Tactical Biopolitics Beatriz Da Costa,Kavita Philip,2010-08-13 Scientists, scholars, and artists consider the political significance of recent advances in the biological sciences. Popular culture in this “biological century” seems to feed on proliferating fears, anxieties, and hopes around the life sciences at a time when such basic concepts as scientific truth, race and gender identity, and the human itself are destabilized in the public eye. Tactical Biopolitics suggests that the political challenges at the intersection of life, science, and art are best addressed through a combination of artistic intervention, critical theorizing, and reflective practices. Transcending disciplinary boundaries, contributions to this volume focus on the political significance of recent advances in the biological sciences and explore the possibility of public participation in scientific discourse, drawing on research and practice in art, biology, critical theory, anthropology, and cultural studies. After framing the subject in terms of both biology and art, Tactical Biopolitics discusses such topics as race and genetics (with contributions from leading biologists Richard Lewontin and Richard Levins); feminist bioscience; the politics of scientific expertise; bioart and the public sphere (with an essay by artist Claire Pentecost); activism and public health (with an essay by Treatment Action Group co-founder Mark Harrington); biosecurity after 9/11 (with essays by artists' collective Critical Art Ensemble and anthropologist Paul Rabinow); and human-animal interaction (with a framing essay by cultural theorist Donna Haraway). Contributors Gaymon Bennett, Larry Carbone, Karen Cardozo, Gary Cass, Beatriz da Costa, Oron Catts, Gabriella Coleman, Critical Art Ensemble, Gwen D'Arcangelis, Troy Duster, Donna Haraway, Mark Harrington, Jens Hauser, Kathy High, Fatimah Jackson, Gwyneth Jones, Jonathan King, Richard Levins, Richard Lewontin, Rachel Mayeri, Sherie McDonald, Claire Pentecost, Kavita Philip, Paul Rabinow, Banu Subramanian, subRosa, Abha Sur, Samir Sur, Jacqueline Stevens, Eugene Thacker, Paul Vanouse, Ionat Zurr

Tastes Like Cuba Eduardo Machado,Michael Domitrovich,2007-10-18 Born into a well-to-do family in Cuba in 1953, Eduardo Machado saw firsthand the effects of the rising Castro regime. When he and his brother were sent to the United States on one of the Peter Pan flights of 1961, they did not know if they would ever see their parents or their home again. From his experience living in exile in Los Angeles to becoming an actor, director, playwright and professor in New York, Machado explores what it means to say good-bye to the only home one's ever known, and what it means to be a Latino in America today. Filled with delicious recipes and powerful tales of family, loss, and self discovery, Tastes Like Cuba delivers the story of Eduardo's rich and delectable life—reminding us that no matter where we go, there is no place that feels (and tastes) better than home.

What to Eat? Hattie Ellis, 2012-05-03 Deciding what to eat is no longer a simple matter of instinct and appetite. Every choice we make about the food we put on our plates is complicated. Is meat good or bad for me? Is buying local always best? Is organic worth it? WHAT TO EAT? asks all these questions and more: some are specific, going back to the nature of particular foods such as milk, meat and fish. Some are more general and challenging, examining the green and the good at a time when money is short and choices matter. The book also offers answers. This is a refreshingly practical guide to the stuff of everyday living, from the ingredients up: Hattie Ellis exposes the myths and unveils the truth about how food is produced, what gives us most value for money, what it does to us, and what we have done to it.

The Early Novels Deborah Levy, 2017-05-09 Beautiful Mutants, Deborah Levy's feverish allegory of a first novel, introduces a manipulative and magical Russian exile who summons forth a series of grotesques--among them the Poet, the Banker, and the Anorexic Anarchist. Levy explores the anxieties that pervaded the 1980s: exile and emigration, broken dreams, crazed greed and the first seeds of the global financial crisis, self-destructive desires, and the disintegration of culture. In Swallowing Geography, J. K., like her namesake Jack Kerouac, is always on the road, traveling Europe with her typewriter in a pillowcase. She wanders, meeting friends and strangers, battling her raging mother, and taking in the world through her uniquely irreverent, ironic perspective. Levy blends fairytale with biting satire, pushing at the edges of reality and marveling at where the world collapses in on itself. In The Unloved, a group of hedonistic tourists--from Algeria, England, Poland, Germany, Italy, France, and America--gathers to celebrate the holidays in a remote French château. Then a woman is brutally murdered, and the sad, eerie child Tatiana declares she knows who did it. The subsequent inquiry into the death, however, proves to be more of an investigation into the nature of identity, love, insatiable rage, and sadistic desire.

A Stolen Life Jaycee Dugard, 2011-07-12 A raw and powerful memoir of Jaycee Lee Dugard's own story of being kidnapped as an 11-year-old and held captive for over 18 years On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper's parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido's home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both fathered by Garrido. Dugard's memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes, 2000-08-15 National Book Award Finalist: “This man’s ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, The New Yorker “He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

The Ministry of Time Kalliane Bradley, 2024-05-07 A time travel romance, a spy thriller, and an ingenious exploration of the nature of power and the potential for love to change it all: Welcome to The Ministry of Time, the exhilarating debut novel by Kalliane Bradley In the near future, a civil servant is offered the salary of her dreams and is, shortly afterward, told what project she'll be working on. A recently established government ministry is gathering “expats” from across history to establish whether time travel is feasible—for the body, but also for the fabric of space-time. She is tasked with working as a “bridge”: living with, assisting, and monitoring the expat known as “1847” or Commander Graham Gore. As far as history is concerned, Commander Gore died on Sir John Franklin’s doomed 1845 expedition to the Arctic, so he’s a little disoriented to be living with an unmarried woman who regularly shows her calves, surrounded by outlandish concepts such as “washing machines,” “Spotify,” and “the collapse of the British Empire.” But with an appetite for discovery, a seven-a-day cigarette habit, and the support of a charming and chaotic cast of fellow expats, he soon adjusts. Over the next year, what the bridge initially thought would be, at best, a horrifically uncomfortable roommate dynamic, evolves into something much deeper. By the time the true shape of the Ministry’s project comes to light, the bridge has fallen haphazardly, fervently in love, with consequences she never could have imagined. Forced to confront the choices that brought them together, the bridge must finally reckon with how—and whether she believes—what she does next can change the future. An exquisitely original and feverishly fun fusion of genres and ideas, The Ministry of Time asks: What does it mean to defy history, when history is living in your house? Kalliane Bradley’s answer is a blazing, unforgettable

testament to what we owe each other in a changing world.

Death by Food Pyramid Denise Minger,2014-01-01 Warning: Shock and outrage will grip you as you dive into this one-of-a-kind exposé. Shoddy science, sketchy politics, and shady special interests have shaped American Dietary recommendations--and destroyed our nation's health--over recent decades. The phrase death by food pyramid isn't shock-value sensationalism, but the tragic consequence of following federal advice and corporate manipulation in pursuit of health. In *Death by Food Pyramid*, Denise Minger exposes the forces that overrode common sense and solid science to launch a pyramid phenomenon that bled far beyond US borders to taint the eating habits of the entire developed world. Minger explores how generations of flawed pyramids and plates endure as part of the national consciousness, and how the one size fits all diet mentality these icons convey pushes us deeper into the throes of obesity and disease. Regardless of whether you're an omnivore or vegan, research junkie or science-phobe, health novice or seasoned dieter, *Death by Food Pyramid* will reframe your understanding of nutrition science--and inspire you to take your health, and your future, into your own hands.

The Hungry Brain Stephan J. Guyenet, Ph.D.,2017-02-07 A Publishers Weekly Best Book of the Year From an obesity and neuroscience researcher with a knack for engaging, humorous storytelling, *The Hungry Brain* uses cutting-edge science to answer the questions: why do we overeat, and what can we do about it? No one wants to overeat. And certainly no one wants to overeat for years, become overweight, and end up with a high risk of diabetes or heart disease--yet two thirds of Americans do precisely that. Even though we know better, we often eat too much. Why does our behavior betray our own intentions to be lean and healthy? The problem, argues obesity and neuroscience researcher Stephan J. Guyenet, is not necessarily a lack of willpower or an incorrect understanding of what to eat. Rather, our appetites and food choices are led astray by ancient, instinctive brain circuits that play by the rules of a survival game that no longer exists. And these circuits don't care about how you look in a bathing suit next summer. To make the case, *The Hungry Brain* takes readers on an eye-opening journey through cutting-edge neuroscience that has never before been available to a general audience. *The Hungry Brain* delivers profound insights into why the brain undermines our weight goals and transforms these insights into practical guidelines for eating well and staying slim. Along the way, it explores how the human brain works, revealing how this mysterious organ makes us who we are.
