The Perfect Summer Morgan Billingsley,Jackie Lee,Gabrielle Simone,2015 The talented trio that brought you The Perfect Present is back...with summer stories that will brighten your day, warm your heart, and prove that life is one of the greatest teachers there is. In Too Big for Teacups, Gabrielle Simone introduces us to the Fernandez family, who is on their way to Disney for a vacation. Marlena, the oldest, would rather stay home and practice with her dance team. But her parents make her go, and Marlena trudges through a miserable week of what was supposed to be a family bonding experience. In the midst of her complaining, her best friend, Jennifer, helps her learn a valuable life lesson and a new outlook on family time. In Jackie Lee's A Lesson for Summer, 14-year-old twins, Vanessa and Teresa, had planned their ideal summer vacation. But when their father announces that he's taking over a new church in a new city, the girls find their summer ruined! Instead of spending their days shopping, talking about boys, and going to the movies, they were going to be moving and volunteering to mentor a bunch of snotty-nosed seven-year-olds. The twins do everything in their power to sabotage their parents' plans for them. However, in the end, they learn life lessons that truly make this the perfect summer for both of them. Morgan Billingsley is back with twins, Max and Mickey in A Country Summer. And this time, the suburban duo is unplugging from their iPads, Wi-Fi, and Netflix, to spend the summer with their extended family in a small Arkansas town. This was not at all Mickey's idea of fun. In fact, she hates the boring country and her "classless" relatives. While Max fits right in with his cousins, Mickey soon feels left out and learns a valuable lesson about life - it doesn't matter what you have...what matters is who you have. These three young writers will inspire and entertain...and leave you with a lesson or two yourself.

The Routledge Handbook of Digital Literacies in Early Childhood Ola Erstad,Rosie Flewitt,Bettina Kümmmerling-Meibauer,Íris Susana Pires Pereira,2019-07-05 As fast-evolving technologies transform everyday communication and literacy practices, many young children find themselves immersed in multiple digital media from birth. Such rapid technological change has consequences for the development of early literacy, and the ways in which parents and educators are able to equip today's young citizens for a digital future. This seminal Handbook fulfils an urgent need to consider how digital technologies are impacting the lives and learning of young children; and how childhood experiences of using digital resources can serve as the foundation for present and future development. Considering children aged 0–8 years, chapters explore the diversity of young children's literacy skills, practices and expertise across digital tools, technologies and media, in varied contexts, settings and countries. The Handbook explores six significant areas: Part I presents an overview of research into young children's digital literacy practices, touching on a range of theoretical, methodological and ethical approaches. Part II considers young children's reading, writing and meaning-making when using digital media at home and in the wider community. Part III offers an overview of key challenges for early childhood education presented by digital literacy, and discusses political positioning and curricula. Part IV focuses on the multimodal and multi-sensory textual landscape of contemporary literary practices, and how children learn to read and write with and across media. Part V considers how digital technologies both influence and are influenced by children's online and offline social relationships. Part VI draws together themes from across the Handbook, to propose an agenda for future research into digital literacies in early childhood. A timely resource identifying and exploring pedagogies designed to bolster young children's digital and multimodal literacy practices,

this key text will be of interest to early childhood educators, researchers and policy-makers.

Mark Le Messurier,Madhavi Nawana Parker,2019-03-05 Pre-teens and teenagers are faced with a continually changing and complex social world that not only involves face-to-face action, but also online and social media interaction. What’s the Buzz with Teenagers? offers a highly practical programme designed to explicitly teach young people to get along and maintain healthy relationships with their friends, family and the broader community. Embracing current thinking on ‘self-awareness and behaviour transformation’ in adolescents, it uses highly interactive role plays, film-making, thinking exercises, quizzes, group discussions and confidence-building games to improve social skills and promote inclusion in a fun, effective and appealing way. Easy to implement in upper primary and middle schools, in healthcare settings and beyond, What’s the Buzz with Teenagers?: is a deeply structured resource to teach young people in the 12- to 15-year-old developmental range; offers a connecting approach to bring young people together to learn without the pressure of ‘getting social interaction right’ all the time; aims to normalise the anxieties, sensitivities and loneliness that many young people experience during adolescence by sharing thoughts and exploring this common ground; explicitly teaches how to ‘read’ the emotional needs of others, show empathy and build relationships; and uses a developmental model that ensures relevance and inclusion to young people with a broad range of backgrounds, abilities and challenges. The programme provides lessons that educators and health professionals can adapt to suit their individual circumstances and time frames, and creates a framework for a warm, engaging and interactive space in which learning is optimised. Reset Your Child's Brain Victoria L. Dunckley, MD,2015-06-23 Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices — such as computers, video games, smartphones, and tablets — can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track — all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.
