middle Eastern Studies.

Islamic International Law Khaled Ramadan Bashir, 2018-10-26 Through the analysis of Al-Shaybani's most prolific work *As-Siyar Al Kabier*, this book offers a unique insight into the classic Islamic perspective on international law. Despite being recognised as one of the earliest contributors to the field of international law, there has been little written, in English, on Al-Shaybani's work; this book will go some way towards filling the lacuna. *International Islamic Law* examines Al-Shaybani's work alongside that of other leading scholars such as: Augustine, Gratian, Aquinas, Vitoria and Grotius, proving a full picture of early thinking on international law. Individual chapters provide discussion on Al-Shaybani's writing in relation to war, peace, the consequences of war and diplomatic missions. Khaled Ramadan Bashir uses contemporary international law vocabulary to enable the reader to consider Al-Shaybani's writing in a modern context. This book will be a useful and unique resource for scholars in the field of Islamic International Law, bringing together and translating a number of historical sources to form one accessible and coherent text. Scholars researching the historical and jurisprudential origins of public international law topics, such as: international humanitarian law, 'just war', international dispute resolution, asylum and diplomacy will also find the book to be an interesting and valuable text.

Blockchain and Applications, 4th International Congress Javier Prieto,Francisco Luis Benítez Martínez,Stefano Ferretti,David Arroyo Guardeso,Pedro Tomás Nevado-Batalla,2023-01-07 This book constitutes the refereed proceedings of the 4th International Congress on Blockchain and Applications 2022, BLOCKCHAIN'22, held in L'Aquila, Italy, in July 2022. Among the scientific community, blockchain and artificial intelligence are a promising combination that will transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no consensus with schemes or best practices that would specify how blockchain and artificial intelligence should be used together. The 37 full papers presented in the main track were carefully reviewed and selected from more than 75 submissions. They contain the latest advances on blockchain and artificial intelligence and on their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools and identifying critical issues and challenges that researchers and practitioners must deal with in the future research. The book also includes 3 papers from the WEB3-TRUST workshop and 2 papers from the Doctoral Consortium.

Egypt Azmi Bishara,2022-07-14 Azmi Bishara's seminal study of the 2011 Egyptian Revolution chronicles in granular detail the lead up to the momentous uprisings and the subsequent transition and coup. The book critically investigates the social and economic conditions that formed the backdrop to the revolution and the complex challenges posed by the transition from authoritarianism to democracy. Part One, 'From July Coup to January Revolution', goes back to what is called the '1952 revolution' or the '1952 Coup d'état' and traces events until 2011 when Hosni Mubarak stepped down as the president of Egypt after weeks of protest. It highlights the relationship between the presidency and the army to show that, contrary to popular belief, the presidency grew gradually stronger at the expense of other institutions, especially the army, and reached its apogee under Mubarak. Part Two 'From Revolution to Coup d'Etat', covers the critical stages from when the military junta took over the governing of Egypt as the Supreme Council of the Armed Forces (SCAF), and the election of Morsi, up until the coup to overthrow his presidency. Using a democratic transition theory perspective, Azmi Bishara explains the failure of the democratic transition and how it has impacted on Arab revolutions ever since. Written while the revolutions were taking place, this book conveys a sense of immediacy and urgency as Bishara makes wide-ranging assessments with many of his forecasts corroborated in later years. The book is renowned for its use of primary source material - including interviews, statistics and public opinion polls – thus preserving the memory of the revolution and remaining one of the most comprehensive reference books on the subject to date.

Food-Energy-Water Nexus Resilience and Sustainable Development Somayeh Asadi,Behnam Mohammadi-Ivatloo,2020-03-28 This book presents readers with an integrated modeling approach for analyzing and understanding the interconnection of water, energy, and food resources and discusses the relationship between resilience and sustainability of the food- energy –water (FEW) system. Authors provide novel frameworks, models, and algorithms designed to balance the theoretical and applicative aspects of each chapter.

The book covers an integrated modeling approach for FEW systems along with developed methods, codes, and planning tools for designing interdependent energy, water and food systems. In-depth chapters discuss the impact of renewable energy resources in FEW systems, sustainable design and operation, net zero energy buildings, and challenges and opportunities of the FEW nexus in the sustainable development of different countries. This book is useful for graduate students, researchers, and engineers seeking to understand how sustainable FEW systems contribute to the resilience of these systems and help policy and design makers allocate and prioritize resources in an integrated manner across the food, energy, and water sectors.
