Draplin Design Co. Aaron James Draplin,2016-05-17 A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers. Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. Pretty Much Everything is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like Field Notes and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, Pretty Much Everything is the complete package.

Memo from David O. Selznick David O. Selznick,2000-03-07 The most revealing, penetrating book on filmmaking I know of . . .--King Vidor David O. Selznick was a unique figure in the golden Hollywood studio era. He produced some of the greatest and most memorable American films ever made--notably, Rebecca, A Star Is Born, Anna Karenina, A Farewell to Arms, and, above all, Gone With the Wind. Selznick's absolute power and artistic control are evidenced in his impassioned, eloquent, witty, and sometimes rageful memos to directors, writers, stars and studio executives, writings that have become almost as famous as his films. Newsweek wrote,I can't imagine how a book on the American movie business could be more illuminating, more riveting or more fun to read than this collection of David Selznick's memos.

**The Memo** John Hope Bryant,2017-09-18 True power in this world comes from economic independence, but too many people have too much month left at the end of their money. John Hope Bryant, founder and CEO of Operation HOPE, illuminates the path toward liberation that is hiding in plain sight. His message is simple: the supermajority of people who live in poverty, whom Bryant calls the invisible class, as well as millions in the struggling middle class, haven't gotten “the memo”—until now. Building on his personal experience of rising up from economically disadvantaged circumstances and his work with Operation HOPE, Bryant teaches readers five rules that lay the foundation for achieving financial freedom. He emphasizes the inseparable connection between “inner capital” (mindset, relationships, knowledge, and spirit) and “outer capital” (financial wealth and property). “If you have inner capital,” Bryant writes, “you can never be truly poor. If you lack inner capital, all the money in the world cannot set you free.” Bryant gives readers tools for empowerment by covering everything from achieving basic financial literacy to investing in positive relationships

and approaching wealth with a completely new attitude. He makes this bold and controversial claim: "Once you have satisfied your basic sustenance needs—food, water, health, and a roof over your head—poverty has more to do with your head than your wallet." Bryant wants to restore readers' "silver rights," giving them the ability to succeed and prosper no matter what very real roadblocks society puts in their way. We have more power than we realize, if only we can recognize and claim it. "We are our first capital," Bryant writes. "We are the CEOs of our own lives."

**Memo for Nemo** William Firebrace,2022-10-04 A cultural history of living in the undersea, both fictional and real, from Jules Verne's Captain Nemo to NASA's ECC02 project. In Memo for Nemo, William Firebrace investigates human inhabitation of the undersea, both fictional and real. Beginning with Jules Verne's Captain Nemo—an undersea Renaissance man with a library of 12,000 volumes on his submarine—and proceeding through aquariums, undersea photography, artificial seas on land, nuclear-powered submarines, undersea film epics, giant squid, and NASA satellites, Firebrace examines the undersea as a zone created by exploration and invention. Throughout, the history of undersea life is accompanied by an imagined undersea, envisioned by cultural figures ranging from Verne and Herman Melville to Orson Welles and Jimi Hendrix. Firebrace takes readers through the enormous sequence of rooms (impossible in real life) in Nemo's submarine, recounts the competition among nineteenth-century cities to build the most spectacular aquatic world, and explains the workings of the bathysphere—an early underwater vessel modeled on a hot-air balloon. He considers the aquarium's function in films as a sort of viewing lens, describes the chlorine-proof artificial sea life seen by passengers on the submarine ride at Disneyland, and reports that Jacques Cousteau's famous underwater documentaries were in fact highly staged. The oceans of today are not those imagined by Verne; they are changing from both natural processes and human influence. Memo for Nemo documents the power of the undersea in both art and life.

**Still Starving After All These Years** Jeri Studebaker,2021-01-29 Do you want an end to war and inequality? Civilizations the world over have produced spectacular innovations; monumental architecture, complex mathematics, magnificent art, and the invention of writing, to name a few.

Civilizations have also produced several unsavory innovations, which to the modern mind seem an inevitable part of living in civilized society. Large-scale architecture was invented to store hoarded food and other goods, produced by the enslaved masses but enjoyed by the powerful elite. Writing was invented to keep track of hoarded commodities. Institutionalized warfare was invented to steal slaves, who could produce more for the monumental storage containers. A striking parallel with today's governments' violent obsessions over endless growth. This prevailing mindset can and must be undone or else we risk the annihilation of humanity.
