Public and Situated Displays K. O'Hara, M. Perry, E. Churchill, D. Russell, 2013-03-09 Public and situated display technologies can have an important impact on individual and social behaviour and present us with particular interesting new design considerations and challenges. While there is a growing body of research exploring these design considerations and social impact this work remains somewhat disparate, making it difficult to assimilate in a coherent manner. This book brings together the perspectives of key researchers in the area of public and situated display technology. The chapters detail research representing the social, technical and interactional aspects of public and situated display technologies. The underlying concern common to these chapters is how these displays can be best designed for collaboration, coordination, community building and mobility. Presenting them together allows the reader to examine everyday display activities within the context of emerging technological possibilities.

Preaching Master Class Will Willimon, 2010-03-26 Preachers around the globe have come to rely on Will Willimon for insight and advice on the craft of preaching. For over a decade, Willimon has published his reflections in the Five-Minute Preaching Workshop, a quarterly column he writes as editor of Pulpit Resource. Here the best selections from that column have been brought together into a single volume for the first time. Drawing on years of experience, study, and careful observation of the current state of preaching, Willimon offers candid thoughts on a wide range of homiletical issues—from theological to pastoral, cultural, and stylistic. Readers will find challenge and inspiration from a few hours spent in the studio of this master preacher.

Understanding Video Game Music Tim Summers, 2016-09-08 Understanding Video Game Music develops a musicology of video game music by providing methods and concepts for understanding music in this medium. From the practicalities of investigating the video game as a musical source to the critical perspectives on game music - using examples including Final Fantasy VII, Monkey Island 2, SSX Tricky and Silent Hill - these explorations not only illuminate aspects of game music, but also provide conceptual ideas valuable for future analysis. Music is not a redundant echo of other textual levels of the game, but central to the experience of interacting with video games. As the author likes to describe it, this book is about music for racing a rally car, music for evading zombies, music for dancing, music for solving puzzles, music for saving the Earth from aliens, music for managing a city, music for being a hero; in short, it is about music for playing.

Ideas and Actions in the Green Movement Brian Doherty, 2005-07-05 The 'Western' green movement has grown rapidly in the last three decades: green ministers are in government in several European countries, Greenpeace has millions of paying supporters, and green direct action against roads, GM crops, the WTO and neo-liberalism, have become ubiquitous. The author argues that 'greens' share a common ideological framework but are divided over strategy. Using social movement theory and drawing on research from many countries, he shows how the green movement became more differentiated over time, as groups had to face the task of deciding what kind of action was appropriate. In the breadth of its coverage and its novel focus on the relationship between green ideas and action, this book makes an important contribution to the understanding of green politics.

Political Machines Andrew Barry, 2001-07-23 Technology assumes a remarkable importance in contemporary political life. Today, politicians and intellectuals extol the virtues of networking, interactivity and feedback, and stress the importance of new media and biotechnologies for economic development and political innovation. Measures of intellectual productivity and property play an increasingly critical part in assessments of the competitiveness of firms, universities and nation-states. At the same time, contemporary radical politics has come to raise questions about the political preoccupation with technical progress, while also developing a certain degree of technical sophistication itself. In a series of in-depth analyses of topics ranging from environmental protest to intellectual property law, and from interactive science centres to the European Union, this book interrogates the politics of the technological society. Critical of the form and intensity of the contemporary preoccupation with new technology, Political Machines opens up a space for thinking the relation between technical innovation and political inventiveness.>

The Cyberdimension Eric Trozzo, 2019-04-29 In 2013, Edward Snowden released a trove of documents revealing the extent of government electronic surveillance. Since then, we have been inundated with reports of vicious malware attacks, election hacking, data breaches, potential cyberwars, fights over Net Neutrality, and fake internet news. Where once discussion of cyberspace was full of hope of incredible potential benefits for humanity and global connection, it has become the domain of fear, anxiety, conflict, and authoritarian impulses. As the cloud of the Net darkens into a storm, are there insights from Christian theology about our online existence? Is the divine present in this phenomenon known as cyberspace? Is it a realm of fear or a realm of hope? In The Cyberdimension, Eric Trozzo engages these questions, seeking not only a theological means of speaking about cyberspace in its ambiguity, but also how the spiritual dimension of life provokes resistance to the reduction of life to what can be calculated. Rather than focusing on the content available online, he looks to the structure of cyberspace itself to find a chastened yet still expectant vision of divinity amidst the political, economic, and social forces at play in the cyber realm.

Generation Exile Rodrigo Dorfman,2023-03-31 “If you ever sing those songs again, they will kill your daddy,” the boy’s mother warned him after he continued to sing one of the hymns of the Chilean revolution in public. Rodrigo Dorfman, the son of prominent dissidents, was six years old when his family fled Augusto Pinochet’s military dictatorship a month after the CIA-backed coup in 1973. In his fascinating memoir, Dorfman writes about his experiences as an exile and a migrant. He was dragged away from his homeland, “seduced by the thrill of flying on airplanes and visiting far-away places,” but reassured the family would return soon. They fled to Argentina, and then to Havana, Paris, Amsterdam and finally Bethesda, Maryland. His muse and identity were “sealed and stamped with that curse, with that blessing, with that irresistible myth: the eternal return.” Mapping the memory of exile, he remembers the contradiction of living with his seething anger at losing his home and his resistance to settling down. Rebellion was an ancestral badge of honor he wore proudly. At 18, he returned to Chile and fought against the fascist dictatorship, running for his life with bullets and tear gas flying by. Dorfman’s involvement in the resistance movement there planted the seeds for his future life as a community-centered documentary filmmaker. His restless search for a place to call his own led to his wandering—around the United States, to Morocco and Turkey and the Path of Sufism. He finally made a home in the American South, where he became a “Latino” and found kinship with other immigrants who settled there. This compelling narrative recounts a displaced man’s life-long quest to establish family, roots and a sense of belonging by bearing witness to what he calls the “Nuevo South.”
