Mobile Phone Repair and Maintenance Engr
Michael David,2021-09-08 Welcome to this course on
mobile cell phone repair and maintenance. A mobile cell
phone is a hand held mobile device that can perform
several communication functions. Mobile technology has
become one of the fastest growing technologies in the
world. Today people use mobile phones to stay in touch
with friends and family, to share stories and photographs
in social media, and to carry out financial transactions.
Indeed, according to a World Bank policy research paper of
2012, 93% of Kenyans owned a mobile phone by the end of
2011. This widespread ownership and use of mobile phones
has created a need for professionals who can repair and
service mobile phones. This course has been developed to
address that need. The course targets people who would
like to start and run a mobile repair and servicing business.
By the end of this course you should be able to disassemble
and assemble a mobile phone, diagnose the problem,
service and repair a mobile phone with the help of proper
tools and instruments. This course is provided through
distance learning and we trust that you will find the
material useful both for studying and as future reference.
We welcome your feedback on any issue relating to this
course and wish you all the best. Happy Learning!
Learning Outcomes Upon completion of this course you
will be able to: Identify different types of mobile cell

phones Recognise potential hazards in the repair of mobile cell phones Identify the parts of a mobile cell phone Use the correct hardware tools to repair mobile cell phones Assembly and disassembly a mobile cell phone Identify mobile cell phone faults and solve them.

Skarmeta, Kurt Tutschku, Theodore Zahariadis The Internet is the most vital scientific, technical, economic and societal set of infrastructures in existence and in operation today serving 2.5 billion users. Continuing its developments would secure much of the upcoming innovation and prosperity and it would underpin the sustainable growth in economic values and volumes needed in the future. Future Internet infrastructures research is therefore a must. The Future Internet Assembly (FIA) is a successful conference that brings together participants of over 150 research projects from several distinct yet interrelated areas in the European Union Framework Programme 7 (FP7). The research projects are grouped as follows: the network of the future as infrastructure connecting and orchestrating the future

Internet of people, computers, devices, content, clouds and things; cloud computing, Internet of Services and advanced software engineering; the public-private partnership projects on Future Internet; Future Internet Research and Experimentation (FIRE). The 26 full papers included in this volume were selected from 45 submissions. They are organized in topical sections named: software driven networks, virtualization, programmability and autonomic management; computing and networking clouds; internet of things; and enabling technologies and economic incentives.
