*Garments of Paradise* Susan Elizabeth Ryan, 2014-06-13 A historical and critical view of wearable technologies that considers them as acts of communication in a social landscape. Wearable technology—whether a Walkman in the 1970s, an LED-illuminated gown in the 2000s, or Google Glass today—makes the wearer visible in a technologically literate environment. Twenty years ago, wearable technology reflected cultural preoccupations with cyborgs and augmented reality; today, it reflects our newer needs for mobility and connectedness. In this book, Susan Elizabeth Ryan examines wearable technology as an evolving set of ideas and their contexts, always with an eye on actual wearables—on clothing, dress, and the histories and social relations they represent. She proposes that wearable technologies comprise a pragmatics of enhanced communication in a social landscape. “Garments of paradise” is a reference to wearable technology's promise of physical and mental enhancements. Ryan defines “dress acts”—hybrid acts of communication in which the behavior of wearing is bound up with the materiality of garments and devices—and focuses on the use of digital technology as part of such systems of meaning. She connects the ideas of dress and technology historically, in terms of major discourses of art and culture, and in terms of mass media and media culture, citing such thinkers as Giorgio Agamben, Manuel De Landa, and Gilles Deleuze and Félix Guattari. She examines the early history of wearable technology as it emerged in research

labs; the impact of ubiquitous and affective approaches to computing; interaction design and the idea of wearable technology as a language of embodied technology; and the influence of open source ideology. Finally, she considers the future, as wearing technologies becomes an increasingly naturalized aspect of our social behavior.

**Shalom Sistas** Osheta Moore, 2017-10-03 Like a lot of women, blogger Osheta Moore loved the idea of shalom: God's dream for a world that is whole, vibrant, and flourishing. But honestly: who's got the time? So one night she whispered a dangerous prayer: God, show me the things that make for peace... In Shalom Sistas, Moore shares what she learned when she challenged herself to study peace in the Bible for forty days. Taking readers through the twelve points of the Shalom Sistas' Manifesto, Moore experiments with practices of everyday peacemaking and invites readers to do the same. From dropping "love bombs" on a family vacation, to talking to the coach who called her son the n-word, to spreading shalom with a Swiffer, Moore offers bold steps for crossing lines between black and white, suburban and urban, rich and poor. What if a bunch of Jesus-following women catch a vision of a vibrant, whole, flourishing world? What happens when Shalom Sistas unite? Free downloadable study guide available [here](#).

**The Oxford Handbook of Mobile Music Studies** Sumanth Gopinath, Jason Stanyek, 2014-03-21 The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, mobile music opens up a space for

studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world—the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden—and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 2 investigates the ramifications of mobile music technologies on musical/sonic performance and aesthetics. Two core arguments are that mobility is not the same thing as actual movement and that artistic production cannot be absolutely sundered from the performances of quotidian life. The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers; sound vehicles such as boom cars, ice cream trucks, and trains; the gestural choreographies of soundwalk pieces and mundane interactions with digital media; dance music practices in laptop and iPod DJing; the imagery of iPod commercials; production practices in Turkish political music and black popular music; the aesthetics of handheld video games and chiptune music; and the mobile device as a new musical instrument and resource for musical ensembles.
