The Camera Phone Book Aimee Baldrige,2007 Marketing experts predict that by 2009, nearly 90% of all cell phones will contain a camera, as manufacturers race to create cheaper, easier-to-use models with more sophisticated cameras, more pixels, flash units and even multiple lenses. Already revolutionizing audiovisual communication, it's a trend that will only grow more explosively-and who better than National Geographic to create a how-to book aimed directly at the millions who carry a camera phone everywhere and want to make the most of it?Created by two top professionals, this generously illustrated nuts-and-bolts guide is the first o.

Marketing Industrial Machines Industrial Systems Research,2019 This is a survey and guide to key influences on selling, buying and growing markets for industrial machines with special reference to machine tools and robots. Using survey data from large corporate suppliers and users around the world, the study distinguishes five major general selling points of industrial machines: affordability, functionality, operability, reliability, and availability (or AFORA for short). Essentially, it finds saleability depends on the AFORA of particular machines, the marketing methods used, and the favourability of otherwise of general market-economic conditions. The study is for production engineering, R&D, project management and ICT and finance and sales and purchasing executives. Contents: Preface 1. Affordability as a selling point 2. Functionality as a selling point 3. Operability as a selling point 4. Reliability as a selling point 5. Availability as a selling point 6. Marketing methods and their effectiveness 7. Market-economic influences on sales 8. Summary and conclusions

Android Forensics Andrew Hoog,2011-06-15 Android Forensics covers an open source mobile device platform based on the Linux 2.6 kernel and managed by the Open Handset Alliance. This book provides a thorough review of the Android platform including supported hardware devices, the structure of the Android development project, and implementation of core services (wireless communication, data storage, and other low-level functions).

Computer Forensics Robert C. Newman,2007-03-09 Computer Forensics: Evidence Collection and Management examines cyber-crime, E-commerce, and Internet activities that could be used to exploit the Internet, computers, and electronic devices. The book focuses on the numerous vulnerabilities and threats that are inherent on the Internet and networking environments and presents techniques and suggestions for corporate security personnel, investigators, and forensic examiners to successfully identify, retrieve, and protect valuable forensic evidence for litigation and prosecution. The book is divided into two major parts for easy reference. The first part explores various crimes, laws, policies, forensic tools, and the information needed to understand the underlying concepts of computer forensic investigations. The second part presents information relating to crime scene investigations and management, disk and file structure, laboratory construction and functions, and legal testimony. Separate chapters focus on investigations involving computer systems, e-mail, and wireless devices. Presenting information patterned after technical, legal, and managerial classes held by computer forensic professionals from Cyber Crime Summits held at Kennesaw State University in 2005 and 2006, this book is an invaluable resource for those who want to be both efficient and effective when conducting an investigation.

International Survey on Text and Image Copyright Levies World Intellectual Property Organization,2017-06-07 The third 'International Survey of Text and Image Copyright Levies', jointly published by the World Intellectual Property Organization (WIPO) and the International Federation of Reprographic Rights Organizations (IFRRO) builds on and updates the first two surveys published in 2014 and 2015, and analyzes the origins, scope and current use of these levies around the world, and their role in ensuring easy legal access to copyright material. The Survey also shows how and why text and image (TI) levies are different from audio and audio-visual private copying levies. As with the first two surveys, it uses data from IFRRO members, collated and presented by Paul Greenwood, a consultant, with the assistance of representatives of IFRRO members and the IFRRO Secretariat. The methodology and scope are unchanged.

Global E-Security Hamid Jahankhani,Kenneth Revett,Dominic Palmer-Brown,2008-06-21 In today's society, where technology is ubiquitous, protecting ourselves with firewalls is as important as defending ourselves with firepower. New technology is providing criminals with a world of opportunity, while law enforcement agencies all over the world are struggling to cope. E-security is an issue of global importance. In many ways, cybercrime is no different to more traditional types of crime – both involve identifying targets, using surveillance and psychological profiling of potential victims. The major difference is that the perpetrators of cybercrime are increasingly remote to the scene of their crime and that in some cases their victims may not even realize that a crime is taking place. Knowledge of the techniques being used by criminals and the technology and training available to combat them is essential in fighting cybercrime. Establishing dialogue between crime-fighting agencies, the security industry, researchers and experts can provide a platform from which e-security can be examined from several global perspectives.

Essential Technology for Mobile Professionals ,
Information and Communications Technology Diana Pérez Marín,2014-01-01 Are you a student who wants to become an effective teacher in the 21st century? Maybe you are a teacher already? Would you like to learn how to take advantage of educational technologies in order to achieve your pedagogic goals? Nowadays, technology is all around us, but how do we, as teachers, make the best use of it? Technology has entered the classroom and most teachers are not trained in using it to achieve pedagogic goals. This book aims to remedy this situation. To do that, it provides the reader with many step-by-step guides and solved exercises, all written in clear language in a friendly, positive style. The book demystifies the whole process of understanding how new software or hardware works and introduces techniques to make the reader comfortable with classroom technologies. I hope that you enjoy it and find it useful. Dr. Diana Pérez Marín received a Ph.D. degree in Computer Science and Engineering from the Universidad Autonoma de Madrid in 2007. She has published more than 50 papers in journals, such as the Journal of Educational Technology, and Society and has authored the book “ICT in education” (in Spanish).
