MATLAB Simulations for Radar Systems Design Bassem R. Mahafza, Atef Elsherbeni, 2003-12-17 Simulation is integral to the successful design of modern radar systems, and there is arguably no better software for this purpose than MATLAB. But software and the ability to use it does not guarantee success. One must also: Understand radar operations and design philosophy Know how to select the radar parameters to meet the design req

Innovations in Smart Cities Applications Volume 5 Mohamed Ben Ahmed, Anouar Abdelhakim Boudhir, İsmail Rakıp Karaş, Vipul Jain, Sehl Mellouli, 2022-03-03 This book sets the innovative research contributions, works, and solutions for almost all the intelligent and smart applications in the smart cities. The smart city concept is a relevant topic for industrials, governments, and citizens. Due to this, the smart city, considered as a multi-domain context, attracts tremendously academics researchers and practitioners who provide efforts in theoretical proofs, approaches, architectures, and in applied researches. The importance of smart cities comes essentially from the significant growth of populations in the near future which conducts to a real need of smart applications that can support this evolution in the future cities. The main scope of this book covers new and original ideas for the next generations of cities using the new technologies. The book involves the application of the data science and AI, IoT technologies and architectures, smart earth and water management, smart education and E-learning systems, smart modeling systems, smart mobility, and renewable energy. It also reports recent research works on big data technologies, image processing and recognition systems, and smart security and privacy.

On My Radar Stephen Blumenthal, 2021-01-12 HOW TO GROW AND DEFEND YOUR WEALTH What matters when it comes to investing? It's not what you may think. Trade deals, tweets, and more may affect the market for a moment in time, but the reality is most news is just noise-- sound bites that ultimately don't matter. So, what does? Steve Blumenthal has spent his career studying just that. He's seen how that noise encourages investors to behave badly. But you don't have to fall prey to the same mistakes investors routinely make. *On My Radar: Navigating Stock Market Cycles* explains the ins and outs of what matters: from long- and short-term debt cycles to the merciless math of loss--the concept that compounding interest works differently on the way up than it does on the way down--and the impact of recessions. Then it provides a plan: when to play offense, when to play defense, and how to carefully grow and defend your core wealth in a way that enables you to explore select investment opportunities that may further enhance your wealth. It is a must read for anyone seeking an actionable investment process.

Looking Up Matthew Cappucci, 2022-08-02 An energetic and electrifying narrative about all things weather--by one of today's rising meteorological stars. Get in--we're going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he's munching on Wawa, it's all very chaotic--yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of *Looking Up*, the lively new book from rising meteorology star Matthew Cappucci. He's a meteorologist for The Washington Post, and you might think of him as Doogie Howser meets Bill Paxton from Twister, with a dash of Leonardo DiCaprio from Catch Me If You

Can. A self-proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, *Looking Up* is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams. Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country's leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and experience every day. The weather affects every aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?

Mark Hill, 2009-06-01 After a bitter retirement from the Air Force, former fighter pilot Colin Pearce lives a solitary life flying business jets as a daily contractor. The money is good, the work is plentiful and he manages to keep the demons of his past repressed. But when his best friend from the USAF disappears while working for the CIA, the agency offers Pearce contract work of a different kind, in an aircraft he hasn't flown for years - the deadly F-16 Viper. Two government agents corner Pearce in the bar of an Atlanta hotel and present a scenario almost too incredible to believe. A mercenary fighter squadron is performing devastating airstrikes for clients willing to pay their price. Pearce's friend flew for them. And now he's gone. The squadron has a vacant position. The CIA wants someone to stop them. It seems like the perfect combination. Especially since the CIA knows the dark secrets of Pearce's past. Pearce takes the job, more for revenge than patriotism. He is whisked away to the unit's remote island training base and immersed in a strenuous program of physical training and reintroduction to the F-16. But as his considerable skills in the agile jet are reawakened, he struggles to stay focused on his mission in the midst of a surreal environment highly-charged with sexual tension. Pearce must also contend with the growing attraction between himself and unit's seductive commander and his deepening realization that she is hiding a sinister secret. Then the group's ultimate mission comes - a nuclear strike which will have dramatic consequences for the entire world. And Pearce is forced to reawaken his demons, take to the skies in the Viper and fight a deadly battle to save millions of souls at the potential cost of his own life.

Under My Radar Frey Le Karr, 2019-07-13 When you've lived a life of darkness, can you be brought into the light? With his world crashing down, Lee Young dusts off his gun and rejoins the darkness he once left behind. Revenge; it's all he can see as he becomes the ruthless vigilante he was always meant to be, drowning himself in savagery. Then Arabella McNaughton comes into his life, oblivious that a night of passion is all she can be to Lee. She's a guilt trip in the worst possible way. With the storm of Lee's past hanging over their heads and secrets working their way to the surface, can Arabella

break through Lee's barriers, or is Lee forever cursed to walk under the radar alone?

How to Prepare for Climate Change David Pogue, 2021-01-26 A practical and comprehensive guide to surviving the greatest disaster of our time, from New York Times bestselling self-help author and beloved CBS Sunday Morning science and technology correspondent David Pogue. You might not realize it, but we're already living through the beginnings of climate chaos. In Arizona, laborers now start their day at 3 a.m. because it's too hot to work past noon. Chinese investors are snapping up real estate in Canada. Millennials have evacuation plans. Moguls are building bunkers. Retirees in Miami are moving inland. In *How to Prepare for Climate Change*, bestselling self-help author David Pogue offers sensible, deeply researched advice for how the rest of us should start to ready ourselves for the years ahead. Pogue walks readers through what to grow, what to eat, how to build, how to insure, where to invest, how to prepare your children and pets, and even where to consider relocating when the time comes. (Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics. Timely and enlightening, *How to Prepare for Climate Change* is an indispensable guide for anyone who read *The Uninhabitable Earth* or *The Sixth Extinction* and wants to know how to make smart choices for the upheaval ahead.

The Spirit of Attack Bruce Gordon, 2014 SCRAMBLE! In a couple of minutes my wingman and I would be airborne on another adventure. Sometimes we intercepted an airliner, sometimes a misplaced B-52 bomber, and sometimes Russian bombers probing our defenses; Russian warships; MIG fighters; or troops in contact in Vietnam, calling for napalm only yards from their positions. Twice it was UFOs - Unidentified Flying Objects! This book is a series of short stories, supported by more than 90 photographs. The first part has my own stories; later stories were contributed by my fellow pilots. The last story is from WW II of our P-38 fighters attacking the Romanian oil fields and getting badly mauled by defending Romanian fighters - and a Romanian pilot's view of the battle! Only the spirit of attack borne in a brave heart will bring success to any fighter aircraft, no matter how highly developed the aircraft may be. That quote from Adolf Galland, an Ace of the German Luftwaffe in WW II, was the motto of our 317th Fighter Interceptor Squadron in Alaska. The fighter pilot is a hunter, and his quarry is the most dangerous in the world - men who want to kill him! The best defense is a good offense - ATTACK! The US Air Force had a program called Every Man a Tiger. A tiger does not kill impulsively or in anger, but plans his attack carefully and strikes with cool ferocity. We were tigers! Fighter pilots tell stories around the bar, but they seldom write them down. These stories were written by the fighter pilots themselves! Come with me and hear of the beauty of flight, the mortal danger of electrical power failure at night in a snowstorm, and the thrill of attack with 20mm cannons firing right under your feet!

The Devil's Disciple Frank J. Strobel, 2013-03-21 When author Frank Strobel returned from Vietnam, he felt as if he had used up a great deal of his personal "life force" during that year. He worked very hard that

year—physically, mentally, and emotionally—and experienced almost every feeling known to man at a very high intensity. The Devil's Disciple: Different Sides of War presents a compilation of his experiences in Vietnam, exploring this intensity and recalling the speed with which events moved during his time there. Strobel's missions during wartime were not for the faint of heart His experiences helped him to understand that war has an impact beyond just the fighting involved. There are people, young and old, affected by war. They lived in the villages that he visited as part of his tour of duty. In some of his experiences, he talks about the children he met in the villages of Vietnam and their love for American bubble gum. Using hand signals and an occasional interpreter, he was able to communicate with some of the children and older people in the villages, learning about them and about their lives. In The Devil's Disciple, Strobel shares his personal experiences during one of the most challenging wars the United States has fought.

Around the World in Six Years Henry Holt,2015-07-14 At the age of 67, Henry Holt struck off on a sailing adventure that would become a six-year voyage unlike any other way of seeing the world. The people he met and the challenges he faced along the way - from bureaucratic headaches at ports, to truly frightening weather events, to isolation from his friends and family while relying on their help from afar - only strengthened his commitment to the journey. Around the World in Six Years is an account of sailing lessons and life lessons in equal measure. Dramatic, funny, and heartfelt, it is an account of an ordinary man on an extraordinary trip, and will inspire the aspiring adventurer in every reader.

Modern Advances in Applied Intelligence Moonis Ali,Jeng-Shyang Pan,Shyi-Ming Chen,Mong-Fong Horng,2014-05-20 The two volume set LNAI 8481 and 8482 constitutes the refereed conference proceedings of the 27th International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems, IEA/AIE 2014, held in Kaohsiung, Taiwan, in June 2014. The total of 106 papers selected for the proceedings were carefully reviewed and selected from various submissions. The papers deal with a wide range of topics from applications of applied intelligent systems to solve real-life problems in all areas including engineering, science, industry, automation and robotics, business and finance, medicine and biomedicine, bioinformatics, cyberspace and human-machine interaction.

The Zero Option David Rollins,David A. Rollins,2009-07-01 The Cold War is going badly for President Reagan's administration. Support in Europe for the Soviet Union is on the rise, while acceptance of the new US intermediate range nuclear missiles is waning. Enter Roy Garret, a bright young NSA analyst with a plan. It goes into effect on the morning of 1 September 1983 when Korean Air Lines commercial passenger flight 007 takes off from Anchorage, Alaska, heading for Seoul. The airliner rendezvous with a US spy

plane over the Bearing Sea, overflies a top secret Soviet submarine base and is then shot down off Sakhalin Island... Or is it? No wreckage or bodies are recovered. And a radar tape that shows what really happened to KAL 007 has gone missing. On board the downed airliner were 269 souls, including one US Congressman with too many secrets. Thirty years later, the missing radar tape falls into the hands of the daughter of a KAL 007 passenger and the son of the US spy plane commander. Determined to keep the facts hidden after all these years is New Mexico Governor Roy Garret, who is now contesting the US presidency. What follows is a desperate chase across Russia to uncover the truth once and for all from beneath the snows of Siberia. Can two young idealists outwit the forces ranged against them, or will Uncle Sam and the Russian Bear sweep history under the carpet again?

The Story I'll Tell Natalie Ashby,2021-09-02 Natalie Ashby has lived all of her life in active ministry. Her parents were evangelists and church planters with twelve children in tow -- she was the youngest girl. She married right out of high school and became a Pentecostal preacher's wife. When her husband was diagnosed with cancer, she expected life to slow down but it only increased in responsibility. Though the illnesses that plagued him were long-suffering, nothing could prepare her for the day he died. Suddenly, she was called widow. A dirty word. A constant reminder of a long journey that led to the label. Natalie candidly shares the road to discovering her identity, purpose, calling and coming out on the other side. This book is her story in this season of life -- a newly-widowed former pastor's wife navigating life outside of full-time ministry. The tables have turned, her seat has changed, and she's along for the ride.
