Need for Speed Brian Kelleher,2014-02-25 Buckle up . . . Tobey Marshall is a mechanic struggling to save his family-owned garage. While he and his team skillfully build and race muscle cars on the side, it's not enough to keep the doors open. He reluctantly partners with his longtime rival, a wealthy, arrogant ex-professional racer, Dino Brewster. But just as a major sale to car broker Julia Bonet looks as though it will save Tobey's business, a disastrous, unsanctioned race results in Dino framing Tobey for manslaughter. Two years later, Tobey is fresh out of prison and eager for revenge. To take Dino down, he plans to enter the high-stakes De Leon race—the biggest contest of underground racing in the world—to get the money to reclaim his family business and expose Dino's deception. But getting there won't be easy, as Tobey must run a high-octane, pedal-to-the-floor gauntlet, dodging cops coast to coast and dealing with fallout from a dangerous bounty on his car. Luckily, with his team—and the surprisingly resourceful Julia—on his side, he just might defy the odds . . .

*Driving With Music: Cognitive-Behavioural Implications* Warren Brodsky,2017-03-02 This book, the first full-length text on the subject, explores the everyday use of music listening while driving a car. It presents the relationship between cars and music in an effort to understand how music behaviour in the car can either enhance driver safety or place the driver at increased risk of accidents. A great deal of work has been done to investigate and reduce driver distraction and inattention, but this book is the first to focus on in-cabin aural backgrounds of music as a contributing factor to human error and traffic violations. Driving With Music begins by outlining the automobile, its relationship to society, and the juxtaposition of music with the automobile as a complete package. It then highlights concepts from the fields of music perception and cognition, and, within this framework, looks at the functional use of background music in our everyday lives. Driver music behaviours - both adaptive and maladaptive - are explored, with the focus on contradictions and ill-effects of in-car music listening. To conclude, implications, applications and countermeasures are suggested.

**Mad for Speed** Elsa A. Nystrom, 2013-06-06 This book covers Joan Newton Cuneo’s life, and her roles (from 1905 to 1915) as the premier female racer in the United States and spokeswoman for women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan’s growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan’s experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers

Association—which ended in banishing women racers shortly after Joan’s greatest racing victories at New Orleans (in 1909). The book then follows Joan’s attempts to continue racing, the end of her marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring.
